## THE WORLD'S FIRST

Did you know we were the world's first games magazine? Did you also know we're still the UK's best selling mag that covers every kind of game? That's something no-one else can claim - you don't survive unless you're offering a superb magazine, and you don't stay number one if you're not a whole lot better than the other mags on the shelves. Those are two judgments that readers like you make every month.

EVERY MONTH IN **computer and video** **games** WE GUARANTEE...

- You'll read about the best games, on all formats, first
- Our in-game screenshots are the hottest you'll see
- We don't review half-finished games
- We give you the very best buying information, so you'll never waste your money again
- You can trust what we say
- Our tips and guides make playing even more fun
- We love games just as much as you do
- We cover it all, we're the **ONLY** magazine you need

PLAYSTATION 2

**P**layStation2 is about to go on sale and is destined to be BIG – perhaps the most important, leisure invention since the launch of TV. So just how good is it? Feast your eyes on the awesome image on our cover. Drink in the detail and then consider this fact: it's an in-game shot. CVG hates hype and up till now you've mainly had to rely on our word that PS2 games look mint. Now the proof is before your very eyes. The shots over the next six pages feature some of the coolest upcoming titles and should set any gamer on fire. It's time to start believing in the power of PS2. What's more, while Sony gears up to launch in Japan on March 4th, the world's best developers are making even more mind-blowing games. For now, trust your eyes and decide: do you break the bank and import, one-order, or camp in the street when PS2 hits the UK in late 2000?

The triple A titles that are reason enough to blow £240 on PS2

## TEKKEN TAG TOURNAMENT - Namco

The legendary series that knocked *Virtua Fighter*, *Street Fighter* and *Mortal Kombat* to the floor just keeps getting stranger. Think how stunning the extras from *Tekken 3* were and then check out how impressive the next generation *Tekken*'s in-game graphics are. Sweet, eh? Drool-worthy innovations include realistically animated backgrounds and the all-new tag feature where, if you're getting a complete shoving, just hit the Tag button and call in a new character to exact some revenge on your opponent.

Eddy was the cheesiest character in *Tekken 2*, rewarding random button bashes. His moves are looking cooler in *Tekken Tag*

If you're taking a beating on PS2, you'll know it. Fighters faces and bodies will contort in pain, spurring you on to a come back

Look at that grass. See how they stand among it? The grass really exists in *Tekken Tag* - each blade is modelled out of polygons. Wow

## RIDGE RACER 5 - Namco

Again, tough to tell the intro sequence and in-game graphics apart, as Namco demonstrated with the early video demos of this updated racer. It may be somewhat overshadowed because *Gran Turismo 2000* looks just so bloody brilliant, but die-hard racing fans will love this to death. Despite the down or no racing games already announced, *R5* and *GT2K* look sure to be the main contenders scrapping for pole position for the first year or two. *Ridge Racer* provides arcade flair, and *GT2000* is pure simulation

One look at this screen should tell you this is a *Ridge Racer* game, but unlike any that have gone before

Each car is modelled to fantastic detail. And the sponsors? All named after old Namco games and characters. Cool

*Ridge Racer*-brought street racing to the masses and this newest version gives you a more realistic cityscape than ever before

## GRAN TURISMO 2000 - Sony

*Gran Turismo 2* was a big step up from the original on PlayStation in a lot of areas but, not visually (see our review on p.76). For a major graphical innovation, you're going to have to wait for the PS2 game. Sure there's even more cars and tracks to enjoy, but what really grabs you is it looks far more realistic: incredible detail right down to reflective surfaces and heat shimmer around car exhausts. It's so real, even Jeremy Clarkson will be gagging for a go. Time to live out your boy racing fantasies.

And you thought the light reflections in the original *Gran Turismo* were cool. *GT 2000* takes it to the next level and then some

Expect a healthy line-up of old classics to race alongside the latest metal of the 1990s and beyond

Motion blur, heat haze and tyre smoke are just a few of the effects that will make *GT 2000* the most convincing driving game ever

# 'GT2000 - so real even Jeremy Clarkson

## IT'S RAINING GAMES

Usually, a new console has to shift a million or two units before games developers really get behind it and start creating brilliant games (remember the lack of N64 titles?). Not PlayStation2. Oh, no. Every single day, info on new games of every type and from every corner of the world is simply exploding out of the woodwork. It's damned hard to keep up. Below are just a few of the newest. Some have been officially announced while for others we've got the skinny on the hush-hush — so the rest of the gaming world won't know about them until they've read CIG. We'll have screenshots of the best to keep you going in the coming months.

- **3D GOLF** Added realism on the virtual greens.
- **3D REAL DRIVE** Burn round town and home for tea. Not.
- **A-TRAIN 6** Run a railway better (or worse) than Virgin.
- **ARMOUR'D CORE 2** Big robots make big scrapheaps.
- **BAKI THE GRAPPLER 2** Bozome wrestling game.
- **BILLIARDS MASTER** No prizes for guessing this.
- **BLOODY ROAR 3** A beat-em-up with animals.
- **BOMBERMAN 2001** Top multiplayer game rejuvenated.
- **BORDER CROSS** Formerly known as *X-Fire*.
- **BUST-A-MOVE 3** Great puzzle game.
- **CHORO Q HG** Japan's version of racer *Micro Machines*.
- **COOL BOARDERS** Whiter than white snowboarding sim.
- **DARK CLOUD 2** Grim. Make a world, then live in it.
- **DRUM MANIA** Bangin' rhythm-action Beat Mania style.
- **ETERNAL RING** RPG seen Quake style.
- **EXOTICA** Lee's volunteered to review this.
- **F1** Should be the best of the numerous F1 games.
- **F1 GRAND PRIX** Make like Hakkinen, not Senna.
- **FIGHTING CUTIES** Japanese girls mud wrestling... please.
- **FX PILOT** Feels like real flying, only not quite as dangerous.
- **GO BY TRAIN** Another one to please to world's animals.
- **GRADIUS 3 & 4** Come shoot em-ups.
- **JADE COCOON 2** Sequel to underrated RPG.
- **KESSENI** Strategy set in feudal Japan.
- **LAKEMASTERS EX** Addictive fishing game.
- **LET'S BECOME A PILOT** Let's find a good name first.
- **METAL GEAR 2** Biggest game on PlayStation and PS2.
- **MOBILE SUITE GUNDAM** Mobile robots kill. Kill people.
- **NINJA GARDEN** Shinobi-style ninja scrolling beat-em-up.
- **POPORO CROSS** Soft, cute RPG.
- **POWERSTONE 2** Even madder than mad fiction action.
- **PRO MAHJONG** Tile-matching puzzler.
- **RESIDENT EVIL 4** More zombie face-esting action.
- **ROADSTERS TROPHY 2000** Updated racer.
- **ROBOCOP** Buy this game. You have 20 seconds to comply.
- **SKY SURFER** Board action.
- **STREET FIGHTER EX 3** Seven's scrapping action.
- **TENCHU 2** Gory nisei action adventure.
- **THE BOUNCER** New game style, the playing action movie.
- **TOMB RAIDER 5** Or whatever they call Lara's next trip.
- **TUNING CAR RACE GAME** More tenous racing game.
- **UNISON** Rhythm-action.
- **WILD WILD RACING** Yet another racer.

## AND THERE'S MORE...

There's already far too many PS2 games in the offing to keep track of them all — by the time you read this, we'll know about a couple of dozen more titles being worked up for PS2. But here's a few we know about to ponder on as you're lying in bed dreaming about what games you'd like to see:

1 On 1 Government; AI Gyo 2001; American Arcade; Bakuryu 2; Battle of the Gods; BDO 2000; Boku to Mushi; Dan Sen; Fantassium; Fighting Illusion; Fly High G; Gemini; Million Powerful Pro 7; Magical Sports; Koshen 2000; Magical Sports Dutch; Bass; Magical Sports Golf; Mahjong Yaroze; Ai Mahjong 2001; Monte Shogi; Omukashi; Parcer Century G Breaker; Perfect Golf; Resselled; Shanghai 5; Shin-Sangokumusou; Sidewinder Max; Soldnerschild; Sonnette; Soul Surfing; Splash Dive; Star Ocean 3; Street Mahjong; Tetsuzan Menkokuuden; Totsi Shogi; World Newland 3.

will be gagging for a go"

# YOU WANT EVEN MORE?

Players want wishful fulfilment, not wishful thinking

## 500GP

Never escaping action from the masters of the racing game at Namco. Be Carl Fogarty, only you don't have to wear daddy leather. Unless you like daddy leather.

Ridge Racer on two wheels from Namco. It can't get much more realistic than this

Real bikes, real courses and real riders. The only thing that isn't real is the danger

**T**his is game shots you're gawping at, are in all probability the best looking you and we have ever seen. But great as these games will be, they look certain to be just souped-up versions of what has gone before. *Gran Turismo 2002* - more cars, more courses, delicious graphics and maybe a few new features - will probably be just another GT racing game. If game history is anything to go by, *FFA* and *ES* should seem a bit more realistic on PS2 but, in all likelihood, will simply be graphically impressive re-workings of tried and tested football formulae.

## TYPE S RACING - Square

Yet another racer prepares to slug it out for pole position. Despite the amazing look, this one looks likely to start on the second row of the grid behind the big two racing titles.

If Square can make a racing game as good as it makes RPGs, then the battle for PS2's driving crown will be a three horse race

Just look at these atmospheric effects. The power of PS2 makes it possible to throw up all that realistic dust when driving

# PLAYSTATION 2

## STOP PRESS...STOP PRESS...

Can't wait. One of the biggest PC games of the year comes to PS2

### QUAKE 3 ON PLAYSTATION 2: IT'S OFFICIAL

Just as we went to press, the news that we wanted to hear arrived. Two companies are in the running to develop Quake 3 engine-based games and both are working on versions of Quake 3 Arena. PC developers id will decide which one is best and gets released. Bethesda Arts in the States are using the Quake 3 engine for numerous projects while Ravensoft's Soldier of Fortune: Hellcat 2 are working on versions of Quake 3 and possibly Star Trek Voyager to develop PlayStation2 technologies. Nothing is official yet, but will bring you news of the winners of this contest, soon.

### ISS - Konami

One thing is for sure, it'll look better than a 60-yard Beckham volley or a nuke shot of his Misus. EA are planning a FIFA game, but our money is on this to pip it to the Premiership title.

The ISS series are the finest football games ever made. Imagine that legendary playability combined with photo-realistic visuals

### MUNCHIE'S ODDYSSEY - GT

Also is back, sort of. More arcade puzzling, platform jumping and farting action from the Oddyssey team. They've pulled out good 'uns so far, so hopes are high for this.

Also one of the most popular characters on PlayStation. His PS2 debut will be eagerly awaited by millions

These screens are from a very early version of the game. Expect it to look trackloads better when it launches alongside PS2 in the UK

### POWERFUL MOMMA

There's no doubt that PS2's one powerful momma - so powerful in fact that the US originally banned Sony from selling it in China. If the sound quality is good - and you'd expect Sony to get that right - it could make your hi-fi obsolete and even your video player if later PS2s ship with a recordable DVD player. And all for £340. It won't be hard to convince parents that PS2 makes sense for all the family.

### FLASHY GRAPHICS

But Sony promised games players that PS2 is capable of so much more than just giving their favourite titles flashy graphics. The Emotion Engine at the heart of PlayStation2 is geared towards locally changing the gaming experience, making it more immersive and engaging even than watching TV.

### BEYOND RECOGNITION

The real turning point in gaming history will come when developers pull away from doing tattered up PC conversions and use the connectivity and pure, unadulterated power of the PS2 to smash gaming boundaries beyond recognition. If they get it right, we can expect games featuring worlds so huge you may never explore them fully. Games that offer so much diversity that they'll never play the same way twice. Online games of all genres - not just FRGs - that will allow you to play smoothly with thousands of real people.

### TRUCKLOAD

In the meanwhile, there's plenty of games to get just casually excited about, from developers behind titles with proven popularity. It's good to know the Metal Gear Solid team have been recording

sound effects for their secret new PS2 project, and you can expect new titles from those responsible for Tomb Raider, FIFA, ISS, Crash Bandicoot and just about every other big PlayStation title. Even big American developers like Raven (who are behind gore fest Soldier of Fortune and the Heretic series) have some very exciting stuff up their sleeves (see the box at the top of the page). So when PlayStation2 is launched in America later this year, they'll be ready with a whole raft of super-cool US-made games.

### CALL ME SCEPTICAL

Perhaps games like Kessen and Dark Cloud will surprise us and pull something totally innovative out of the bag, but we suspect players will have to wait at least a couple of years for truly ground-breaking games to arrive.

### YOUR CHANCE TO MAKE GAMES BETTER

If you're as excited about PlayStation 2 as we are but don't want the same old same old, then this is your chance to make a difference in the future of games. Sign this letter imploring game inventors to truly exploit the power of PlayStation2 rather than just bung out conversions and sequels. Then cut it out and send it to your favourite publisher or games developer.

### Dear Mr Developer,

Across the world there are going to be millions of PlayStation2s set by TVs, with people like me dying to play the games we can only dream of right now. I don't mean to sound ungrateful, because your current batch of games look absolutely stunning, but what we want are new and original ideas that will take gaming to the next level. Please can we have games that really push the machine and go in new directions. Racing games are good, but they can only look so good. Platform games are fun but once you've finished them, that's it. Sony tells us that PlayStation2 can change gaming forever. Please, please, please prove it to us and don't take the easy way out by just doing PC conversions, first-person shooters and sports titles. Go on, blow our minds! We're ready and waiting.

Cheers

A Computer and Video Games reader

## GAME BOY ADVANCE

THE REPLACEMENT TO GAME BOY COLOR SHOULD LOOK SOMETHING LIKE THIS...

**HANDEHD GAMING** is about to make a mighty leap into 32-bit technology. Game Boy Advance is the fantastic looking replacement to Nintendo's hugely successful Game Boy Color. With more power and the potential for SNES quality games, Advance is set to make handheld gaming more fun than ever. From our inside sources, this is what we reckon the machine could look like.

### COMPATIBILITY

Game Boy Advance will play all your old Game Boy and Game Boy Color games, meaning you'll have a ready catalogue of games when you upgrade. Unsurprisingly, the dedicated Advance games won't run on the older systems. It's also thought that the Game Boy Advance will have some sort of link capability with the upcoming Nintendo Dolphin console, so you'll be able to work on certain aspects of games while you're on a train wherever and then transfer the data to your home system.

### RELEASE DATE

Initially, Nintendo said Game Boy Advance would launch in August 2000 in Japan, but insiders are suggesting the system will ship as early as April. Cleverly, this pitches the machine against the amazing PlayStation 2 and it's certainly not a foregone conclusion as to which gamers would choose - especially since the Game Boy Advance will be under half the price. The UK launch date is not likely to be this year, but it's going to be worth the wait. Prices are unconfirmed, but a UK cost of between £90 and £120 looks likely.

DEAN SCOTT

### THE GAMES

Nintendo has admitted that the forthcoming Game Boy Advance is a dead cert for some tasty SNES conversions. There's quite a

catalogue of contenders and we hope Nintendo has the good sense to get these nine out there, pronto.

**ISS DELUXE:** The premier 16-bit kickabout and one that still plays better than most of today's contenders

**SUPER MARIO KART:** Rightly hailed by many as the most single player fun racer ever. Truly shine in multiplayer mode, too

**SUPER MARIO WORLD/ALLSTARS:** Perfect playability and fantastic level design keeps you playing to the finish

**SUPER METROID:** Massive arcade adventure which balanced compulsive blasting with lots of exploration

**LEGEND OF ZELDA:** Link's adventure is every bit as exciting as his N64 epic. Proved RPGs didn't have to be boring

**SUPER BOMBERMAN:** Classic formula: lay bombs to blow up your opponents. A Net multiplayer mode would rule

**SECRET OF MANA:** More of a hardcore roleplayer than Zelda, and better for it in many gamers' eyes. Massive quest

**SUPER TENNIS:** Still the best tennis game ever. Graphics look crude, but pace and playability have never been matched

**STREET FIGHTER 2 TURBO:** Capcom's classic 2D fighting series received an awesome SNES conversion

**HANDHELD STARS**

Game Boy gets unholy trio. p18

**SOUL REAVER**

Even better on DC. p23

**ECW Vs SMACKDOWN**

Which wrestler will rule? p26

**BLACK & WHITE**

Good god...bad god. p36

**CE REVEALED**

**ACTUAL SIZE**

**THE SPECS**

**CPU:** Memory embedded 32-bit RISC CPU  
**LCD:** Reflective TFT Colour LCD  
**Display Size:** 40.8mm X 81.2mm  
**Resolution:** 240 X 160 pixels  
**Maximum colours displayed at any one time:** 65,000  
**Console dimensions (approximate):** 80mm High, 135mm Wide, 25mm Deep  
**Weight:** 140g approx.  
**Power Supply:** Two AA Alkaline batteries  
**Battery Life:** 20 hours continuous play

**MOBILE 21**

Nintendo has formed a partnership with ace developer Konami to produce games for the new system. The £1.75 million company, Mobile 21, will develop titles exclusively for Game Boy Advance.

**POWER**

Even given the amazing power of the next Game Boy, you won't need to spend a fortune on batteries. Two AA Alkaline batteries will keep it going for a whole 20 hours – continuously.

**NET ABILITY**

The new Game Boy Advance will be able to access the Net. Link it to a mobile phone to play against opponents worldwide, send e-mail, chat, and download software. A new digital camera means you'll be able to scan your face to scare your web adversary.

**THE GUTS**

Game Boy Advance is powered by a 32-bit RISC processor developed by UK company ARM. It's supposedly a dream to program for, ensuring lots of third-party support. The console will have the ability to shift polygons, but don't assume that because it's 32-bit that it will have PlayStation graphics. You're initially likely to see visuals to match flashy SNES titles like *Donkey Kong Country*.

**A RAINBOW OF COLOURS?**

Nintendo haven't yet confirmed that Game Boy Advance will be available in various colour options, but we think it's a safe bet. The original Game Boy launched as a grey unit, but the machine became a bit of a lifestyle accessory. The wider colour range went down a storm as a result.

**ALINDRA 2** Huge puzzle RPG. The original was a big hit in Japan but this new and improved version should cause more of a stir in the UK. Loads of puzzles to solve, dragons to battle and RPG clichés to overcome. **OUT: TBC**

**BANJO TOOIE** The lovable duo are back for their second mammoth arcade adventure. Eight huge new worlds await them but this time Rare has included a bunch of four-player sub-games as well. Good game chaps. **OUT: MID 2000**

## MICRO MACHINES GETS A MAKEOVER

**GRAB YOUR** Baby Nikes and prepare to take to the tangle top - *Micro Maniacs* is coming. The game is the latest addition to the million-selling *Micro Machines* series, and despite being the fourth game in the series, is the first proper sequel available in over ten years of *Micro Machines* mayhem.

### PATTER OF TINY FEET

The main difference in this new game is that instead of racing mini-vehicles, this time you're on foot. The little dudes you get to race are the result of Dr Minimiser's bizarre experiments in shrinking technology. His vision is to shrink the world's population to 1/800th of its original size, in order to conserve the Earth's vastly depleted energy resources. The Maniacs are a specially selected collection of mutants and oddballs, all vying for the position of overseeing the colonisation of a newly-shrunk world. And this is where you come in. To decide which of Dr Minimiser's creations wins this coveted position, he has pitched them in a race to the death.

### SAME OLD SAME OLD?

Of course, this is just an excuse for some top-notch single and multiplayer gameplay. The courses

In Dr Minimiser's lab you'll see prototype images of the Maniacs!

The detail in the levels is top-drawer

are instantly recognisable but because you're on foot - not wheels - there's now a handy jump button to help you negotiate the tricky obstacles. The mutant Maniacs also have two special moves you can use to attack your mates - run over the power-ups to have use of your character's specials.

### MULTIPLAYER MANIACS

One of the reasons why *Micro Machines* games have been so much fun in the past is the multiplayer action. *Micro Maniacs* allows five players to race against each other on all courses and in a selection of exciting modes. Extra characters, courses and secrets will be unlockable in the single player mode ensuring lots of replay value.

LEE SKITRELL

## We Reckon

Previous *Micro Machines* games have been superb. *Micro Maniacs* could be the best of the bunch. We just hope that the transition from wheels to feet doesn't detract from the *Micro* magic on its final release.

## LARA'S SMALLER BITS

YOU MUST admit, it was kind of inevitable. Lara Croft is coming to the 8-bit Game Boy in a side-scrolling *Prince Of Persia*-type adventure. But before you scream, "Cash in!", hear this. Core Design has gone to great

lengths to make the pocket version faithful to the 32-bit smash hits. Lara still totes two handguns, can crouch, crawl, climb and swing on ropes. There'll be a host of baddies who need their asses kicked, and the

familiar block-shifting, switch-pulling puzzle gameplay you know and love. The Lara sprite is uncharacteristically tall for a Game Boy game, and shares animations with the PC and PlayStation versions.

### WE RECKON

YOU WILL have heard of *Metal Gear Solid* on the PlayStation, but you might not have heard of the two previous games in the series, which appeared on Nintendo's ancient NES system.

These games have provided the inspiration for a *Metal Gear* game on the Game Boy Color, and the gameplay will remain unchanged from the PlayStation version. Solid Snake will be

sneaking around in enemy bases once more. There will be 13 all-new missions (each taking upwards of an hour to complete), 180 VR missions and plenty of broken necks.

## SMALL-TIME CRIME

THE PLAYSTATION crime classic *Driver* is heading for the Game Boy Color, and the amazing news is that it's looking great. The 3D perspective has been abandoned for a Game Boy-friendly top-

down view, but the missions follow similar criminal lines, for example, picking people up from bank jobs. In fact, in this form, *Driver* is looking a lot like *Grand Theft Auto*, although seeming a

hell of a lot better than the GB version of that game. The car handling is spot-on, there's lots of activity in the cities, and you can knock over dustbins and mailboxes. And you'll want to.

### WE RECKON

This is where Game Boy convicts should be looking for pocket pickings. It's already nicer than *Grand Theft Auto* on the GB.

**THIS COULD** define a new genre of gaming: the sarcasm 'em up. It's an adult cartoon game in the form of a shoot 'em up mixed with puzzle and adventure elements. The cartoon graphics and level of truly weird humour should guarantee its appeal to kids as well as those who should know better.

### KICKIN' WIT

The six characters you switch between to conquer the huge 3D levels all come in the form of cute furry things (hence *Furballs*). There's mindless blasting action with puzzle elements and character switching, and the hilarity kicks in when you're solving devious traps and doing madcap things to the opposition.

### SICK FURRIES

A network game is being built in to take the madness over the Net and to get you to carry out the warped demands of the developer on your friends. Cute it may be, cuddly and

soft it most certainly isn't. One thing's for sure, come April, *Furballs* will be so big you won't be able to avoid the little beggars.

**WHY SPEND** thousands visiting Disney attractions in America when you can now race around them *Mario Kart* style on your TV at home? *Walt Disney World: Magical Racing Quest* (catchy title, eh?) sets you up as one of Uncle Walt's cartoon creations and lets you do the *Mario* thing around Space Mountain, Countdown to Extinction and Jungle Cruise, to name but a few.

**NEW GUYS**

Disney has held back from using its big stars in the game, so there's no Mickey Mouse or Donald Duck - not even Goofy. Instead, you get the likes of Chip 'n' Dale, Jimmy Cricket and five brand new characters. There are also the expected bunch of hidden characters, but we're not telling you about those, yet. Each character brings their own unique attributes to a race; after all you wouldn't expect Jimmy to have the same stamina as Chip, would you?

**DISNEY POWER**

But cute characters alone won't be enough to make it *Mario Kart* on the PlayStation - no one has managed that yet. All the courses are packed with power-ups, collectibles and weapons, although there won't be anything too dangerous - that wouldn't be Disney-like, would it? The collectibles are pieces of a fireworks machine that you build up to save the fireworks show at the end.

**DISNEY DERBY**

**CHIP 'N' DALE TAKE ON MARIO KART**

**MULTIPLAYER**

The PlayStation version offers a two-player mode so you can find out just who is the toughest - Chip or Dale (a question that has plagued the human race for decades). Dreamcast gets an extra cartoon treat as Disney has made its version a four-player game. On both of these versions you can race or enter Disney Battle Arenas, just like you could in *Mario Kart*.

**DISNEY MAGIC**

In terms of quality, Disney games have been a bit hit-and-miss to date. This one looks like it could well change all that and banish the likes of *Crash Team Racing* to the beginning of the starting grid. Watch out as the PlayStation versions hit the shops first, by the Dreamcast and Game Boy Color following in June.

LES ELLIS

SOUL REAVER  
FORMAT: DC

STATUS: 95% COMPLETE

## SOUL SUCKER TO CONSUME DC

Raziel never fails to get the old barbecue lit on a Saturday night

to an arcade-like 60fps, meaning this looks smoother and more detailed than even the PC version. This also leads to higher resolution characters that don't break up quite as much in action. There's also a load of new special effects that kick when you're casting spells or in combat.

### BLOWN AWAY

The combination of *Tomb Raider*-style exploring and noseferatu action should prove irresistible to Dreamcast owners looking for something different to racing and sports games. There's certainly no shortage of gore as you skewer mutants on spears to rob them of their souls or slam them into metal spikes fixed to walls in the middle of a fight. Come to think of it, there are dozens of ways to kill creatures, so the method can be left down to your own personal preference and your gruesome creative thinking.

**DON'T LET** a little thing like being dead stop you from having some fun. As Raziel, you've been given the job of wiping out Kain's army of vampiric freaks – no mean feat when you're a former bloodsucker yourself. After success on the PC and PS, a Dreamcast version of Eidos' soul-sucking Lara rival certainly whetted our appetites.

### SUCK THIS

If you're one of those cynics who expect Eidos to do a straight conversion and make a quick buck, then you're wrong. The basic game may be the same, but it has made use of the extra power beneath the Dreamcast's bonnet. For a start, the frame rate has been almost tripled

Raziel's finale fire-eating routine was always a show-stopper.

Using a paint roller on a pole to decorate those high places caused Raziel some problems

### TWO DIMENSIONS

As big as the game appears, the size is doubled by Raziel being able to cross between two dimensions – the spectral and material realms. Areas inaccessible in one dimension open up in the other, which means puzzle-solving takes twice as much lateral thinking. Although it isn't really a gameplay feature, one of our favourite touches is that there's no loading time. The game constantly accesses the CD so that there's no let up in the action.

### BYE-BYE LARA

*Soul Reaver* suffered due to delays on the PS; it sold well, but never achieved the Lara killing-status it deserved. With this new DC version, we're hoping that Ms Croft won't be missed by Sega owners who'd rather have a character that sucks than a game that does the same.

LES ELLIS

Another good sign for DC as it gets the best version of one of the most underrated games of last year.

## ECW GETS BLOODY AS WRESTLING WAR HEATS UP

**EXTREME WRESTLING** with barbed wired baseball bats and a stack of weapons is coming your way, now the licence merry-go-round has stopped. If you follow who publishes what, here's the deal: EA has the poor WCW licence; former WCW licensee THQ snapped up the big-bucks WWF licence and former WWF licence holder Acclaim went for the bloody approach by not only signing the up-and-coming ECW licence, but by buying a stake in the company, as well.

### POWERSLAM

While the ECW is the least known of the big three wrestling promotions, it was the first wrestling federation to introduce the extreme style of wrestling: plenty of blood spilt, the

most outrageous moves, plus more weapons and brutal violence than you'll see anywhere (barbed wire-wrapped baseball bats, flaming tables etc). The ECW is where the big two feeds look for future superstars.

### PILEDRIVER

*ECW Hardcore Revolution's* powerful new game engine (better than *WWF Attitude's*, apparently) will show off the most outrageous moves in wrestling today. You'll see things you wouldn't believe a human body could stand—and best of all, you'll get to do them to your mates in the multiplayer mode. Choose characters like Raven, Rob Van Dam, Sabu and Tommy Dreamer and fight in all sorts of different match setups to carry out action so hardcore, that the game

I don't think your neck is supposed to bend that way.

will get a mature rating on its release in America, making it a decent 15 here, maybe even an 18.

### HARDCORE

*ECW* is big on chaos and mayhem, so in the four-player match up

Taking a leaf out of *WWF Attitude's* book, there are now arenas, a create a PPV mode, 20 different game

**"Mashing a mate's face with a shovel has never been such fun"**

**SO HARDCORE EVEN THE ADS WERE BANNED**  
 We all know how much the Americans detest violence. High school shootings, serial killers and mass suicides were plenty to match for a few adverts for *ECW Hardcore Revolution*. They were banned in certain areas, but what's so bad about them? We dunno, but to prove that we can do what the Yanks can't, here are the ads that were banned; see what you think and let us know.

modes, a career mode, create a wrestler features, entrance music and pyros, out of the ring action, over 400 moves per wrestler, taunts, trademark finishers and full commentary from ECW's Joey Styles. You won't see anything on an ECW TV show that's not in the game.

### WHAT'S COOKING?

You're going to get the most over-the-top, outrageously violent wrestling game yet seen. Mashing a mate's face with a shovel has never been such fun. Just imagine the intensity of *WWF* and *WCW* multiplied by ten - that's where *ECW* is coming from. If you didn't know *ECW* wrestlers before, you'll know all about them after this.

**THE WRESTLING** onslaught continues with Acclaim's *ECW* putting the pressure on *THQ* to keep the *WWF* licence slamming harder than the rest.

### ROCK BOTTOM

As good as *WWF Attitude*, *THQ* is upping the stakes from our early look at *Smackdown*. The graphics have been improved so that it now looks more realistic than ever. It moves faster and smoother and all your favourite wrestlers' trademark moves are in there - and thankfully they're all easier to access than *Attitude*'s multi-button and direction combinations.

### STONE COLD STUNNING

With an up-to-date character roster with full career and special match-up modes, *Smackdown* is about to take wrestling into the next generation. The usual ring fighting is complemented by the chance to take the action backstage into locker rooms, boiler rooms and car parks, where it gets even more

outrageous (if there's something back there, chances are you can smash it over someone's head). If you thought it didn't get better than *WWF Attitude*, you could be wrong.

# DRAC'S BACK (AGAIN)

THE DADDIO OF PLATFORMERS RETURNS TO N64

## FACTS

GAME: **CASTLEVANIA: LEGACY OF DARKNESS**  
 FORMAT: **N64**  
 OUT: **SUMMER**  
 MULTIPLAYER: **NO**  
 TYPE: **3D ADVENTURE**  
 BY: **KONAMI**  
 STATUS: **85% COMPLETE**

IT WAS spring in the year 1999. The young people of the village awoke one foggy morning, as if by some strange calling. They knew this day was special. It was what they had been waiting for. The mist swirled around their pallid faces as they made their way to the game stores and bought their copies of *Castlevania* on N64. They plugged them in, eagerly awaiting a taste of gothic pleasure. And then they wept. It wasn't very good.

## RE-VAMPED

Last year's *Castlevania* on N64 was a hit-and-miss affair. The game had many superb ideas, yet the awkward controls and the unforgivable one-fall-and-you're-dead sections caused a stink worse than the rotting undead. For *Legacy Of Darkness*, however, Konami seems to be back on track. The game is not so much a sequel as a more of an extended reworking of the

original - the action in the game takes place before, during and after the events of the first game. There are also two new characters to play, along with Reinhardt and Carrie from the original.

## CH-CH-CHANGES

Besides the enhanced story, the main improvements in *Legacy Of Darkness* are in the mechanics of the game itself. Everything has been tweaked and tightened up, resulting in a more satisfying experience. The annoying controls are improved, making jumping and grabbing ledges less hellish, and combat with the undead now feels more solid than before. The Expansion Pak graphics are still strangely fuzzy but the overall graphical style suits the game's gothic charms.

## GET RUBBER PANTS

One good thing ported from the original is the game's awesome atmosphere. For *Legacy Of Darkness*, the developer has gone all-out to create a filmic sense of dread and slowly unravelling horror. Some stunning cut-scenes reveal the story in short bursts to keep you guessing, and there are some in-game shock moments to rival even the mighty *Resident Evil* series.

LEE SKITTELL

## We Reckon

*Legacy Of Darkness* is shaping up nicely. Providing the flaws of the original are removed and the best bits expanded upon, Konami could be on to a winner.

## DREAMCAST VERSION GETS A GREAT LOOKING FOUR-PLAYER MODE

### FACTS

GAME: **RAYMAN 2**  
 FORMAT: **DREAMCAST**  
 OUT: **MARCH**  
 PLAYERS: **1-4**  
 TYPE: **3D PLATFORM**  
 BY: **UBI SOFT**  
 STATUS: **90% COMPLETE**

### FUN FOR FOUR

The DC game features a host of exclusive new features, plus crisper visuals and enhanced sound over the recent N64 version. The most exciting addition is a four-player bonus level. You have to earn this mode, but the it looks like it'll be well worth the effort. By collecting special crystals in the main game you can unlock time-trial challenges in the new Globox Village level. Successfully beat these time-trials and you then unlock the Globox Disc: multiplayer game.

### LUMZ THE WORD

Magical Gold Lumz appear in the maze and you want to be the one to collect

the most. The action takes place on a single screen, viewed from above. The disc is a kind of circular maze with revolving wall segments. Up to four players can battle it out head-to-head. Power-ups and power-downs fall from the sky and monsters roam the maze. The action looks frantic and fun, but the one drawback being there's only one screen for the multiplayer action.

### MORE TO ENJOY

The main game plays similar to the N64 version (but with an astonishing level of graphical finesse), plus DC owners will be able to download new levels and features from the *Rayman 2* Web site. Cool.

LEE SKITRELL

Is your sparkling new Dreamcast lacking the platform-related antics it deserves? *Rayman 2* could be the answer. More of a traditional 3D platformer than *Sonic Adventure*, it sees you take control of the limb-deficient wonder in a quest for freedom.

### WE RECKON

*Rayman 2* on N64 was a great game. This could be the game to break the spiral of shallow Dreamcast racers and fighters.

# RAYMAN'S IN YOUR POCKET

*Rayman* is heading for your Game Boy Color and he's looking hot. The game is a new adventure for *Rayman* where you rescue the imprisoned Toons and face off against the evil Mr. Dark. There are eight different 2D worlds, with secrets and surprises to find along the way.

**STATUS: 90% COMPLETE**

**STREET FIGHTER** is once again making the leap into 3D, and fans of the flat fighter have every right to hope this latest version will be a serious challenger to *Tekken 3*.

**SECOND TIME LUCKY**

The original *Street Fighter EX Plus* took Ryu and co into 3D back in 1996, but unfortunately failed to set the world on fire. The graphics weren't great, and the sluggish gameplay tried too hard to be like *Street Fighter Alpha*. The new version improves immeasurably - visually - with the characters being some of the finest ever rendered on a PlayStation.

**NEW GAMEPLAY**

Gameplay has been given a complete overhaul, too. The action is fast, and while the moves aren't identical to the 2D games, they share enough similarities to give hardened world fighters an instant edge. Background detail has been sacrificed to keep the game running smoothly, but a host of special effects will have your jaw hanging open.

**STUNNING EFFECTS**

Convincing lightning forks accompany your most powerful attacks, and the Excel mode is awesome to behold. A special key combo sees the screen fade out to black, and every hit you make counts as part of a super combo. Both fighters are motion-blurred to perfection as the cascade of punches and kicks rains in. It looks incredible.

**ALL ACTION BATTLES**

Playing the game is superb fun, though *Street Fighter* purists might like to note that strategy has been abandoned in favour of all-action battles. The array of characters is astonishing, with old favourites like Blanka making their 3D debuts beside ever-presenters like Ryu and Ken. There are 20 characters selectable from the off, with at least another four unlockable.

DEAN SCOTT

Ryu gets seriously busy in Excel mode. The screen goes all blurred as you smash in loads of hits, taking your opponent into Pain World.

All your fave street fighters still have the moves you know and love. Fireball anyone?

**WE RECKON**

It's not just *Street Fighter* veterans who'll love this. *Tekken*-ites looking for a fresh challenge will lap it up, too. The Japanese version is classy, and we hope the UK version is as good.

IF FILM director George Romero made a game it would be *Resident Evil*, everyone knows that. But, if mindless-blasting action-movie god John Woo made a game, *Fear Effect* would be it. It takes the tense atmosphere of *Resident Evil* and replaces the horror storyline with Hong Kong thugs and guns-blazing action that literally takes you to hell and back.

## HONG KONG PHOOEY

Rescuing the daughter of a Chinese Triad leader is never going to be easy. Your battle will take you from the back streets of Hong Kong through jungles and dense industrial regions, ending with a trip through a volcano to hell. The dark and moody

rendered backdrops have been livened up with streaming FMV to give the feel of living and breathing locations. For example, look down into the streets and you'll be able to see cars rushing by, unaware of the battle raging above.

## SPLIT PERSONALITY

As the game evolves, you take control of three mercenaries - using their combined force to take down the Triads, get out of hell and rescue a missing girl. Like *Resident Evil*, there's puzzle-solving to do, but *FE* puts a lot more emphasis on some wild action sequences. Within minutes you'll be running round, a gun in each hand, trying to catch Triad members using stealth tactics. The more sneaky you are, the less damage you'll take. Although, with the range of weapons and ammo at your disposal, you can play it like Rambo, if you want.

## SMOOTH FLOWING

The developer has worked hard to get rid of those annoying pauses in gameplay, like when you're changing weapons, targeting or changing an inventory. Now, when you're running, crouching, creeping around or walking you can draw

## We Reckon

*Res Evil* meets Anime - without the horror. The story, guns-blazing action and odd moment of stealth should provide the thrills, though.

## ORIENTAL EVIL

While *Resident Evil* has the survival horror market sewn up, Eldos is using out-and-out action, with a more earthy look, to create a story-led action adventure that relies more on creating an adrenaline rush than scaring the pants off you. *Carti wait*.

Cutting news nibbles

■ **Resident Evil 2** is definitely coming to the Game Boy Color. A revolutionary new graphics technology squeezes more colours on to the screen than thought possible, bringing the look of the game more in line with its PlayStation forebears.

■ I want to work for GVG? Then your luck might be in. We are looking for a games genius to join the team. You must be brilliant at all games, be able to write and have a friendly personality. If this is you, send an example review with your CV and a covering letter to Miss Howell. Mark the envelope "Give Me a Job". You must be over 16 and willing to move to London.

■ Meanwhile, another hit kick is getting the game transformation. PC and PS2 versions of horror-thriller phenomenon *The Blair Witch Project* are

underway. Gathering of Developers is using the power-hungry *Nocturne* engine, which should really come into its own on PS2. The PC version is slated for this summer.

■ Long-awaited arcade-style RPG action fest *Diablo 2* has slipped again. Expected back in Xmas 1998, it was then due for a turn-of-the-century release. Latest info suggests the simultaneous worldwide release is now likely to slip to May. Dammit.

NEVER WAS a computer game more aptly named. Work started on *Duke Nukem Forever's* original side-scrolling 3D incarnation back in 1997. One name change, a complete game overhaul and several years later, *Forever* is finally not as far away as it sounds. In fact, we're told Duke and his infamous strippers are likely to be with us by the end of the year. Bitchin'!

## BEST LOOKIN'

For Duke virgins, the wise-cracking hardman has already starred in a shed-load of games on different formats and has something of a cult following. But the PC sequel to cult hit *Duke Nukem 3D* – *Duke Nukem Forever* – is set to be Duke's best-looking outing to date – thanks to a souped-up *Unreal Tournament* engine. Feast your eyes on these new screenshots. They speak for themselves.

Action is set around Las Vegas, including the Hoover Dam

## WHAT'S NEW?

Information is scarce, but we know Duke's cyborg nemesis, Dr Proton, has taken over Area 51 to recruit an army of aliens. Best of all, *DNF* should be converted to next-gen consoles too. We heard aps ago that it would be on both DC and PS2 but we're still waiting for news.

FINALLY, a real-time strategy game for PC that's trying to do something a bit different. *Metal Fatigue* may look like standard stuff, but there's some tidy innovations and an interesting biblical-type storyline about three brothers who end up fighting for rival corporations in a race for alien technology and domination. There are three interconnecting simultaneous battlefields—ground, subterranean and low-orbit. Ever played 3D noughts and crosses? It may seem complicated at first but it adds new dimensions into a well-worn genre. There's plenty of cool units too, including Swords and axes. Alien scam. Don't you hate them?

*COLONY WARS* returns for a third instalment with *Red Sun* next month, pleasing PlayStation space cadets the universe over. For the uninitiated, it's a futuristic combat sim played out in space and on planet surfaces. The new game breaks tradition by letting the player choose his missions (of which there are over 50) instead of following a pre-set pattern. ### YOU CAN BREAK PARADISE

You start off in Eden, an idyllic land which is perfect in every way. The people who live there carry out everyday tasks while living their everyday lives. Then you come along and all hell breaks loose. The poor, innocent

folks must be converted to worship you, increasing your power to cast spells. Of course, how you use these spells will come back to haunt you later in the game. Developer, Lionhead, claims that the game will act as a personality test for the player and will alter to reflect your playing style.

### LOOKS FAMILIAR

Like all good magicians, you need to have a familiar. Pick a creature

that's quietly roaming the landscape and train it to become your agent (good or evil, depending on how you're playing). Train it in aspects of life and magic, then unleash it to carry out your work in the world - giant cows trashing villages or huge tortoises helping villagers build temples will no longer be rare sights. The artificial intelligence of these creatures is so advanced that we've heard stories of programmers coming to work to find their pet creatures carrying

## CASTING THE NET

Of course, just one deity trashing a world is no fun (well, not for long anyway). So, while you're busy setting up your people and raising your families, several opponents are doing the same thing - and you can bet they won't be pleased

when they find out you've been recruiting peasants. What happens? You guessed it - all-out war. With Net access you can take the battle online, using your home-grown familiar to trash an opponent.

## COMPLEX STUFF

To fully explain every aspect of *Black & White* would take every page of this issue, there's so much going on. While you're inflicting

your god-like powers on your new-found followers, there are social and educational issues to be tackled. As complex as the game gets, though, Lionhead is putting a lot of effort into making the control interface as easy to use as possible - thankfully. Even though it's not finished (and won't be until Lionhead feels it's perfect), *Black & White* is shaping up to be one of the biggest PC games of the new millennium.

SPIDERMAN IS coming to the PlayStation and N64, and if you're as damned excited about that as we are, we'll pause briefly so you can go and change your underpants.

### LOOK OUT, ITS...

The upcoming *Spiderman 3D* action game uses the same game engine as the legendary *Tony Hawk's Skateboarding*. This means that you can expect the graphics to look great and move swiftly as the web-slinger swings from building to building and shoots web fluid into people's eyes.

Spidey's sticky limbs mean big stealth fun

Q: How cool does this look? A: Extremely

### SPIN A THREAD

The player takes on the role of Spidey, and the skills that made his name in the Marvel comics are all in the game. Expect to scale buildings, tie people up in webs and feel your Spider-sense tingling whenever Spiderman is in danger. You can't pull Spiderman's legs off and burn him with a magnifying glass, but you will get suitably arachnid.

### SPIDER SENSE

Spiderman's nastiest enemies from the comic will be in there, too, like arch enemy Venom and long-time foe Dr Octopus and Carnage. Fellow superheroes are expected to appear in cameo roles too, so even if Spidey

isn't your fave Marvel character you'll enjoy it. The settings will be familiar to fans and range from the streets of Manhattan to a prison.

### BAD WEB DAY

The PlayStation screens certainly look impressive, but *Superman* on the N64 was one of the worst games we've seen. We've got high hopes that Neversoft will build on its reputation, do the game justice, and not cash-in with a hurried effort.

Videogames have come of age. Gone are the days when you'd have to hide your love of games for fear of being egged in the street. Now it's more than socially acceptable to get a few minutes round for a multiplayer session on your favourite games – it's a must. Our posse of players happily binned their Twitter mats to rate CVG's pick of party favourites.

Since appearing on the SNES, Mario Kart has become a classic. The first release of N64 was hugely popular. Will it still be a hit with our testers?

### PARTY PLAY

The first thing to strike our gamers was how plain the graphics looked compared to more recent racers. John-Paul

is a big fan of Mario Kart but agreed with Niaz that it's not much to look at really. Cam disagreed: "The simple graphics and style of the game make it easy to see what's going on."

### THEIR VERDICT

Everyone agreed you need a big TV to get the best from Mario Kart 64. Niaz preferred the cutish SNES version. A game everyone can enjoy, but not the most fun of the day.

Reader Rating: **3/5**

NIAZ: "The crap resolution and split-screen are aggravating"

CAM: "It's easily accessible". Particularly as a mega TV

Recently voted CVG Best Game of All Time, the king of first-person shooters is still a great reason to buy an N64. The four-player multiplayer is the most fun the console world has to offer.

### PARTY PLAY

Our gamers sniped each other with shrieks of delight, and

there were some comic moments as they were caught by surprise attacks. Everyone agreed that the sheer range of characters and the amount of arenas to play makes this a party favourite.

### THEIR VERDICT

After playing for a while, the testers' individual GoldenEye tactics soon became apparent, adding even more to the fun. A firm favourite.

PAUL: "Simply awesome!" And Xenia's not bad either

JOHN-PAUL: "Absolutely the best multiplayer game ever..."

## SOUL CALIBUR

FORMAT: **N64**  
PRICE: **£39.99**  
PLAYERS: **1-2**

Seen by many as the greatest fighter ever, Soul Calibur is the DC's answer to Tekken 3. Awesome graphics and spectacular fighters made this a big Xmas hit.

### PARTY PLAY

The graphics made everyone sit up and pay attention which makes the game a real spectator sport. The lovely lady characters also held our players' attention.

The eight-character Team Battle mode proved a laugh for winners-stays-on scraps.

### THEIR VERDICT

"All these super-hero fighters and none of them can swim," said Dean as he got knocked out of the ring and into the drink again. Cameron was impressed but the others all agreed that there weren't enough laughs to be had for it to be a great party game. Good for party bluffers though, according to Cam.

## VIRTUA STRIKER 2

FORMAT: **DC**  
PRICE: **£39.99**  
PLAYERS: **1-2**

The most awesome football game on Dreamcast and one of the best arcade-style footy games ever. But, could it be fun for everyone, or do you have to be a footie nut to enjoy?

### PARTY PLAY

After fiddling and faffing about with options and set-up screens for a few minutes it was time for kick-off. But, before we knew it, it was full-time and the score was

nil-nil, which didn't exactly bring the house down. Niaz chipped in that we should pay attention to the goal celebrations as they were "a bit good". The rest of the crew laughed out loud.

### THEIR VERDICT

"It's good after long-term play but probably too tough for a beginner," according to Niaz. John-Paul agreed that Virtua Striker 2 isn't a great party game although good in its own right. Best played with mates after a Sunday match. Probably

Reader Rating: **3/5**

PAUL: "The fuzzy graphics don't matter — it's the gameplay that counts"

JOHN-PAUL: "... but not the best game ever"

CAM: "You can look like a pro..."

CAM: "...even if you don't know what you're doing"

CAM: "I'm buying a Dreamcast now!" You and 650,000 others...

NIAZ: The goal celebrations were "a bit good". Or maybe not

## BLIND TEST

## BEATMANIA

FORMAT: PLAYSTATION  
PRICE: £39.99  
PLAYERS: 1-2

Rhythm-action like never before. Scratch and sample along to the backing track to keep your party going.

### PARTY PLAY

Choon of choice for our party animals was the recent *Moloko* hit - *Sing It Back* - and one of the easier levels doubled as a good tutorial to the world of *BeatMania*, which was handy.

John-Paul reckoned: "You have to know the controls inside out before you can even attempt the later levels."

### THEIR VERDICT

"I don't think UK gamers are ready for this sort of thing. Maybe in Japan but not here and not in my living room," said Cam. The others agreed and Paul chipped in with, "Yeah, it makes you look like a Muppet while you're playing." So not cool then...

## POINT BLANK 2

FORMAT: PLAYSTATION  
PRICE: £39.99  
PLAYERS: 1-2

Crazy arcade light-gun fun for two players. Complete a set of increasingly difficult shooting challenges against a mate.

### PARTY PLAY

After configuring their weapons, our gamers took to their feet for their challenges, only to be disappointed by the playtime on offer. Dier too

quick for Dean's tastes. The others all agreed that while fun, the individual challenges were all too brief. The right equipment is a must, too.

### THEIR VERDICT

The guys enjoyed *Point Blank 2* as a party game but felt there was something lacking for long-term play. "Great fun for quick goes at gatherings," said Cam. One that everyone can play.

## INTERNATIONAL TRACK AND FIELD 2

FORMAT: PLAYSTATION  
PRICE: £39.99  
PLAYERS: 1-4

The biggest and most fun button-basher of all time returns to take the skin off your knuckles. Fun in single-player but multiplayer is where it's at.

### PARTY PLAY

The controls are pretty simple for each of the different events on offer and usually require a

huge amount of joyed thrashing to succeed.

### THEIR VERDICT

Our crew was unanimous - *ITF2* is a superb mother of a party game. There's great competition to be had between four players and a lot of fun for the spectator, too. Tricky events like the hammer throw were hilarious coz of the sociable nature of the game.

Reader Rating: 5/5

## SUPER SMASH BROS

FORMAT: N64  
PRICE: £39.99  
PLAYERS: 1-4

An all-star Nintendo line-up face off in a free-for-all fight. See Donkey Kong make banana-paste out of Pikachu and set Mario against Link in a fight to the death.

### PARTY PLAY

*Super Smash Bros* instantly prompted cries of "What's going on?" as the characters

bounced and exploded around the screen. The action was fast and frantic from the start but our players complained that the screen was too busy.

### THEIR VERDICT

The players were ultimately left bewildered by *Smash Bros*. They liked the idea of smacking Nintendo favourites about but as Niaz said, "It's not sure what it wants to be and there are better party fighters out there."

Reader Rating: 2/5

PAUL: "It's not much better with the controller than with a pad"

UK gamers "aren't ready for this". We await the sales figures

PAUL: "You need the guns to get the most out of this"

CAM: "Just the same old same old"

CAM: "It's great because you're driven to beat each other's scores"

JOHN-PAUL: "This is bloody evil!"

This one should please the party girls. Get set...

NIAZ: "It's confusing and annoying – there's too much going on"

CAM: "There's too much Pikachu"

JOHN-PAUL: "It's not tactical and it's not cool"

PAUL: "It makes you look like a Muppet while you're playing"

DEAN: "Jeez, that was quick!"

The cries of "Right foot red!" were ignored as the testing began

## FINAL STANDINGS

Our contenders voted for their top three. Here are the results. First: *International Track And Field 2* (PS) Second: *Goldeneye* (N64) and Third: *Soul Calibur* (DC).

## TONGUES OUT FOR THE LAST DANCE

It was hardly surprising that *Goldeneye* was rated so highly as a party game, but when it came to the crunch, our party people actually preferred *International Track & Field 2*. What swung it for our guys was the way everyone can get involved in the competition – even spectators. The fact that it's a good crack just watching people play the game was another winning factor – catching your friends' faces turn seven shades of red as they viciously thrash away at the controls is quality fun. In second place came *Goldeneye*, proving that a virtual lycan-cled, bulging lunchbox has more party pulling power than James Bond. *Soul Calibur* came in a close third.

## THIS MONTH: Monkey magic!

You're very near the end of the biggest game you've ever played. You've nearly got all the Golden Bananas and all of the Kongs' powers are now yours. Time to tie up the final loose ends and kick King K.Rool's hairy crocodile butt.

Get it all here, including the secret 201st Golden Banana...

# DONKEY KONG 64: PART TWO

WORDS & SCREENSHOTS: ALEX C

**Y**ou've nearly done it! Most of the Golden Bananas have been bagged and the DK clan are well on their way to meeting the final boss, King K.Rool, the cackling crocodile. Read on to find out how to get all the remaining Bananas and bash the baddie back to the swamp.

AND THE FUN GOES ON...

## DK ISLES

As you open new levels, new Golden Bananas are there for the grabbing and they're all, of course, much harder to get than before.

## DONKEY KONG

Crystal Caves lobby. Use Strong Kong Barrel to get Bananas over lava. Kasplat in Hideout Helm lobby; Diddy Kong; Crystal Caves lobby. Jump into Jetharrel. Fly up to a ledge. Play Guitar on pad for Bananas. Challenge Barrel at top of Donkey Kong's island. Use Jetharrel

## TINY KONG

Angry Aztec; lobby. As Diddy, Chimpy Charge goes for Barrel. As Tiny, Postball Tired! to it. Gloomy Galleon lobby; Simian Slam blue switch as Chunky to open underfurther hole. As Tiny, go into Mini Monkey Barrel and swim through hole. Behind the Queen Simana Fairy's island is a Feather switch. Shoot it for Golden Bananas

## CHUNKY KONG

Turn Monkeygone on pad in Hideout Helm entrance hall to see vines. Swing across to Challenge Barrel on the left. Kasplat in Gloomy Galleon entrance hall with Blueprint. You can tell whose Blueprint it is holding by the colour of its hair

## ANGRY AZTEC

Last short visit to this world of angry sandstorms and ancient Egyptian architecture.

## CHUNKY KONG

In passage leading from entrance to first area, shoot Pineapple into Temple with five doors by shooting Pineapple switch. Follow path through to end for Kremling Kosh Challenge Barrel

## GLOOMY GALLEON

Hold your breath just a few more times to get the final Bananas in this wetworld level.

## DIDDY KONG

At right of the lighthouse area is a Kasplat with Diddy's Blueprint. Lanky Kong: Change to Esquarde then run the treasure chest near Mermaids home. Chunky Kong: Lighthouse area. Play Triangle on pad

## CREEPY CASTLE

Diddy's got just one more Golden Banana in here, but he's got to battle some Kremling ghouls to get it.

## DIDDY KONG

Find door on lowest part of level. Get to it by jumping down ledge on left when you see tree with Lanky coins. Past here and into door. Hit Peanut switch next to skull on first left and go in. Another Peanut switch, then into room. Chimpy Charge numbers and kill enemies

## FUNGI FOREST

One of the best parts of this game is that you can visit any level more than once. So, come again with new powers.

## DONKEY KONG

Slam switch behind rose house in water mill area. Go in. Simian Slam the box on the first-right, slam the switch. Across vines to Challenge Barrel. Diddy Kong: Night. To top of water mill, stomp switch, into door. Shoot 'Da' switch, charge green arrow. Play Guitar on pad near roses

## LANKY KONG

To top of giant mushroom. Stomp switch and into door below. Into room with coloured mushrooms. Simian Slam yellow first, then red, purple, green and blue mushrooms for Challenge Barrel. In autumn tree area, daytime. Find rabbit and race him. Use Orangstand Sprint

## CHUNKY KONG

Into passage to left of main entrance and into apple area. Jump into Chunky Barrel and Simian Slam tomatoes. Carry apple out and to the left. Use cannons to get to outside-top of giant mushroom. Stomp Chunky switch, into door. Shoot tiles to get Chunky face

## CRYSTAL CAVES Last level before big boss

The last level before battling the big baddie is a cold, gleaming world of ice – laid out before you in its entirety. Watch out for falling stalagmites and slippery floors in the caves.

### DONKEY KONG

Near the ice castle is a Kasplat holding Donkey Kong's Blueprint. Above Candy is a shack with Boogus pad; go in. Match the same squares by stamping tiles and turning the room. Do a couple of practice rounds before actually attempting it. Near Cranky is a Barrel Blast pad – press 'Z' and get to the end for a Banana

After Diddy has flown through the star above the igloo, play Boogus outside it and enter. Make it to the centre of the rotating room for Banana. Boss. Angry Armydillo again, not much harder. Dodge fireballs then chuck TNT Barrel when it chuckles

### DIDDY KONG

Use Bananaport pad 'Q' on top of the pillar near the igloo to get to the Tiny secret area. Kasplat here. Into shack near Candy with five instrument switches. Defeat all enemies then light the candles by flying up to them with your trusty Jetbarrel

Fly through star on top of igloo to make Music pads appear. Into igloo. Throw Barrels off number pads, one to six. Use Jetbarrel near ice castle to get to Challenge Barrel. Play Guitar on pad outside five-door building near Candy, go in. Defeat enemies in time – hard

### TINY KONG

Shack above Candy with five instrument switches. Play the Saxophone Slam on the pad and go in. Bomb the cruccs with oranges. Very easy, so enjoy it. Opposite Cranky is a Mini Monkey Barrel. Into small entrance and follow it through. Play Saxophone on pad outside the igloo and in

### LANKY KONG

Kasplat on a pillar above Funky. Use Bananaport pad 'S'. Into the wooden shack with the Trombone switch above Candy. Simian Slam switch on one side of the room then Orangstand Sprint to Golden Banana. Be quick about it, you only have three seconds. Play the Trombone on the igloo Music pad and in. Kill all enemies on the ground floor, then float up to a Challenge Barrel

### CHUNKY KONG

Play Triangle on Chunky pad outside shack near Candy and into door. Stomp red circles inside without any lights shining on you. Use invisible pad, into Challenge Barrel. On entering level, ahead of you is an ice-over wall. Primate Punch it, then enter. Use Monkeygone pad inside. A Golden Banana becomes visible

Stomp on the circle four times before the time runs out. Start jumping just before the red square is underneath you. Into small entrance opposite Funky. Stand on the Monkeyport pad to get in the small glass building next to igloo. Grab Banana. On the platform above Candy is Kasplat with the Tiny Blueprint

Stomp Lanky switch outside ice castle and go into new door that opens. Meet strangely cute but ugly character. Slam more tiles than your competitor does to win a prize. Use the switches on the side of the ice castle to float to the top and in. Win the race – it's easier than the last time you met this beetle

Play Triangle on music pad outside igloo and go in. Protect the bunny from enemies. Find large boulder on a walkway near the ice castle and lift it. Carry it up a nearby plank and place it on switch there. Now ice around a protected Banana near the igloo explodes. Kasplat on top of the igloo with Blueprint

**LAST TRIAL** Nearly time to battle K.Rool

This last passage to the final boss is against the clock, with the amount of time given depending on how many Blueprints you have got up till now.

It slopes as Lanky using Orangestand, then be Chunky and shoot the Pinapple switch. Door opens, in and on. Turn to Tiny, use Mini Monkey barrel and go through the pipe sticking out from the floor. In the main control room, as DK, pull lever to make stars appear. As Diddy, Jetbarrel through all these stars before the time runs out to open doors

As Chunky, Primate Punch grates in doorways. One has a Bongos pad in front. As Donkey Kong, play Bongos to get through. Into barrels inside for challenges. New pad appears when you win. As Chunky, play Triangle on pad to get through. Do two challenges to release music pad. As Tiny, play Saxophone on pad to get through glass barrier

Win challenges to release Lanky pad. As Lanky, play Trombone on music pad and in. Win two challenges to release Diddy pad. Jetbarrel up to Diddy's music pad and in. Win challenges to open King K.Rool door, go through and on to next room. Through a door that needs four Battle Crowns. Then one with a picture of two coins on it. This is the last door of Hideout Nelm

You need the Nintendo and Rareware coins to enter, go into door and grab the final key to Lummy's cage. If you've taken pictures of all the Fairies you'll be asked to go back and see the Queen Fairy. She'll give you 201st Banana. Now visit K.Lumy and put the last key in his cage. Watch cut scene. Into crashed spaceship that opposite the waterfall on DK Isle

**THE FINAL BATTLE** The battle is on...

Get ready for the best boss battle you ever took part in. It's here and it's in a boxing ring. Ladiesees and gendemen, it's showtime!

**DONKEY KONG**

You'll be in a boxing ring and it's Donkey Kong's turn first. Avoid shockwaves by climbing a turnbuckle. After three shockwaves Blast Barrels will be on the edge of the ring. Jump into one. With an in-barrel view of King K.Rool, press 'X' when his hands are in the air. Do this four times

**DIDDY KONG**

Jump into Jetbarrel and fly up to the lighting system. Quickly shoot targets on lamps so they land on King K.Rool. It's important to use the trigger to hover here. Shoot one target then fly to other side of light. Press trigger to hover then turn around to face next target.

**LANKY KONG**

Hit one of the switches on the side of the ring. Grab Barrel that appears. Throw it so a banana skin is in the ring. Stand on a Music pad and when King K.Rool is in line with you and the Banana skin, play Trombone Tremor to make him charge you and slip on the skin

**TINY KONG**

When it's Tiny Kong's turn in the ring, avoid Rool's shockwaves until a Mini Monkey Barrel appears. Jump in it. Run to hole in Rool's shoe. You'll end up inside his boot. Dodge his tees and when one turns up, hit it with the Feather Bow ('B') to tickle him

**CHUNKY KONG**

Simian Slam switch in middle of ring to make Monkeygone pads appear in each of the four corners. Press 'Z' on one of them to turn invisible. Jump into Hunky Chunky Barrel. You'll appear in corner of ring. Hit Rool with Primate Punch when he's close to you. Sorta!!!

**AND FINALLY...**

You've had times of frustration, times of discontent and periods of unadulterated joy and now it's all over. But wasn't it great?

# GAME BOY GAMES

<p><b>TETRIS</b> (GB/GBC) £19.99</p>	<p><b>WHAT IS IT?</b> The idea behind this game is so simple, even your grandma could play it. Arrange falling blocks to complete lines and score points. Dozens of versions of <i>Tetris</i> have appeared over the years but the ten-year-old Game Boy version is still the best.</p> <p><b>WHY SO SPECIAL?</b> <i>Tetris</i> is seen as the best puzzle</p>	<p>game around. It's mind-bogglingly addictive and the best thing is, you can pick it up and have a quick blast or go for an all-out session aiming to beat your personal best.</p> <p><b>PORTABLE PERFECTION?</b> <i>Tetris</i> truly is the ultimate portable game. Play it on the bus, in the bath, and, if you can get away with it, under your desk at school.</p>	<p>Just make sure you play it. Everyone should own this piece of gaming history.</p> <p><b>OVERALL</b> <i>Tetris</i> is a game that anyone can play and, thanks to the Game Boy, can be played anywhere. There's no excuse to have never played this essential title.</p> <p>★★★★★</p>
<p><b>TENNIS</b> (GB) £19.99</p>	<p><b>WHAT IS IT?</b> Another early Game Boy game that still feels as fresh today as it did on its release. Has a cool Tournament mode and you can link up with a friend to play an ace two-player game.</p> <p><b>WHY SO SPECIAL?</b> Don't let the simplistic graphics and limited sound deter you. Nor should you let the easy-to-get-into</p>	<p>action make you think this won't last. Game Boy <i>Tennis</i> has more depth than a Pacific trench. You'll play for hours, learning the special shots and then putting them into practice. All this and Mario's your umpire. What more could you want?</p> <p><b>PORTABLE PERFECTION?</b> Fun to play anywhere, but best with a friend and a link cable.</p>	<p>Relive your favourite Wimbledon moments and threaten your mates – game, set and match.</p> <p><b>OVERALL</b> The original and still the best tennis experience on the Game Boy. Worth a scream of "YOU CANNOT BE SERIOUS!", wherever you are.</p> <p>★★★★★</p>
<p><b>SUPER MARIO LAND</b> (GB) £19.99</p>	<p><b>WHAT IS IT?</b> Every new console needs some killer launch games. Among the Game Boy's was <i>Super Mario Land</i>. There are a vast number of Game Boy platform games available, but the ageing <i>Super Mario Land</i> still ranks as one of the machine's very best.</p> <p><b>WHY SO SPECIAL?</b> The successful Mario ingredients</p>	<p>are all here and some new treats have been added, like battling the Sphinxes at the end of each dungeon. The graphics and sound still impress and the classic Mario gameplay will keep you smiling.</p> <p><b>PORTABLE PERFECTION?</b> Best suited to longer journeys and playing at home, due to no save game feature. <i>Super Mario Land</i> will still keep</p>	<p>you happy for a quick play with multiple routes through the levels and hundreds of secrets to find.</p> <p><b>OVERALL</b> Platform fans and Mario maniacs will be in heaven with this. One of the best Mario games ever made AND you can play it on the toilet. <i>Supert</i>.</p> <p>★★★★★</p>
<p><b>POKEMON RED/BLUE</b> (GB) £24.99</p>	<p><b>WHAT IS IT?</b> In your quest to become leader of the Pokemon League you must capture the strange creatures who roam your world. You'll be up against some of the best Pokemon trainers, who are all out to catch the rarest creatures.</p> <p><b>WHY SO SPECIAL?</b> <i>Pokemon</i> offers a unique blend of adventuring, trading</p>		<p>and battling. There are 151 <i>Pokemon</i> to find and some are exclusive to the two different versions. You'll be bowled over by the involving and humorous gameplay.</p> <p><b>PORTABLE PERFECTION?</b> Trading the little babbies with your mates (via a link cable) is superb fun and by the time you</p>
<p><b>MARIO'S PICROSS</b> (GB) £19.99</p>	<p><b>WHAT IS IT?</b> You have 30 minutes to uncover a hidden picture in a grid. The idea is to use number clues on the grid, as well as a bit of mathematical logic, to solve the puzzle. If you get it right you uncover one segment of the image. However, get it wrong and you lose valuable minutes. It's fendish.</p>	<p><b>WHY SO SPECIAL?</b> The most striking thing about <i>Picross</i> is that it's so completely different from any other puzzlers you'll find on Game Boy – which may put some people off it at first. After the first few tutorial sessions though, you'll be tackling the tougher levels in no time. And, luckily, you can</p>	<p>save your progress as play through the game.</p> <p><b>PORTABLE PERFECTION?</b> For a quick blast, the early levels are perfect for trying to beat your own best times. You will find the later levels will test your mental powers and your ability to beat the puzzle in 30 minutes, which makes it absolutely ideal for longer sessions.</p>
<p><i>Pokemon</i> start to evolve and learn new tricks you'll be utterly hooked. The Adventure mode will keep you occupied for ages and you'll want to play it everywhere.</p> <p><b>OVERALL</b> <i>Pokemon</i> isn't just a game, it's an experience. Keep it in your bag wherever you go.</p> <p>★★★★★</p>	<p><b>OVERALL</b> <i>Mario's Picross</i> wasn't a huge hit when it was first released but it deserves another look. It has an expertly crafted learning curve to get you hooked and there are well over 100 puzzles to solve. Go and find yourself a copy and you'll be quite pleasantly surprised.</p> <p>★★★★★</p>		

If you're new to the world of Nintendo's Game Boy it may surprise you that there are hundreds of games available. Such a vast collection of titles can be a minefield - for every brilliant *Zelda* there are a dozen *Black Bass Lure Fishings*. There are some real gems out there, though, and we're here to help. We've played and hand-picked the very best of the best; games so special you'll weep tears of joy...

## GET YOUR HANDS ON THIS...

We've given all the games featured here an overall score, but we've also paid special attention to their portability factor - the very reason behind Game Boy's creation!

Essential; pure pleasure in the palm of your hand

The best way to pass the time on the bus

Fun but you can play a better game on a TV

You'll be ashamed to play this in public

Less fun than conkers

<p><b>METROID 2</b> (GB) £19.99</p>	<p><b>WHAT IS IT?</b> Before Lara there was Samus Aran: ultra-hard, futuristic lady space-hunter. Samus stars in the <i>Metroid</i> series of games which spans the history of Nintendo machines. <i>Metroid 2</i> leaves you stranded on a remote planet, with the task of eradicating all the <i>Metroid</i> creatures that have taken over.</p>	<p><b>WHY SO SPECIAL?</b> Many gamers won't remember the original <i>Metroid</i> on the NES, but those who do will know it was one of the best games available for the machine. The Game Boy sequel picks up where the original left off - which means lots more objects to collect, more secrets to uncover, puzzles galore and lots of <i>Metroid</i>-trumping action.</p>	<p><b>PORTABLE PERFECTION?</b> <i>Metroid 2</i> isn't an easy game - later sections will have you stumped. But it's worth carrying it around with you as the solution to a puzzle can suddenly come to you in a flash of inspiration and you'll have to play it there and then to see if it works.</p> <p><b>OVERALL</b> <i>Metroid 2</i> is a great game - it's</p>	<p>Just a shame that the series has all but been forgotten. Let's all hope that the recent appearance of Samus in the N64's <i>Smash Brothers</i> leads others to discover the joys of the <i>Metroid</i> games.</p>
<p><b>LEGEND OF ZELDA: LINK'S AWAKENING</b> (GB/GBC) £24.99</p>	<p><b>WHAT IS IT?</b> Everything you ever wanted from a <i>Zelda</i> game can be found in this Game Boy classic. Guide Link around a hugely detailed island, solving puzzles and smacking up baddies along the way.</p> <p><b>WHY SO SPECIAL?</b> What will astound you about Game Boy <i>Zelda</i> is the amount of detail in the levels and the</p>	<p>characters you meet. The <i>Zelda</i> magic is here in all its glory, despite being scaled down for a less powerful machine.</p> <p><b>PORTABLE PERFECTION?</b> The best thing about <i>Link's Awakening</i> is that you can adventure anywhere. You can enjoy a prolonged session at home and then continue while you're out and about, so you can</p>	<p>always get a regular fix of this superb game.</p> <p><b>OVERALL</b> A stunning game that'll keep you playing and playing. Then, when you've finished, you'll play it all over again. Along with <i>Tetris</i> and <i>Mario</i>, this is an absolute must-have title if you own a Game Boy.</p>	
<p><b>R-TYPE DX</b> (GBC only) £24.99</p>	<p><b>WHAT IS IT?</b> The classic arcade shoot-'em-up that re-wrote the rules comes to the Game Boy Color. Featuring the original game, its super-though sequel and a special DX version, this will keep blast fans happy.</p> <p><b>WHY SO SPECIAL?</b> <i>R-Type</i> games have a reputation for being about pure skill. Getting through the levels requires</p>	<p>lightning fast reflexes and a keen eye; one stray bullet and you're history. This challenge is recreated perfectly in <i>R-Type DX</i>, making it a highly rewarding experience.</p> <p><b>PORTABLE PERFECTION?</b> This is a pick-up-and-play gaming experience like never before. Be warned though, one 'quick go' can turn into a marathon session as</p>	<p>you try to beat a particular level or boss. It's seriously addictive stuff.</p> <p><b>OVERALL</b> Older players will revel in the nostalgia of two of history's best shooters on one cartridge. Newcomers'll wonder why they've never played these games before.</p>	
<p><b>SUPER MARIO BROTHERS DELUXE</b> (GBC only) £24.99</p>	<p><b>WHAT IS IT?</b> Everyone's favourite plumber returns to his glory days with this special edition. The original NES hit is here, along with the mega-challenging <i>Last Levels</i> Japanese sequel. It's mushroom-gobbling, fireball-firing, Peach-rescuing fun.</p> <p><b>WHY SO SPECIAL?</b> Mario is the platform game king and playing the game that started</p>	<p>it all is like a history lesson, only much more fun. This deluxe version also includes a fabulous two-player mode - a good game in its own right. To keep you playing there's a save feature and an option to replay any previously</p>	<p>completed levels.</p> <p><b>PORTABLE PERFECTION?</b> Mario is a real icon and his games are loved by all. The two adventures will keep you busy for months, with the option to play through levels again makes this great for</p>	<p>quick playing.</p> <p><b>OVERALL</b> Like <i>Super Mario All-Stars</i> on the SNES, <i>Super Mario Brothers Deluxe</i> highlights the universal appeal of the original <i>Mario</i> games and gives the player an unforgettable gaming experience.</p>
<p><b>MARIO GOLF</b> (GBC only) £24.99</p>	<p><b>WHAT IS IT?</b> Golf is made fun by Mario and chums in this super new release. In addition to the golfing gameplay, there are also RPG-style elements to keep you engrossed in the action. Begin as a budding young hopeful and gain skills by winning tournaments and challenging the people you meet in the clubhouse.</p>	<p><b>WHY SO SPECIAL?</b> Golfing games can be a strange bunch but this is up there with the best. The golf action is superb, letting you adjust your swing almost any way you like. Building up your golfing</p>	<p> prowess is hugely enjoyable and involving.</p> <p><b>PORTABLE PERFECTION?</b> This is one of the best new releases for your GBC and is wildly addictive. The two-player link-up mode is especially good fun, making this a good title to share with friends. Save your</p>	<p>game so you can continue playing at your leisure.</p> <p><b>OVERALL</b> <i>Mario Golf</i> is a big game. The RPG elements complement an already great golf game. Extra features, like the best shot replays, will blow you away. This is pure Nintendo quality.</p>

■ **Price:** £49.99

This tasty pad has been specifically designed for first-person shooters. Your left hand cradles the end with the D-pad, while your right can twist the other end around to look - as you would with a mouse. Use it during a game and it proves strangely intuitive, even to a seasoned mouse user. It really evens up the odds for players who aren't too clever with the mouse/keys combo, and only a slightly fussy D-Pad lets the side down. The buttons are located well, and give a nice response. We're into it.

■ **GOOD FOR:** People who have never heard of nice

## MICROSOFT EXPLORER INTELLIMOUSE

■ **Price:** £49.99

If you think a futuristic mouse could be the answer to your *Quake* blues, look no further than this bad boy. It's guided by red LEDs rather than a ball, meaning it doesn't need a mouse mat and it'll never clog up. It has four buttons and a mouse-wheel. In combat, it shapes up pretty well: the mouse movement is fast and precise, and the wheel makes weapon-switching a joy. The two extra buttons don't work that well, being located on the side of the unit. Its size means that people with big hands will be most comfortable with it, and it's the sexiest looking mouse you can buy.

■ **GOOD FOR:** Showing off at the Mouse Owners Club

■ **SCORE:** ★★

## GRAVIS XTERMINATOR DUAL CONTROL

■ **Price:** £49.99

Some gamers prefer to look and shoot with the mouse, and run and jump with a joystick. The Gravis Xterminator is moulded for the right hand, so if you're a left-handed mouser this product fits the bill. This joystick features dual control, meaning you get a proportional D-pad to manipulate with your left thumb to perform mouse operations as well as lots of handy buttons. It's easily configured, but a lack of precision when looking with the D-pad is likely to see you killed quickly. It's a well-built, responsive stick though, and if you can use it comfortably with a mouse you're unlikely to have any complaints.

■ **GOOD FOR:** People with a very precise left hand

■ **SCORE:** ★★★

**KENSINGTON ORBIT TRACKBALL**

■ Price: £19.99

A trackball is kind of like an upside-down unicycle: the half-exposed ball loo-err-missus stays still, making it ideal for people with 10 fingers. It isn't quite so ideal in the all-action first-person shooter, as the ball is difficult to move precisely as a mouse, and the buttons are small. This unfamiliarity in a shooter can be a pretty bad thing: split-second reactions often mean the difference between life and death. A good device, but not in the way you'd expect.

■ GOOD FOR: Handicapping an over-skilled player

■ SCORE: ★★

**MICROSOFT INTELLIMOUSE**

■ Price: £19.99

Microsoft's bog-standard IntelliMouse shines on this page. The reason? You're

probably already familiar with a mouse, and this one does all the easy stuff. The movement is swift and precise, and never found wanting under crossfire. The mousewheel is beautifully tactile, helping you switch weapons with confidence, despite flying flak. Downsides? It doesn't look as sexy as its big brother the Explorer IntelliMouse (see page 52).

■ GOOD FOR: Proving cheapest doesn't mean crappiest

■ SCORE: ★★★★★

**MAD CATZ PANTHER XL**

■ Price: £59.99

The Panther XL is the priciest device here, but it does combine a trackball and a joystick in one chunky unit. The joystick is moulded for the right hand, with the left falling naturally on to the ball. Trackballs aren't really the best aiming method for most people, and if you're using it with your "bad hand" it's double demerit. The stick is sturdy, with some nicely tactile rubber-coated buttons, and it's weighty enough not to shunt around the desktop, even if you really abuse it. Trackball-literate lefties will have an instant advantage, but the rest of us would need to practise for ages to feel totally in control.

■ GOOD FOR: Fans of the stick/ball

■ SCORE: ★★★

**Worms:** Problems with the PlayStation version?

## WORMS ARMAGEDDON

I'm having problems with the PlayStation version of this game on the 'Cool as Ice' and 'Do the Locomotion' sections. Can you get me through? **Simon Dille, Truro**

Okay, Simon, here's what you do. For the 'Cool...' section:

Go 1: Use the jetpack. Go over to the right-hand side of the landscape. Don't get the crates that are on the bridge above the enemy worm. Get all the crates on the right-hand side and land just to the right of the tree. Now aim a homing missile at the middle of the bridge and fire almost straight up with maximum power. If you're lucky, the enemy will now slide into the water due to the flames from the exploding crates.

If he doesn't fall in the water, go over to the bridge on your second go and attack him with your other weapons... this is harder, but remember that a draw counts as a victory.

As for '...Locomotion':

Go 1: Walk and jump (using backflip) to the trunk of the tree, and blowtorch under it.

Go 2: Backflip on to the tree, collect the crate (which contains a girder) and use the girder diagonally to build a bridge between the tree and the train.

Go 3: Go across the girder, and blow the mine up by walking near it then jumping away. You should be able to do this without losing your go. Now continue to the right, dropping down on to the back of the train. Use the bungee when you need to and you should be able to get the utility crate - you probably won't have

**Tomb Raider 4:** They'll be no stopping Lara with these cheats

enough time to use it though. Just get ready for the next go by climbing towards the health crate as far as possible. (It's possible to complete the mission on this go, if you're feeling dextrous.)  
Go 4: (Assuming you haven't finished yet). Do or die time. Use the jetpack, and you should just have enough time to get the crate on the far right, which will complete the mission.

Finish in the top three to receive a battery as a secondary weapon. It has unlimited shots and is very strong, but only seems to work on the Boss levels.

## ROLLERCOASTER TYCOON – ADDED ATTRACTIONS

**I'm enjoying this PC game but my park rating is going down! How can I increase my park value?**

**Jeremy Mills, Ipswich**

The park rating is just a simple composite of how the guests feel about the park. If it's raining, the park rating may experience a small dip (they can't go on rollercoasters in the rain). Also your park may be dirty, overcrowded or have long queues. Hire a handyman, build a new ride to siphon people away and out the lines down. Also, hire an entertainer or two to patrol your longer queues. Finally, overhaul your rides – paint them, add to them, advertise about them – whatever it takes to get people excited again. If your value drops for no apparent reason, the most likely cause is litter.

Park Value is an estimation of how valuable your park is. This isn't a simple sum of all your rides, but also includes how popular your park is and how old your

**Merry-Go-Round:** Getting frazzled? Want some more options? Read on...

rides are. So how do you increase your Park Value? First: replace the really old rides with new ones (even if it's the same ride). For example, bulldoze your Merry-Go-Round and build a new one. This isn't too expensive and will also allow you to charge more for that ride (novelty factor). Replace coasters only if you have already replaced all the rides and are still short. Keep on developing the park! Build scenery, shops and new rides. If you want to stay at the same value, you have to keep adding/replacing rides. An added weird bit: for you. Wanna see a coaster that runs, literally, backwards? Build a small Mini Steel rollercoaster and finish by having a steep drop, then another steep incline to go into the rear of the station. (so that it will 'tip' just before hitting the station). Then set the coaster to Reverse Incline Launch Shuttle Mode. Here's what should happen: The train will go backwards, drop down the hill, and come back up. But it won't be able to make it all the way up and will go back down. But now it thinks that it's in the station and will proceed backwards throughout the entire ride at station speed. Very strange.

## WU TANG: TASTE THE PAIN

New consoles aren't the only way to go, retro gaming can be top-value fun. We reveal all

£250

**EIGHT  
DIFFERENT  
GAMES  
MACHINES  
PLUS 98  
GAMES**

WORDS: DEAN SCOTT PICTURES: KENNY P

**F**ifty quid is a lot of dosh and naturally you'll be wanting to get the maximum gaming fun possible for your cash. One NES game would blow the lot, and a PlayStation or Dreamcast game would take

out a big bite. We challenged the CVG team to go out and get even better value for their money, by buying an older system complete with games for under half a ton. Resident games guru Paul Davies judged who'd got the best deal.

### BUYER:

**Name:** Dean Scott  
**Venue:** Car boot sale  
**Bought:** Amiga 1200 with 50-plus games, Atari 2600 with six games  
**Cost:** Haggled down to £50 for the pair

Car boot sales are a surprisingly good source of old gaming hardware. The beauty of it is that you're buying from ordinary people with less specialist knowledge than you, whose only reason for being there is to get shot of stuff they consider to be junk. For this reason it's usually easy to argue them down to a ridiculously low price,

before making off with your swag. You have to go pretty regularly to pick up the coolest stuff, and we've seen a Sega Saturn for 20 quid, a Sega Master System for three quid and Super NES games for a quid each. You just can't argue with that, but you're always taking a risk that the stuff will actually work.

### PAUL SAYS:

The Amiga was a great machine in its day and many of the games stand the test of time. The Atari is worth having as a slice of gaming history, even if it's not much fun to play anymore.

### BUYER:

**Name:** Dan Payne  
**Source:** Specialist games shop  
**Bought:** Sega Saturn with one game  
**Cost:** £55

Specialist games shops have their advantages and disadvantages. On the plus side, all the second-hand hardware they sell is tested and guaranteed. You can also phone them before you set off to make sure they've got what you're after, and they'll stock games for the older systems long after the high street shops stop. On the minus side, you'll probably pay more

than you would with a private sale. The Saturn is the newest machine featured, and its value has plummeted to bargain levels after it lost the battle with PlayStation.

There are still some great games out there on the system though, and the gaming connoisseur will definitely want to check out *NIGHTS*, *Sega Rally*, *Fighters Megamix* and *Panzer Dragoon Saga*.

### PAUL SAYS:

Buying this means getting only one game for your money. If you're going to buy games for the system afterwards it's a good deal. If not, don't bother.

### BUYER:

**Name:** Les Ellis  
**Source:** Off a mate  
**Bought:** Super Nintendo with ten games  
**Cost:** £50 and a pint of beer

If you can't trust a friend, who can you trust? They've probably got some old gaming hardware gathering dust in the loft and you might as well make them an offer they can't refuse. They're bound to let you try it out first, and you'll know who to come looking for if it blows up after a week. The price is likely to be cheap too, as you call in all the

favours owed to you while waving a fistful of tenners under their nose. There are some classic titles out there, so look out for *Super Mario World*, *Super Metroid*, *Street Fighter 2*, *Legend of Zelda* and *Super Tennis*. And, thanks to his mate's unnaturally good gaming taste, Les begged the lot (or ripped his mate off, more like).

### PAUL SAYS:

The SNES was one of the most awesome games machines ever, and thanks to Nintendo's fantastic games, they're still ace fun to play today. You should own one.

## BUYER:

**Name:** Peter Walker  
**Source:** Market stall  
**Bought:** Sega Mega CD and one game, Sega Game Gear with one game.

**Cost:** £45 for the pair  
 If you've got a market near you, you should definitely be keeping it out for games content. As well as stocking cheap games for old formats, markets can also be a good source for secondhand PlayStation and N64 games, often selling them cheaper than specialist, high street stores. Some traders will let you try the stuff out

and some do offer a guarantee. A few of them are out to rip you off, so be careful. Peter's Game Gear handheld is a good buy at £20, but it goes through batteries at a fearsome rate. You should try and get some games when you buy it - you'll struggle to track them down afterwards. The Megadrive add-on Mega CD is one of the biggest gaming flops of modern times, and even at £25 Pete should have known better. Muppet.

## PAUL SAYS:

The Game Gear is a good purchase, but a Mega CD? Why?

SEGA MEGA CD

## BUYER:

**Name:** Lee Skittrell  
**Source:** Newspaper ad  
**Bought:** Japanese Megadrive with nine games, Commodore 64 with around 20 games  
**Cost:** £55 the lot

A Japanese Megadrive is a hardcore choice at £45, but the advantages over its UK cousin are impossible to ignore if you're looking for a one-off purchase. The games run faster, and you'll probably find one going cheap since Japanese games are very difficult to come by now. Rather than coming in under budget, Lee indulged himself with

the machine of his youth - the Commodore 64. It was very big in the 1980s, but the games are only good for nostalgia. Don't get it confused with the Nintendo 64 - the Commodore is about 100 times less powerful and takes an age to load its games from tapes.

## PAUL SAYS:

The Japanese Megadrive is a real find, and a good choice for the hardcore gamer. The Commodore 64 is forgivable, because we were all really into them when we were younger. The C64 used to rock big time.

COMMODORE 64

## THE WINNER IS... LES!

Paul's final reckoning: "The Amiga is a relatively powerful machine with a lot of games chucked in, but the nod has to go to Les and his SNES. Nintendo makes fabulous games which don't really get any worse with age: sure the graphics might look a little ropy, but dig a little deeper and you'll get more gaming fun for your cash here than many full-price new console games can ever offer. As a one-off purchase, a SNES and a haul of top games is a great buy. Bear in mind though, that modern games play much better than most of the old stuff, so don't trade in your Dreamcast for an older machine. Buy them both."

Oh lordy. You really couldn't hope for more gaming fun than this for fifty notes. *Zelda*, *Mario*, bliss.

You need to put both control pads into the console and hold down the START button as it powers up. At the main menu press L1, R1, R2, L1, SELECT and START. You'll now have menu options for Campaign Two and Three and you'll be able to get all other cheat modes. Get extra stuff by pressing down the buttons on the second joypad. Additional Structures = R1; Additional Items = R2; All Items = X; God Mode = TRIANGLE; Infinite Power = O; Complete Research = DOWN; Level Skip = SELECT; Super Unit Strength = UP; Weak Unit Strength = RIGHT.

The aim of *Q3A* – kill everyone – is so simple you'd think mastering it'd be easy. Wrong. Blunder straight at enemies with your guns ablaze and you'll be toast quicker than you can say. "Challenger spaceshuttle." Time to skill up...

# MAKE ME KING OF THE CASTLE IN QUAKE 3 ARENA

Wanna be a *Quake 3* nightmare? All that's stopping you is a bristling wall of guns. Our guide'll show you how to blast your way through

WORDS: PETER WALKER SKILLS: DAN PAYNE  
THANKS: THE PLAYING FIELDS

**A**ny fool can master I Can Win in *Quake 3 Arena* but only a gaming god leaves Xaero on zero in Nightmare setting or never dies in online deathmatches. With fast hand-eye co-ordination and a little brains, picking up the basics is a cinch – even for novices – but really killer tips only come with buckets of experience. Our masterclass will show newcomers how to make the leap from cannon fodder to frag fiend with the minimum of pain and might; even teach old *Quake* dogs a few new tricks. Because *Q3A* is essentially one long deathmatch both in single and multiplayer, there's no walkthrough on how to win. You'll need to master certain basic skills just to stay alive, so we've included some in this Masterclass. But to really shine, you'll simply have to learn the advanced skills and tactics to frag faster than your opponents. So that's what most of this guide's about. Happy fragging.

## QUAKE 3 ARENA

### BEFORE BATTLE

Sounds stupidly obvious, but it's amazing how many Quake players have ridiculously uncomfortable and moronic key and mouse setups that leave them aching. It ain't rocket science. Get it right from the start and you won't suffer the pain of having to learn it all over again when you realise the error of your ways.

**KEYS TO SUCCESS.** Closely hunched keys really can save vital nanoseconds and tired hands. We recommend these for minimal key-hand movement: Up/Down/Left/Right Arrows = Forwards/Backwards/Strafe Left/Right; Right Alt = Jump; Right Shift = Next Weapon; Num Pad 0 = Crouch; Num Pad 1 = Walk

**RIGHTIOUS RODENT.** Ditch your mousemat and whack mouse sensitivity up to as much as you can stand – pretty near max is cool. Keep Fire on Mouse 1 and put Zoom on Mouse 2. If you have a Mouse 3, then make that your Use button. If not, choose End key. Forget the other controls. Keep autoswitch weapons on

**ALL SYSTEMS GO.** A good key set-up is useless if your system is running *BSA* like a dog. Drop to minimum resolution and cut fancy stuff like brass ejection if needs be, and ensure your modem setting is correct – wishful thinking (like pretending your 28K modem is ISDN) won't help. If your PC is stone-aged then you're stuffed

### CRUISE CONTROL

In Quake 3 you need to walk the walk before you can cruise the mean arenas with confidence. Strafing is essential for ducking in and out of cover to take potshots, cornering and for keeping targets in sight in scraps in open arenas. But, you'll also need to learn to move while watching your back.

**UNBEATEN RETREATIN'.** Sometimes it's better to run away and fight another day. Trouble is, you're blind from behind. Time to head for the exit while running backwards. You'll need to know the level, but this lets you dodge attackers till you reach cover. Try ambushing them if they follow – blast 'em full in the face with the Shotgun

**CAUTIOUS CIRCLING.** Entering rooms and going straight to power-ups/weapons often leaves you open to attack on your blind side. Strafing in and circling with your back to walls lets you check for ambushes, like here. Head for objects in safe corners by running backwards/strafing while watching exits and vantage points

**LET'S BANCE.** Master the 180-degree moving turn. One dot flick of the mouse as you're running forward and you're almost-faced. The trick is to instantly switch to running backward so you keep moving in the original direction. If your back is safe, 180 again and run forward. Repeat regularly. Could have helped this guy stay alive...

### DEAD MEN DON'T JUMP

You'll jump a lot for various reasons, so lick it quick. On the flat, jumping and running are the same speed for all character models. Some gaps, like between the pillars you cross to get Q3DM18's red armour, are so small you just run across. To save time, you can double-jump over some moving platforms at their central point.

**JUMP START.** Use Jump to get to some power-ups and around arenas quicker – over low walls, down stairs and across huge, lethal drops into space or red fog. You must learn to judge distances and take some leaps of faith, but you'll soon discover which are shortcuts and which are sheer madness

**JUMPIN' JACK FRAG.** Jumping can make you a tougher target and reduce the chances of suffering splash damage from some types of weapons. Don't just jump forward – back and strafe jumps are hard for enemies to follow at close quarters. Combine with a 180 to turn the tables on a rear attacker and wrack up an impressive frag

**JUMPED UP.** Don't get too carried away. Jump too much and rivals will always know you're near from your character-specific grunts (in Major skin's case, this sounds like 'Where!') – good players can identify weak ones before seeing them. Also, frag kings will quickly spot which way you've jumped and fire ahead of where you land

## WEAPON WISE

You'll only ever be dead meat in the Arena Eternal if you don't learn your weapons like the back of your hand – and pronto. Rate of fire, speed of delivery, amount of direct and splash damage must all become instinctive if you're to make the right attacking move in a split-second while under pressure. So practise, practise.

**SPLASHED TO PIECES.** Missiles from the Plasma Gun, Rocket and Grenade Launchers, and BFG-10K all kick out secondary – splash – damage where they hit. Use this against enemies that are hard to aim. Aim for the ground by their feet or walls next to them. Just don't fire too close up or you'll feel the pain, too. This guy's crap.

**REALITY BITES.** The BFG, though devastating, appears in only a few arenas and is usually harder to get with limited ammo. Bide your time; you're accurate with the Rail Gun in arenas like The Bouncy Map, rockets still rule in G2A. Most levels have 'em and much fragging goes down at their spawning points. Head there – but cautiously.

**AMMO-TIONALLY DISTURBED.** Make the most of ammo pick-ups. Don't bother blagging it till you can fire it – picking up a weapon for the first time gives you a set amount of ammo, no matter how much you picked up before. Grab all ammo for the weapon that you know is your enemy's favourite. Go for that Rocket Launcher first, girls

## CIRCUIT TRAINING

You must know every level intricately so wherever you spawn you can head for power-ups, health and weapons or get ahead of and surprise fleeing enemies. Most items you can pick up are pretty easily accessible to all, and most levels are quite tight so they're fairly easy to learn.

**SHORTCUTS AND SECRETS.** The only way to really know levels, layouts and hotspots is practise. Find good shortcuts – drop off bridges or down holes to see where you land or watch where other players are going. So far, we know of just one secret in a wall opposite the entry teleporter by the Shotgun on G3DM11

**KNOWLEDGE IS POWER.** Once you know where all the cool gear is, it's time for some rough circuits. In G2A it's better to keep moving, but instead of randomly running around, work out a route that'll take you past all key spawning points. Vary it constantly – you mustn't be predictable. Crafty shortcut, fatty. Do not...

**ROUTE CHANGE.** Work the level hotspots and ways to avoid them into your rough routes, as well as sniping opportunities, so you can fight if you're toiled-up and run if you're not. Obviously, don't stick religiously to your routes, particularly if you're desperate for health, ammo, a good weapon or spot an easy frag

## HEALTH IS WEALTH

Sometimes a single health point is all that's between you and a frag or being fragged. In a head-to-head, the player with higher health will always have an advantage. So never pass up chances to restore health or go over the standard maximum by picking up green healths and Mega Healths.

**FEEL GOOD.** The heat of battle is a bitch. You know you're low on health but it's so easy to be drawn into a head-to-head. Don't do it unless you're confident that you're a superior player. Duck out and health-up – it'll save you being fragged and having to find weapons all over again. Preferably choose an escape route to a gold health

**FIGHTING FIT.** A fair number of your head-to-head encounters will take place in or near rooms packed with health. As you duke it out you'll lose health, so without breaking off, stride towards the health while fighting. It's tough to remember mid-battle, but it could give you the edge. This guy's should remember that in this firefight

**MEDIKIT IT.** Use the diamond portable Medikit. It's a seriously cool but rare piece of kit which restores you to max health when used, no matter how wounded you are. Just don't use it unless you really have to in a firefight – if you're down on health but not in a scrap, look for some normal health instead and save the Medikit for later

# MASTERCLASS

## ARMOUR-GEDDON

Like health, you'll always stand a better chance in a firefight if you've got some sort of armour, so never pass it up. You max out at 200 but it slowly counts down to 100. Even if you're at 199, it's always worth picking up any armour you find, even the red Body Armour. See the Masterclass section on Domination.

**SHARD AS NAILS.** Scattered through many levels you'll find armour shards which, individually, don't do much for your overall armour status, so are often ignored. But they usually come in clusters which collectively give you a worthwhile boost, so don't pass them up – unless you're really under pressure in the middle of a firefight.

**ARMOUR AIN'T EVERYTHING.** Armour doesn't protect you from all damage so don't expect to live long in a scrap with just a few health pickups, even if you've just snagged the treasured Body Armour. In a tussle up between bagging a decent weapon and good armour nearby, like here, it's usually worth taking the weapon first.

**TOP TIMING.** There's under a half-minute wait for armour to respawn and, as with the Mega Health, you should have a mental clock ticking away reminding you to arrive back at the spawning point just as the goods do, too. Watching armour spawn just as you arrive is well satisfying. Also, check out the Circuit Training section

# QUAKE 3 ARENA

## POWER MAD

Some power-ups are new to the official Quake world, like **Flight**, which sadly only appears in multiplayer. When you've got a power-up you have the edge (providing you're armed and healthy) so head for hotspots. Smart rivals may hide if you have Quads. As with all pick-ups, dropping onto them from above may cut risk of attack.

**TASTY HASTE.** Haste not only makes you faster and a harder target but also boosts your rate of fire, so make sure you've got plenty of ammo. Good if you're out-gunned, like this clown. Unsurprisingly, it's damn hard to spot anyone using invisibility, so it's great for sneaky attacks and getting to other power-ups in unsafe areas.

**REGENERATION.** Unless you see someone pick up Mega Health, you rarely know if you're fighting an enemy with superior health. But with **Regeneration**, as with most (though not all) power-ups, you'll see a tall-tale coloured shell flashing around the user's body – that could mean he has the edge unless you can surprise him.

**LETHAL COMBINATION.** **God's** totally deadly when combined with the **Battle Suit**, which protects from iron, slime and splash damage. But **direct hits** still inflict pain in a **Battle Suit**, though it's useful for rocket-jumping and getting hazardous pick-ups, like the treacherous **BFG** ammo in the **dead-end** rooms of **Q3DM15's** love pool.

## GLOBAL DOMINATION

Once you know where the top gear is and some killer circuits – dominate. Despite speedy weapon respawning rates, it's still possible to do this in **Q3A**. Domination means constantly grabbing all pick-ups, whether you need them or not, just to deny rivals the chance to use them. Do it right and it'll frustrate them like hell.

**MAKE 'EM SWEAT.** Grabbing all armour and health makes sense for your own survival but also ensures enemies are always at a disadvantage in a firefight. So grab red armour/Mega Health even if you already have 199 points. Self-inflict splash damage so you can tag all the standard health, too. Not during a firefight though. Duh.

**FRAG ME.** Weapons respawn within seconds so you can't grab them all, but you can block rivals by getting there first – particularly if they've just respawned. A lot of levels are pretty open and you'll see them respawn – they're poorly armed so hunt them down mercilessly, unless you're already at death's door yourself.

**RESURRECTION DOMINATION.** If you landed a few good shots on your rival before you die and respawn nearby, you may well be able to frag him in a weakened state before he gets to health. Or, if you're fragged long-distance, you may be able to recover the weapons you dropped. Knowing the levels and shortcuts is essential.

## VISUAL CLUES

Keep a cool head and use visual and sound information effectively. If you don't keep a close eye on your on-screen stats like health and ammo, especially in the heat of battle, then you'll never know when to run and when to attack. Brighter skins are often easier to see from a distance, so choose yours wisely.

**WHO'S HOT.** The player name feature isn't just a good laugh for identifying your mates from strangers online. You'll quickly sort the gods from the cannon fodder – weak players mean easy frags so you should seek them out. This is *Quake*, so no mercy. It's not nice, it might not even be cricket, but who cares if you win the match?

**CLUED-UP.** Pick-ups, particularly weapons, missing from spawning points tell you an enemy has recently passed through. Some visual clues can save you pointlessly risking trips to unsafe locations. Like here in *Q3DM7*, where if the armour by the lava is missing, then chances are the Mega Health in the room behind is too.

**INCOMING INFO.** Sometimes you'll find yourself under fire from a hidden attacker. Tracing a Rail Gun shot back to the attacker is easy, but with the Machine Gun or Shotgun you must check nearby walls or pillars for shots that missed. Turn your back to the bullet marks and you'll work out the general direction the attack's coming from

## SOUND CLUES

As with visual clues, there's loads of useful aural info, too. Hear a rocket nearby but can't see anyone? Check quickly behind you – it could be coming your way. In *Q3A*, aural tactics are more essential than ever, particularly on levels like *Q3DM10* where the power tube's a dead giveaway of where you are.

**TARGET ACQUIRED.** Jumping and running through certain pick-ups like armour shards are like yelling, "I'm over here, come and get me". If there are two locations with different numbers of shards or green health on a level, trick enemies who use aural info by only grabbing the same number of pick-ups as the other location

**NOISE NUISANCE.** Combined sounds make zeroing-in on targets even easier. If a bounce pad's by armour, then you'll hear the distinctive sounds of both items being used moments apart. Also, if possible, use noisy items like doors and irresistible pick-ups like Haste to warn of danger behind if you're camping. Didn't work here, mind

**TIPPE TIP.** Some surfaces, like the metal floors in this shot, are very noisy when players run across them. In *Q3A* you'll really need to use the Walk control if you're to sneak up on enemies, making for a much more tactical game in some levels. Also, listen for the whoosh of power-ups respawning – essential if you're to dominate

## TELEPORT-TASTIC

Only a fool ignores the full potential of teleporters. They're not a cheap gimmick. The portable teleporter is reason enough to ensure you've got the Use control to a handy key. Sure, it's handy for ducking out of a tough firefight but it's also the only way to avoid death if you fall off a level into space or the red fog.

**GATE CARTER.** Gates let you view destinations before entering. Use this feature to check it's safe but also scope arrival rooms for useful items like Quak – like here in *Q3DM11*. Saves goals to the room itself. With two-way teleporters, beware of campers lurking behind – and firing through – your arrival teleporter. Evil blighters

**TELE-SHORTCUT.** Some levels have weapons or power-ups in dead-end or tricky spots to escape from. So teleport out instead. Check out level *Q3DM14*, where the BIG's over Red Fog. Use the shortcut by the portable teleporter above to get it, but instead of double-jumping across the moving platform to exit, teleport out

**GETTIN' TELETRICKY.** Sometimes an over-confident enemy is glued so close to your arm he may follow you anywhere, even into a void. Make sure you've got teleport to save yourself. Red Fog drops are shallow so teleport quick. Try using it if a rival's way ahead and one frag from victory, cos he'll lose a frag, delaying the end of the match

# QUAKE 3 ARENA

## AIR CONTROL FREAK

Get to grips with air control and looking around mid-air. Bounce and acceleration pads always land you on the same, dangerously predictable, spots. Movement controls alter direction – more radically so during longer flights. Good to get to camping spots and avoiding up-bounce pads below tunnels you want to get down.

**BACKING UP.** Some levels, particularly space ones, have acceleration ramps on either side of a gap. Stepping backwards – not too much – just before arriving can make you land on the return ramp and instantly fly back again. Great for escaping dangerous destinations or surprising dumb pursuers like this guy here

**BOUNCE TROUNCE.** Bounce pads make lethal traps. Dive on to a vertical bounce pad mid-firefight and pursuers will often follow. Steer backwards as you fly up and you'll land back on the bounce pad while the hunter lands in the default zone. Then you arrive behind and the hunter then becomes the hunted...

**SITTING DUCKS.** In some space levels you can air-control your way round the arena without touching the ground via bounce pads. But skilled Rail Gunners turn acceleration and bounce pads into turkey shoots. Even with good air control you're vulnerable. Pop a few off mid-air to put attackers off or time jumps so they're not looking

## ROCKET AND BFG JUMPING

Most of the time, rocket-jumping is useful just as a shortcut to higher levels. Deliberately self-inflicting damage may seem daft but, if it takes you to an area with health and a cool power-up, then you've lost more than a bit of armour but, gained time, and a power-up. It's a skill you must learn, so bite the bullet.

**PAIN GAIN.** Look straight down, move in any direction and hit fire and jump together. You'll fly in whatever direction you were moving. Top, you can even strafe rocket-jump. Hitting jump fractionally before fire means less damage but also less height. Useful for jumping to lower levels. As always in Q3A, fast reactions are crucial

**DEMON KEEPER.** This is the one level we've spotted so far where rocket-jumping is the only way to contain pick-ups. Above the lava field, you'll need to rocket-jump to a bounce pad that throws you through the BFG and on to red armour. Or try rocket-jumping off the bounce pad under the BFG for extra height to bag the weapon

**BFG-JUMP.** For even greater height, and damage to yourself, practise the same skill with the BFG. Advisable to get the Battle Suit first if possible. This skill opens up new shortcuts throughout levels and a few camping spots besides. If you're really cocky, rocket or BFG-jump over enemies during firefights and frag 'em mid-air

## PREDICT ABILITY

Knowing your enemy is half the battle. Play with complete strangers for just a few minutes and you'll soon spot their playing styles and preferences. Some are more aggressive, foolish, or always head for the rockets after respawning. Use this information against them but, remember, they'll be doing the same too.

**ANTICIPATION.** Predicting which way an enemy's about to go mid-scrap lets you pump delayed-impact missiles ahead of them. Do this by studying their combat style for habits like circle-strafing, jumping or always heading for health. On the flip side, you mustn't be predictable either – even down to varying routes across rooms

**WEAKNESS.** Some players simply can't resist their favourite weapon, so when you frag them, head straight for the weapon spawning point (lagging any health you can along the way) and lurk a bit till they show up. Chances are it'll be one of their first parts of call and they'll still only have crap gear. Advantage, you

**LURK OR JUDGEMENT?** Don't just use the Grenade Launcher to bounce missiles round corners. Find a vantage point over a hotspot and fire a few rounds, even if it looks empty. In a full game in a tight arena, chances are someone will turn up by the time they explode, causing good blanket damage. Check out the above three screens

## CAMPING QUEEN

Perfect camping spots with no blind side dangers are fairly scarce. Q3A's camping spots are tailor-made, so experiment. Look for edges halfway up walls. Lots of wall-top spots are blocked. Height is good for view but often exposed, though enemies below need direct hits because they can't splash-damage you at that angle.

**LONG-RANGE SNIPING.** You've found a high, shadowy spot with killer views. Zoom in and switch to an instant-hit weapon like the Rail Gun. If you're having problems keeping on target, move your sights ahead of where you expect your victim to run and wait till they run into your line of fire. This clown's trying for plasma splash instead

**ZOOM MOVEMENT.** Zoom's good for camping and improving accuracy. If you lose sight of a target you may want to move while zoomed – that's dangerous because you must go a fair distance to notice much on-screen change. Beware voids. Also, concentrate too hard in zoom and you might take a while to notice a rear attacker

**SNEAKY AMBUSH.** If you're camping, don't give the game away with rushed shots. Hold fire till you're certain of a frag. Also, camping doesn't always mean long-range attacks like this one. Try waiting directly next to doorways and surprise enemies as they go through with a full-frontal blast with the Shotgun. One hit can devastate

## FIREFIGHTING FRENZY

If you've mastered the skills above, your frag rate should be now by very respectable indeed. But, knowing when to retreat and when to fight on is a crucial judgement call. Fighting to the death when you've ten health and know the enemy's taken no hits simply boosts his frag rate while ducking out at 80 health won't help yours.

**CORNER = COFFIN.** Never back yourself into a corner in a head-to-head – splash damage off walls is much more likely and you'll find yourself pinned and unable to move as rockets pour into you. But it's a good tactic to use yourself – angle your rockets to blast enemies against the scenery rather than away from it

**WEAPONS EXPER-TASE.** Sometimes jumping, strafing, ducking and predicting enemy moves isn't enough. Trick them into thinking they've got you outgunned. Start firing with a weak weapon and if they dive in close for the kill, switch to rockets. Just don't wait too long to switch and then spend ages cycling to the right weapon

**IN YOUR FACE.** Plaster other players' firefights with safe long-range attacks while they're busy with each other. But if you're in the middle of the action and it's just too hot, backwards retreat for a better view and accurate shots. When diving into existing firefights, attack the enemy who's taking the most damage so you bag the frag

## TIPS, TRICKS AND TRAPS

Don't be afraid to innovate – that's how rocket-jumping was accidentally discovered. It's another thing the single-player botmatch is particularly good for – learning the levels, trying out new skills, tactics and tricks before you start trying a large online. Different skills work better with different levels and enemies.

**PSYCHO WARFARE.** Don't underestimate your power to demoralise the enemy. Bag several frags on the trot and even skilled players can start to lose their nerve and get panicked into stupid moves in head-to-heads. Enemies who dominate the Quad can be especially demoralising. You'll just have to taunt them as 'Quad queens'

**SPECTRE.** The first and last thing to learn about Q3A is that you've never learnt it all. That's why Q3A has a Spectate mode seen in third-person and through rivals' eyes – so you can look, listen and learn how quality players use Ferraris playing Quake. Use it one and one day too you might be advising ID Software on all things Quake

**FINAL FRAG.** By the time you've worked your way up to the Final Arena, you should be rocket-jumping off jump pads mid-air to get to the roof of the crusher platform for some ruthless scrapping. Be easily steering yourself to safety when the trap springs shut before you land on the BIG. Time to dominate the world

**STILL NOT IMPRESSED**

I've read **Computer and Video Games** since the merry days of the old rubber-keyed **Spectrum**, and although computer technology has advanced considerably since then, I'm still not impressed. I own a 475MHz PC with a good 3D card and the expensive, ugly chunk of plastic still slows down to a crawl on some of the newest games, just because five or six buddies are on the screen at the same time. This never happened in **Skooldaze** on the **Speccy** (and that was only a 48k machine). I'm hoping that **PlayStation2** really will be slicker and faster than a well-oiled cheat in the rain.  
**Paul Milne, Middlesbrough**  
P.S. I like the look of the **PS2**, it looks a lot more hi-tech than the grey, plastic-looking **Dreamcast**.

**DESPERATE**

I'm desperate for a **Dreamcast**. In fact I must be because I want to win for my boyfriend Gary. Anything to

stop him going on about one! I'll do anything, please pick one of the following:

Ride **Oblivion** at **Alton Towers** while eating and drinking (I'm scared of rollercoasters).

Wear shorts and a bikini top and rollerskate down any busy high street (it's cold at this time of year).

Be an air hostess for a short journey (I don't like flying).

Drive a **Reliant Robin** (totally embarrassing).

Clean the office and toilets at **Computer and Video Games** wearing a sexy pinny and rubber gloves.

You decide, I'm desperate!

**NO MORE TAT**

Since you seem to like getting tat from people, I have sent you: a **Simpsons** picture, free Internet trials, an early Christmas card, a joke book, a small **Beano** from 1992, a brown colouring pencil, some home-made pogs (remember them?), two **Game Boy Camera** **Pokémon** pictures, a picture of a new **VW Beetle**, a penny and some other tat. I hope you like everything.  
**Ewan McLaughlin**  
P.S. I've rented a **Dreamcast** and it's mint.

Thanks for thinking of us, but we reckon it's about time you lot stopped sending us your old tat. We'd much rather get something like your best jokes. Send them, instead. Please.

Not a bad effort, but that compo's well and truly closed. Sorry.

**LAS VEGAS**

I've found the ancient cove of arcades! The problem is it's in **Las Vegas**. I stumbled across an arcade and thought I'd pop in; every machine in the universe was there (well almost). I went into the retro section and found many historical finds, with the mother of all retro machines - a sit-down **Space Invaders**. So I thought I'd take a picture. It's time to spend those air miles and get going to **Las Vegas**.

**Martin Campbell, Glasgow**

**GAMEGEAR**

I enjoyed your recent article which compared the **Game Boy Color** to the new **NeoGeo Pocket**. They're both fine products, but surely they're no improvement on the old **Sega Gamegear**? The world obviously wasn't ready for a colour hand-held back then (four or five years ago?), or maybe it was just the horrible name which put people off. Either way, **Sega** was clearly ahead of its time with the product. Of course, it's now tainted with oldness so relaunching it would be futile. But those of us aren't caught up in hype (I'm 39, so it's easy for me) can swap off to a second-hand shop and pick up one of those little beauties with a few games for about £20, while you impressionable youngsters have to shell out £80 just for a machine. It's OK being old!

## POKEMON ART

I hope you like the painting I've sent in of *Pokémon*. I think the cartoon is great and now that it's shown on ITV a lot of merchandise has started to appear. I really like your magazine because it covers all games on PlayStation, PC, NG4 and now Dreamcast. Bye for now.  
Jack Moss, Cheshire

moronic games that no one has ever heard of?

**Seth Jones, Birmingham**  
Don't blame us, it's you lot that voted. We were a little surprised but when all was said and done, *Goldeneye* was your number one. The CVG staff voted for a lot of old games because they were the ones that shook our world. They may have been technically bettered (*Elite* on the BBC B looks crappy by today's standards) but to us they were brilliant moments in gaming history and the ones that instantly brought back a smile. That might be showing our age, but it's true.

## X-BOX

There's all this fuss over PlayStation 2 and Dreamcast but what I want to know is whether there's any more news on Microsoft's X-Box? This, to me, sounds like it would be the hands-down winner, because if anyone has the power, money and technology to produce the ultimate games console, it has to be Microsoft.  
**James Daniels, Wrexham**

If you work on the theory that no news is good news, then X-Box should be the best thing ever. Microsoft isn't releasing any details, yet.

## WORLD DOMINATION

As we all know, *Pokémon* is taking over the world: everyone is buying the game. I am saving up for a Game Boy but don't know if I should get a normal one or if I should save that bit more and get the Color version. Is there a difference between the Red and Blue games? And which one do you think is the best?  
**Stefan Jones, Wrexham**

**P.S. I think CVG is ace.** I hope you like the Pikachu model I've sent.

Get yourself a Game Boy Color if you can, and either the Red or Blue version of *Pokémon*. Each game has unique monsters, so if you want to complete the game you'll eventually have to buy both or,

better: still, trade with other trainers to catch 'em all. And yes, your model and drawing are cool. Thanks.

## GOT 'EM ALL

Hello, it's me again, the guy who won your Xevius arcade machine way back in the 80s. Remember? Anyway, I'm even more into Computer and Video Games now, and yes, I'm lots older and am now a console collector. At present I have: a PS,

NG4, Atari Jag, Atari ST520, Amiga A500, Amiga 1200, Binatone system, Grandstand Mk1, Grandstand Mk2, NES (x2), Super

NES, Amstrad CPC 464, Amstrad 612B, Sega Master System Mk1, Sega Master System Mk2, Sega Mega CD, Sega Megadrive Mk1, Sega 32X, Atari Lynx, Spectrum ZX81 (with rubber keys), Spectrum ZX +2, Commodore 64 (x4), Nintendo original Game Boy, Atari 64K 800, Acetronic MPY2000 (more a rocking-horse crap). To go with this lot is a new Dreamcast and I also have, at the last count, over 3,500 games.

**Question is, when will someone from CVG contact me? It's so lonely here on Planet Retro.**  
**Roi Lewis, Lancashire**  
Hold on in there Plon! you're not alone. There are lots of others living on Planet Retro, although there can't be that many people with such a vast collection.

## REVISION TIME

Your magazine and the material in it are ruining my chances of a happy and successful life. I sit here, thumbs aching after just guiding Leon through another tiring error-filled part of *Resident Evil 2*. I am a 15-year-old schoolboy half-way through his mocks. I have done little revision thanks to my demonic PlayStation. Even in my exams I find myself thinking about multi-player tactics on *Half-Life* over how long Jihad's garden is. Anyway, keep up the good work. Or maybe, don't. I'm not sure.  
**Sanjay Brown, Nottinghamshire**

## RECAST

Last week I rented a Dreamcast with *Sonic Adventure*, *Speed Devils*, *Ready 2 Rumble Boxing* and two controls for just £22! a week [Wow! I hear you cry]. The controls were comfortable and, well, let's put it this way, I had about nine hours sleep over the weekend. When I returned it, I saw *Zelda* was on loan, so being a quick-thinking man, I picked it up and dashed to the counter. When I got round to playing it I noticed it was incredibly hard to control. The moral of the story is: if you play a Dreamcast, you won't think much of the NG4 controls anymore.

## WHAT'S IMPORTANT

The *Computer and Video Games Five-Star Award* is your guarantee of a great game. When you see the logo, it's like having an informed best mate recommend you a game personally. It's something you can always trust.

**HONEST** Regardless of hype, reputation or advertising surrounding a game, if it's great we'll say so and if it's poor, we'll tell you the truth.

**FAIR** We're not biased. A good game is a good game regardless of format or who has made it.

**THOROUGH** We play games longer and harder than anyone else. And we don't rate games on half-finished versions, either. We'd rather wait and give you the full, accurate story.

**KNOWLEDGE** Computer and Video Games is 17 years old. We were the world's first games mag - which means we've played more games than any other mag. Our writers are all experts, have years of experience and know what makes a cracking game.

Any game that earns the Five-Star Award is truly exceptional. It'll do more than just look good and play well, it will rank with the most enjoyable and rewarding games in existence.

# GRAN TURISMO 2

The world's favourite racer does a lap of honour

**T**he most eagerly awaited racer in gaming history is finally on sale in the UK. Seven million copies of *Gran Turismo* were sold worldwide and now the scene has been set for the sequel to be a global smash.

However, it has been widely publicised that some US versions of *GT2* have a slight bug where the game says you've completed just 98.2 per cent of the game, when in fact you've finished it all. Sony has assured us that this problem has been rectified for the PAL release, meaning UK gamers won't be experiencing any associated road rage.

*GT2* is such a huge game that it comes on two discs. Each disc can be loaded separately and is almost a game in its own right. Disc one is the Arcade mode, which lets you drive some tasty cars from the off. You can race series against friends on the computer and unlocking all the licences in GT mode gives you more tracks to thrash around on. Disc two houses the GT mode, where you take licence tests and then buy yourself a car. Winning races gives you money to tune up your car or even splash out on a new one. The ultimate aim is to be victorious in the massive number of championships on offer.

**INSTANT PLAYER GUIDE** TURN OVER  
TO FIND OUT

## FACTS AND FIGURES

Gran Turismo 2 is the biggest racing game the PlayStation has ever seen. You've probably heard the numbers, but let's run through them again: there are nearly 600 basic car models to drive and many of them can be tuned up. Winning races and events unlocks special models, taking the final tally to over 1,000, with over 20 tracks in total.

Unfortunately, the big sports car-makers like Ferrari, Lamborghini and Porsche wouldn't allow their cars to be included in GT2. Thankfully, Lotus allowed the use of its Elise

The balance of manufacturers still favours Japan, but European and American companies are well represented. How much more English can you get than the Mini?

Even in the absence of the Italian speed demons, there are plenty of rapid motors to excite you. A series of Le Mans-style GT cars are hidden away, giving an awesome sensation of speed

## BRAINS POWER-UP

On paper, the biggest improvement in GT2 is that the game is so much bigger. More subtle improvements include the artificial intelligence of the computer cars. No longer do they follow the racing line in an orderly convoy, preferring to jostle each other realistically for top spot, making for a better solo game because you've got to be clever to win.

Rival cars will block you mercilessly this time around, so make sure you've got the speed right before attempting a pass. Clattering into the back of them won't help you out

See how the red Fiat Coupe has tucked in behind the Audi TT, slipstreaming on the straight. Sitting behind another car means you're not battling wind resistance, so you can go faster

Each car is trying to beat the rest, and they'll try some pretty daring overtaking moves. Sometimes you're best to hold back and dodge through the resulting carnage

# INSTANT PLAYER GUIDE INSTANT PLAYER GUIDE INSTANT PLAYER GUIDE

## STARTER MOTOR

GT2 doesn't give you much wonga for your first car but you'll want something quick enough to win races to boost your funds. Go cheap first off, but powerful enough to catch up if you spin out in the race.

Head for East City and check out Toyota's secondhand stuff. You'll find the '81 Supra Twin Turbo II - looks like a shed and goes like stink. Its basic 272hp will kill the competition in the Sunday Cups

OK, you've done the damage in the Sunday Cup and you want to move on to bigger things. Don't blow your cash on a new motor; a few choice upgrades will send your Supra soaring into the big league

New sports tyres will help grip and sports suspension will give you better handling. For a power boost you should fit a stage one turbo and a sports muffler. But don't neglect handling for raw horsepower

## SPOT THE DIFFERENCE

Ardent *Gran Turismo* players will power-up the sequel and get a bit of a shock. The in-game graphics appear identical to the first game. We did a side-by-side test on a track common to both versions – the High Speed Ring – and were very surprised at the results. Can you tell which is which?

**GRAN TURISMO** The graphics were amazing when *GT* came out three years ago and even then we thought that the game was pushing the PlayStation to the absolute limit

**GRAN TURISMO 2** The track detail is identical, but before you scream, "Rip-off!" it's worth knowing that the rival cars behave much more realistically

## COURSES FOR CONCERN

Another reason why *Gran Turismo 2* is the finest racer ever is the superb selection of courses. Alongside traditional race circuits like the High Speed Bowl and Laguna Seca, you get to tear up city streets Ridge Racetrack on the Seattle course and tour a picturesque Alpine village at Grindivald.

The Seattle Short Course. Its twisty bends and long hill-climbs are reminiscent of *Ridge Racer 4*

Apricot Hill Speedway is built for speed. With no nasty corners, bury that throttle and go for it

The Rome Circuit features architecture like the Coliseum, though it's not really based on Rome

If you want blue skies and palm trees, then head for Tahiti. It's the first course you race on in *GT2*

# INSTANT PLAYER GUIDE INSTANT PLAYER GUIDE INSTANT PLAYER GUIDE

## DRIVING BASICS

If you're patient and really want to know the ins and outs of this game, then persevere with the icons. They teach you how to drive a car like a professional racing driver. Remember, the key is smoothness

The trick with cornering is to try to straighten the corner as much as possible. With this in mind you should be entering in wide, braking as you turn in.

The next step is to steer towards the inside of the bend – the apex. This gives you the straightest possible line through the corner, meaning you can take it faster

Get back on the juice as you exit and with luck you'll leave your less technical opponent trailing in your exhaust fumes. If you hear tyres screeching then you're losing traction and therefore speed

## LICENSED NOT TO THRILL

Some players felt the biggest plus point of the original game was the inclusion of the licence tests, which you needed to pass to enter higher levels of racing. Whereas the original had three licences made up of eight tests each, *GT2* has six licences to pass, with a massive 60 tests in total. The tests are easier this time round.

The tests teach you vital driving skills that will stand you in good stead for later racing, although they can get boring and frustrating.

At the International C class licence, things are starting to hot up. You have to navigate tricky corners quickly, without leaving the track.

When you've the sixth and final set of S licences, you're asked to complete flawless laps of the trickiest courses against the clock.

## REAL COMPETITION

While the computer cars test your motoring skills, the ultimate race in *GT2* comes when you go against a mate. Two-up mode on the Arcade disc means just that – two players only, so no computer cars. There's no four-player mode, either split-screen or linked-up, but how often have you sat round with three friends to play a serious race?

For maximum thrills, you've got to play in first-person view. The game engine keeps a good speed-up even in two-player mode and there's no risk like giving a mate a good hiding.

If you choose to play the game in a third-person view, you're missing out. Sure, it's a little easier, but wouldn't you rather play in-car and retain the respect of your friends?

The game's famous replay mode doesn't look as good in two-player mode as it does in single-player. The letter-boxed view cuts down on the visual impact of the flashy camera work.

## WHICH DRIVE IS FOR YOU?

Front-wheel drive, rear-wheel drive, four-wheel drive. What the heck is the difference and which should you choose? Read on...

A front-drive car like the Fiat Coupé is forgiving on the beginner. They turn in sharply while braking, but then try to drift towards the outside of the corner (called understeer). You really need to master the apex cornering technique to get the best times in these.

Rear-drive cars like the BMW 320i are trickier to get the best out of, but perform better in expert hands. They accelerate quicker, but oversteer in corners as the back end swings round. Steer against this swing to prevent spinning out.

4WD cars like the Subaru Impreza are stable and pretty well essential for safely negotiating rally courses. They're balanced and neutral through corners, and grip amazingly with their four-wheel traction. They corner like they're on rails, in fact. Nice.

## RALLY ROUNDS

The major addition to *GT2* over the first game – and the gamers are looking forward to most – is the Rally mode. Comparisons will immediately be made to Colin McRae, but the games are very different. *GT2*'s game is more reminiscent of the Sega Rally series than Codemasters' classic. It's a cracking addition and once you've mastered the varied handling of rally cars you'll love it.

The first-person view. Remind you of a certain rally game by Sega? Nice wide tracks, twitchy cars, big powerslides. Tasty

The seriously swift Swift Lancia Delta Integrale flies the flag for the old school rally brigade. Looks fantastic and handles superbly

The Green Forest Roadway circuit offers slightly more grip on its gravel surface and some neat covered sections to motor through

The World Rally Championship-winning Lancer Evo 5 is one of the most desirable cars in the game, on the track or on the mud. It's a beast

## WHAT WE THOUGHT

### PROCEED WITH CAUTION

*GT2* is a brilliant game. It thoroughly deserves five stars when judged on its own merits, but we've some reservations about recommending it to people who own the first game. The graphics are identical and the gameplay is tweaked rather than reinvented. The original *Turismo* was a winning formula, but you might feel slightly short-changed. The Rally mode is great, but if you're looking for the best digital rallying experience, Colin McRae still holds the crown.

### BIG AND CLEVER

If you're a petrol head, the level of detail here will astound and delight you. If you're looking for a game you can sink into for months, *GT2* is a winner. Splitting the GT and Arcade modes was a masterstroke.

effectively giving you two games in one, and the all-new Rally mode is a fantastic freebie. The enormously improved computer artificial intelligence adds shine to an already near-perfect package.

### REAL PHYSICS

*Gran Turismo* was renowned for its car physics and *GT2* doesn't mess with the formula. It's still not possible to roll any of the cars – even in Rally mode – giving your crashes less impact, but car handling is commendably distinct from model to model. Proper car geeks will get a rush from the enhanced tuning options, like being able to set limited slip differential and aesthetic touches like being able to fit alloys.

### CHEQUERED FLAG

*Gran Turismo 2* offers more depth and detail than any other driving game, but don't expect to love it

unless you're into driving games. The GT mode is as daunting a single-player journey as any role-player and equally rewarding. It's a shame that you can't buy any of the non-Japanese cars second-hand in this mode, but knowing that you've got to buy that awesome Lotus Elise brand new gives you another incentive to keep your wincing races.

## RALLY MASTER

Braking in rally cars isn't just about lowering speed, it's also a vital tool for car positioning. Hit the brakes and steer hard on mud and the car swings round for some mad oversteer. Drift the car round corners in this way

When entering into a corner, dab the brakes repeatedly to send the car into a powerslide. Adjust your direction while sliding, and reapply the power to regain traction inside the corner

When you've passed the apex of the corner, straighten the car out. It'll continue to drift sideways if your speed is right and you accelerate out in a straight line – hopefully without clipping walls

Exiting a corner facing sideways means you have to make a quick steering adjustment to get yourself facing the right way, losing precious time and speed. You might even spin out

# GUILTY GEAR

It's 2D fighting but you can't be Ryu

WORDS: DEAN SCOTT SCREENSHOTS: STUDIO 3

## WHAT YOU NEED TO KNOW

Capcom keeps turning out cool *Marvel* and *Street Fighter* games and now *Guilty Gear* is hoping to bring 2D fighting games back into fashion. The combat system is similar to the Capcom games, meaning lots of manic action, over-the-top special moves and massive combos to destroy your opponent with.

## BEAUTIFUL BUT ANONYMOUS

The characters are well designed, but their unfamiliarity is a problem. Half the fun of *Marvel vs Capcom*, for example, is being able to punch Ryu's head in as Spiderman. You don't instinctively want to be, or beat up, any of the *Guilty Gear* cast. When you clear this hurdle, you'll find the fighting system easy to pick up and quickly rewarding.

## INSTANT DEATH

Speaking of quick rewards, *Guilty Gear* breaks new ground by giving each character a Destroy move. This kills your opponent outright and will even end a fight in round one. It's perfect for that hardcore moment against a newcomer. This might enrage beat 'em-up veterans, but it adds an edge to the game.

## WORTH PLAYING?

It's a good game, and fight fans who can see beyond *Tekken 3* should definitely try it out. It's a solid 2D ruck that looks good and plays well, but falls short of the enduring quality of the *Street Fighter Alpha* series. It's a shame there aren't a few more characters - you start with ten and can unlock three bosses to use in the versus mode - but you'll grow to like them all.

# EHRGEIZ

It's *Final Fantasy* –  
and a whole lot more

The stunning opening sequence sets the scene for the carnage that follows

## WHAT YOU NEED TO KNOW

Look at your PlayStation games collection. Betcha got a version of *Tekken* in there, right? And *Final Fantasy VII*? Imagine the two games mixed together – hardcore fighting in an RRG and your favourite adventure characters knocking each other out in a 3D fighter. Excited? Thought you might be.

## CROSSOVER CORNER

*Ehrgeiz* is essentially two games in one with a story that combines them. Fifty years ago, a mysterious weapon was found in the ruins of a Gemin castle. The weapon was named Ehrgeiz and was presented to the winner of a tournament that decided the world's greatest fighter. Now the Ehrgeiz is thought to hold the secrets of immortality and the key to unravelling the mystery of an ancient site in the Middle East. You can either play in the tournament for the Ehrgeiz or as a pair of archaeologists exploring the excavation site in a full-scale RPG. There's also a selection of mini-games themed around the story.

## FIGHT NIGHT

Tournament mode features ten great characters to fight with, including Cloud, Tifa and Sephiroth from *Final Fantasy VII*. The action takes place in multi-level arenas similar to *Power Stone*; the trick is to use the ring to your advantage. Characters are well animated and the special moves are awesome.

## AND IN THE MIDDLE-EAST...

The Ehrgeiz Quest mode starts with two archaeologists, Koji Masuda and Clair Andrews, investigating a mystical site in the Middle East, but it's not long before they're sucked into a parallel dimension of strange villages, mutant creatures and deadly dungeons. The action is a mess of talking to people, finding

Shuwen gets caught up in Yoko's yoyo special

Your quest starts in this eerie village – be sure to explore properly

Bottom-bashing fun in the Battle Beach mini-game

The inclusion of *Final Fantasy VII* favourites is a great idea

Use the ledges to trick your opponents into an attack or for launching projectiles

clues to solve puzzles and fighting the hordes in various dungeons.

## WORTH PLAYING?

*Ehrgeiz* is a quality package and the sheer size of what's on offer will blow you away. The Tournament mode offers great fighting action

Cloud wrestles with the brutal Godhand but with that sword, how can he lose?

with ace characters, while the Quest mode will keep you occupied for ages. The mini-games are also fun, especially in two-player mode. Highly recommended.

# SPACE DEBRIS

Gut-rumbling arcade action invades your living room

**"A testament to the true powers of PlayStation"**

You have to shoot this boss in the crown jewels to beat him

The packing crates from hell are after you

#### WHAT YOU NEED TO KNOW

Space Debris starts off looking like a straightforward 3D space shoot 'em up and swiftly turns into something much more challenging and much more bonkers. The bombastic cut scenes reveal a tale of everyday intergalactic warfare but the gameplay itself is well on the twisted side of crazy. Basically, playing *Space Debris* is like taking control of your own blockbuster space movie. Only you don't have to deal with the inflated egos and paychecky of Hollywood stars.

#### SPACE ODDITY

The basic controls are simple enough and shouldn't take even total dead-heads long to master. On the opening level you have to battle your way across a constantly scrolling screen, dodging huge chunks of space junk and blasting the incessant waves of enemy craft with a variety of missiles, smart bombs and regular shooters. By the time you reach the second level you realise that this game has much more to offer than just a huge 3D space battleground. Now

you find yourself patrolling a small research station and attempting to destroy a heavily armoured robot before it bashes the roof in.

#### BATTLESTAR GIGANTICA

Everything about *Space Debris* is big and bold. The colours are bright, the explosions are huge and the ships and aliens are monstrous. It pretends to be simple and old-fashioned, but in reality, it's a testament to the true powers of the aging PlayStation. Years ago you would have to spend a fortune in a dirty arcade to experience such power. Now it all fits in that little grey box. That's progress. Play we've had to wait til just before its replacement arrives.

#### WORTH PLAYING?

Even if you usually hate scrolling arcade-style games you can't help but love *Space Debris*. It's a dazzlingly colourful adventure with larger-than-life baddies that will have you laughing yourself stupid. Many games attempt to bring the arcade into the living room but *Space Debris* actually succeeds. It's big, and it's very, very clever.

# BEAT Re-e-wind. This goes out to all the DJs MANIA

WORDS & SCREENSHOTS: SCRATCHMASTER SCOTT

Six months ago if you tried to plug some record decks into your PlayStation you would've probably been put in a mental home. You'd get electric shocks to the nipples while a fat orderly shouted "JOYPAD!" in your ear. Times have changed. *Beat Mania's* got its own deck-style controller, and if you want to get seriously jiggy with the coolest PlayStation game this year, you'd better splash out.

***"Big up the massive! We is spreadin' the love!"***

## BEATCOMBOS

At its heart, *Beat Mania* is a rhythm-action game, pure and simple. A series of bars on the screen tell you which notes you should be playing as you jam along with some classic dance records. Each tune is given a difficulty rating, and the tougher ones require insane co-ordination and rhythm. If you've performed well, you'll progress to the next song. If not, you'll be booted off stage.

This is how Moleko's house classic Sing It Back looks in *Beat Mania* notation. It's simple and familiarity with the tune'll sail you through

Things are starting to heat up. Notice how you're having to play two notes at once, so make sure you're used to your button set-up

This mass of notes will make a tune if you've got the supernatural skills to make it happen. Even *Mazat Mania* couldn't be tougher

## DJSOUNDCLASH

*Beat Mania* offers up a few play options but they're all pretty similar. The best of the bunch is a two-player battle mode, where you share responsibility for knocking out the tune with a mate. It's like a proper DJ soundclash, and if you come out the winner, you get to cuss your mate's skills and diss up his club.

If you hope to win the two-player mode often, you'll need to master the art of throwing your hand down so it makes that slapping noise

Try the hidden game, where you're told what notes to play, but not when to play them. You really need to know the tunes inside out

This is the tune select screen. It's dull, but not as dull as another shot of *Beat Mania* in-game. The graphics are very basic

## DJS TAKE CONTROL

*Beat Mania* gives you a couple of control options. You can play it with a joystick, but you might need to spend time finding a button config, as the default settings are a nightmare. Budding DJs will go at it with the bundled deck controller. Not only does it look cool, it's easier to relate to the jumble of scrolling bars on the screens. You're friends will love it, too.

This funky fellow pops up in the training mode. But, he'll only give you the basics, which won't help when the BPM count starts to rise

The *Beat Mania* deck. It looks exactly like the on-screen display, and you get your own 'Wheel of Steel' to scratch with. Except it's plastic

After finishing a tune, a graph shows how you did. Finishing in the red means the club loved it while in the green means find a new job

## WHAT WE THOUGHT

### COOL AS FECK

There's never been a game as cool as *Beat Mania*. We don't mean that as a comment on its quality - good as it is - just that a DJ simulator is as far removed from the traditional view of games being slightly geeky as you can get. This works in

its favour; and it will undoubtedly

succeed on this merit.

### BACK TO BASICS

The game itself isn't a classic - the gameplay is almost identical from level to level. It's great fun to play as it lets you build up tunes in a quicker and more competitive way than *Musica 2000*, and you really have to work on your skills to

progress. Ultimately though, it's a simple idea dressed up in some very cool music.

### COMING DOWN

If all the tunes had been well-known, it would have helped the long-term replay value. As it is, you don't feel the same desire to mix unfamiliar tunes. If you're into clubbing check it out, but, like the music it simulates, *Beat Mania* isn't for everyone.

# SOUTH PARK RALLY

WORDS & SCREENSHOTS LEE BRITTON

## WHAT YOU NEED TO KNOW

On my god! It's a South Park game that does something that is different. Race your favourite characters around the streets of South Park. Play in head-to-head mode against a mate, in Arcade mode for a quick challenge, or unlock a whole heap of extra South Park characters in the Championship mode. Weapons include Chef's chocolate salty balls and the world-famous Mexican stinging frog. Sweet.

## BEEFCAKE!

The best thing about *South Park Rally* is that it's not simply a Mario Kart clone. Sure, it borrows a great deal from *Mario Kart 64* – right down to the power-up cubes laying

about the tracks, but the main difference between the games is that each level of *South Park Rally's* Championship mode offers the player something different. The first stage is just a simple race over four checkpoints but the game soon sees you capturing a trophy and defending it in a cool Capture The Flag-style race. Later, you'll be collecting and depositing runaway chickens in the Read-a-Book Day competition, and even defending the world against the evils of Satan on millennium eve.

## BIG GAY AL

The graphics in *South Park Rally* aren't anything to get excited about. The racers look OK, but the tracks are ugly. That said, they do capture the feel of South Park. The sound is superb with instantly recognisable samples and taunts as you pass your opponents. The unlockable courses in Arcade mode don't always have an obvious route and this can lead to missing checkpoints and ultimately losing the race. The two-player mode is a lot of fun and

Not quite the cynical cash-in you expected

you can choose to include computer controlled racers too.

## SUNDAY DRIVING

The key to unlocking courses and characters is the Championship mode. Each course is themed around a South Park public holiday and includes 14 different tracks. Only three of these courses offer traditional racing, while the others all feature variations on the Capture The Flag game. This break from tradition might ultimately put some players off. The difficulty level is high throughout and the awkward nature of some of the challenges may prove too much for even die-hard South Park fans.

## WORTH PLAYING?

If you can't stand South Park, then there's not a lot here for you. Fans, on the other hand, are sure to enjoy it. It's not an easy game, and unlocking all the extras to play in head-to-head mode is no mean feat, but persevere. *South Park Rally* attempts to do something different with the cartoon racer genre and is worth checking out for that fact alone. But, ironically, many will be put off because it's not a standard racer.

The two-player mode is excellent fun

Superhero Jim returns in an udderly bonkers adventure

**WHAT YOU NEED TO KNOW**

Damn those flying cows! Earthworm Jim has been splattered by one and lost his marbles. Your task is to venture deep into the twisted realms of Jim's psyche and piece together the missing bits of his brain in this 3D platformer.

**WHOA! NELLY!**

Everyone remembers Jim's games for their wacky sense of humour and this PC version retains the crazy feel of his previous adventures. The levels are varied and challenging, with a hub-style system allowing access to later levels. The graphics are rather disappointing, with quite plain

backgrounds and bland surfaces. The camera system is also fiddly as it doesn't follow behind you – making for some rather frustrating playing.

**WORTH PLAYING?**

*Earthworm Jim 3D* was a long time coming and ultimately should have been better. The gameplay is sound and the humour is infectious, but the sub-standard graphics and annoying camera detract severely from the game. Jim fans – even Jim himself – deserve better.

Old favourites, like the useful hamsters, make an appearance in Jim's new game

The Alligator's so ferocious it has two sets of blades, making it well nippy

**WHAT YOU NEED TO KNOW**

Chopper sim where you fly Russia's formerly top secret super-weapon across all sorts of terrain in hotspots around the former Soviet Union. You've got a whole flight of the double-bladed behemoths to fly and command as you support ground forces through a handful of campaigns.

**BITE ME**

The training sessions are essential if you're to have a hope in hell of achieving mission objectives, but once you've mastered it your

Alligator is very manoeuvrable.

Scenery and buildings look pretty good and aren't too repetitive for a fighting flight sim and ground units look and behave fairly convincingly. Propellerheads will appreciate the finer details and realism of the flight model, while the team management option – the first in a chopper sim – adds another layer to playability.

**WORTH PLAYING?**

More mid-air frolics than the Mile High Club

Night flying can be difficult, particularly if you get distracted by the pretty lights

If you're very clever you might even get a little jaunt into outer space

**WHAT YOU NEED TO KNOW**  
Aerial action shoot-'em ups are few and far between on PlayStation but the *Air Combat/Ace Combat* series is a notable exception. The latest instalment in this supersonic arcade action saga is the brightest of the bunch. You take on the role of a peacekeeping fighter pilot who patrols the skies, sorting out all sorts of mischief caused by shady multinational company Newwork and its mysterious allies. You start off with a bog-standard plane, but as you progress you get to play with all manner of fighters as well as gaining access to more advanced weaponry.

### CHOCKS AWAY

Anyone who has ever watched Top Gun has probably fancied themselves as a bit of an ace pilot. The attraction of soaring through the skies in a shiny killing machine, looping the loop at supersonic speed and dropping 'resents' on hapless enemies, can't be overstated. In terms of pure aerial thrills 'n spills, *Ace Combat 3* is the next best thing to being there. Costs less and won't make you throw up, either.

### TURBULANCE AHEAD

Although there are a huge variety of missions on offer, the basic gameplay can get repetitive. Once you've learned how to handle your jet fighter at high speeds and avoid becoming a turmac pancake, there's not much to discover. Each subsequent mission is a variation on a theme involving either dogfighting with enemy jets, ground bombardments or escort duties. The plot isn't great and somewhat undermines the game's long-term appeal.

Drop your bombs to exterminate the Nanobite computer virus

### WORTH PLAYING?

*Ace Combat 3* works well as a straightforward shoot-'em up. The mid-air battles will have you twisting and turning your joypad inside out. The 30-plus jet fighters handle like a dream and the views from the cockpit are spectacular. Clearly *Ace Combat 3* has been put together with exquisite attention to detail. If you're looking for instant arcade action, without too much in the way of plot, then this is the game for you. Be warned though, it can get repetitive as the missions progress.

Press START button to exit

The replay mode allowed you to sit back and marvel at your prowess. So now you can't make like an old flying ace and lie through your teeth about your awesome aerial antics. Not that anyone at CVD's ever done anything like that, Dan. Oh, no

### WHAT YOU NEED TO KNOW

It's Top Gun without Tom Cruise. Fly planes, shoot other people's planes down, fire missiles at targets. Pretend that you're American, saving the world from tyranny and showing off fresh bits of military hardware. At least you won't get brought down by some little Bosnian farmer with a pitchfork.

### PLANE AND SIMPLE

*Deadly Skies* is trying to breathe new life into the flight-and-fight style of game, but instead of adding new elements to the gameplay or introducing new features, all you get is tarted-up graphics. Not a problem if the gameplay is perfect, but *Deadly Skies* suffers from all the problems that every other game like this has encountered.

So, what are these problems? Pretty much every mission follows the same dull pattern: fly for a bit, hit a few easy ground or airborne targets, then spend the rest of your mission tediously following an arrow on-screen until a plane appears so far off in the distance it looks like a dot.

Then, fire missiles and watch it avoid them easily and nip out of view. Repeat until the game thinks you've been doing it long enough and deserve a break so lets you shoot one down. Spending hours doing this, mission after mission,

## WHAT YOU NEED TO KNOW

The *Strike* series is one of the most enduring in videogames. *Desert Strike* was the first to kick it all off on the Megadrive, and since then we've had *Jungle*, *Urban* and *Soviet* incarnations. *Nuclear Strike* marks the N64 debut for the helicopter shoot 'em up, but the gameplay remains the same as ever: you fly a series of missions to rescue hostages, blow up radars and kill lots of people.

# NUCLEAR STRIKE

Play around with a big willy. Sorry, 'chopper'

WORDS: DEAN SCOTT SCREENSHOTS: THG

## BAN THE BOMB

The gameplay hasn't changed for this 64-bit incarnation, so what you get for your money is a solid shooter that's slightly more believable than space blasters. Handling the chopper is particularly suited to the N64's analogue stick and you also get to play around in an assortment of land and sea vehicles as you attempt to stop the nuclear terrorists.

## WORTH PLAYING?

Aiming your weapons can sometimes be a problem, and the scenery does look a little dull. The core playability remains unchanged from the 16-bit days, so while it's a pleasant enough waste of time, it's not compelling enough for you to want to secretly pawn your mum's wedding ring for a copy.

# FINAL FANTASY VIII

The best just got better

WORDS & SCREENSHOTS MALIKA BUTTON

## WHAT YOU NEED TO KNOW

PlayStation owners have been wallowing in the delights of *Final Fantasy VIII* for several months now. Many of them have doubtless almost reached the end of the 100-plus hours it takes to finish this roleplaying odyssey. Meanwhile, PC owners have been lovingly, but impatiently, caressing their expensive hardware and tuning up their graphics cards ready for the day when they could finally get to grips with Squall and co. Now the agonising wait is over: Was it worth it? You bet it was.

## HIGHER RES LOVE

The most striking aspect of this conversion has to be the high-resolution graphics. The stunning cut scenes and gorgeous backdrops are now even more blindingly beautiful. Facial expressions are now much more detailed, revealing every line on

Headmaster Cid's forehead and capturing every blink of Squall's clear blue eyes. The effect is eerily realistic, drawing you even further into the emotional heart of the game.

## CAN YOU HANDLE IT?

Converting console games to PC can be a pain when it comes to the control method. Simple joypad moves become nightmarish when executed via keyboard and mouse. Thankfully, *FFVIII* keeps it nice and easy with excessive key pressing kept at a minimum. There's one addition to the PlayStation's gameplay: You get a *Chocobo World* sub-game; a Tamagotchi-style low-tech diversion that supposedly allows you to collect rare characters like Mini-Mog and Moomba and transfer them to the main game.

## WORTH PLAYING?

The question should really be: how can you not play this game? It looks incredible, it has an epic storyline that will grab you, and it even lets you keep a tiny pet Chocobo on your desktop. What more could anyone want?

Is it me, or is it hot in here? Call me paranoid, but I smell trouble...

Tanks are only built for one thing, and in an age where women gangs are trying to take over the world, you're going to need them. You get to drive tanks all over the place and blow the hell out of pretty much anything that moves (and a fair few things that don't).

## TANKS FOR THE MEMORY

You'd think with such huge scope for mass destruction that this game would be something awesome. The whole thing is spoiled by linear missions and the kind of mindless gameplay that leaves you bored after the first few missions. Go beyond these and there's a whole world of tedious action waiting for you. Regardless of which mission you're on, the gameplay is the

same. It's hard to get excited about what lies ahead when every few seconds you're getting blasted from behind by something that wasn't there two seconds ago. It's a very basic game-play crime, but you'd have thought it had been noticed during the testing stage.

## WORTH PLAYING?

The four-player is the N64's equivalent of *Twisted Metal*, only over smaller arenas and without the scope for vindictive fun. If it wasn't for the four-way mode there would be nothing to make this worth playing. There are a whole load of game options but not one of them

### WHAT YOU NEED TO KNOW

People familiar with roleplaying card games like Magic: The Gathering will recognise what's going on here. The idea of the game is to 'cart fight' with your opponents, and the winners will

receive new character cards to build into the deck. Confused yet? This game has quite a steep learning curve.

### FIVE FOUND RYU

When it's your turn, draw a card from the pack. You can put this into

the battle arena, or hold it in your hand. Each card features a character from an SNK or Capcom game with different attack strength.

The aim is to use them to defeat your opponent. You attack him, he uses his cards to defend, and when

his cards run out you take hit points from him until he dies.

### WORTH PLAYING?

Hardcore gamers will love to try to collect the set of character cards, featuring stars like Ryu, Ken and Claire from *Resident Evil*. # SONIC POCKET ADVENTURE

WORDS: DEAN SCOTT SCREENSHOTS: SNK

Spiky speedster gets shrunk in the wash

COST: £24.99

OUT: NOW

MULTIPLAYER LINK-UP

**WHAT YOU NEED TO KNOW**

Sonic is a blue hedgehog with a devastating turn of speed. You've probably heard of him. If you have, you'll be interested to know that this NeoGeo adventure is every bit as good as the Megadrive games in which the 'hog made his name. You still collect rings, you still whizz around and you still save little furry creatures. And it's still fantastic.

**GREATEST HITS REMIXED**

The single player mode is almost a Sonic's Greatest Hits collection, with familiar settings cribbed from all three of the 16-bit Sonic games. It isn't just a load of old levels bodged together, though — each of the new levels has been remixed to work better on a small screen. Familiar abilities have been retained too, with Sonic able to spin on the spot before tearing off at speed. A couple of link-up options have been included, with the Sonic vs Tails race mode being an absolute gem.

**SPLITTING HAIRS**

Before we get carried away, it's important to list the bad points. The gameplay occasionally slows down when there's a lot happening on screen, or when Sonic takes a hit and drops all the gold rings he's collected. And like every Sonic

game (including *Sonic Adventure* on the DC) it can be strangely bewildering when Sonic is ricocheting uncontrollably around the screen. Sonic veterans won't mind one bit, but control freaks bred on the Mario games might find it slightly distasteful.

**WORTH PLAYING?**

Sonic fans should go out and buy a NeoGeo Pocket right now. You should probably get two in fact, so you can play the Race mode. This title is jam-packed with the speedy gameplay you love, and you won't have to embarrass yourself by dusting down the Megadrive for a hit. Even if you're not a Sonic fan you can't really argue — this is a true 16-bit gaming shrunk perfectly to a

handheld. Even the trademark Sonic speed rush, comes across well. A stunning achievement.

## TUROK: RAGE WARS

### WHAT YOU NEED TO KNOW

This was never going to be a handheld recreation of the N64 multiplayer game. What you get instead is a single-player multi-scrolling shoot 'em up, with some platform overtones.

### CONTROL YOUR RAGE

The game's massive levels are split into various sections with differing gameplay styles, and this is *Rage Wars'* main problem. The side-scrolling sections are a real blast, but between these are unforgiving auto-scrolling mazes and on-rails sections.

### WORTH PLAYING?

There are many cool features in *Turok* and it is challenging, although its slightly uneven nature will test your patience.

## FIFA 2000

### WHAT YOU NEED TO KNOW

Play and win against the best football teams from around the world. There are stacks of options and gameplay modes to keep you busy and a handy password feature to keep track of your progress through the league.

### FOOTBALL FANTASY

The level of detail in *FIFA 2000* is excellent. You can tweak various gameplay options, like weather and pitch-types, or you can play around with your team strategy and formation to be the best. The matches are well-realised, though the controls are fiddly at first.

### WORTH PLAYING?

If you have a thirst for football on the fly, then *Game Boy FIFA 2000* is a great choice. There's enough here to last you a long time.

## STREETFIGHTER ALPHA

### WHAT YOU NEED TO KNOW

Here's your chance to kick ass in the streets the world over. *Street Fighter Alpha* is a conversion of the recent arcade smash. Choose your fighter, learn the combos, then smack your opponent to pieces. Lovely.

### STREET SMART

Fighting novices can tweak options and learn combos in the training mode, while hardcore fans can dive straight into the action.

Controls are responsive and the game plays quickly. The characters are ace and pulling off a tricky special is very satisfying.

### WORTH PLAYING?

The lack of a two-player link-up mode is a shame. But *Alpha* is still an enjoyable, high-speed fighter that'll have you button-bashing wherever you play it.

**Ridge Racer?** Something to do with fell running?

Get back to the countryside. Hippy, 3D4 is a game which lets you belt around eight immensely detailed tracks in one of 320 cars. The original version sold shed-loads.

Almost a car for every day of the year

**How many cars was that?**  
 320. Earn them in Championship mode or win them in special one-to-one trials. Complete these and you win some of the most outrageous cars ever seen.

**Sounds like long weeks of fun. Will I get lonely?**

Not at all. Multiplayer has a two-player split-screen mode so you can take on your mates and even add a few computer-controlled cars to spice things up a little. Or link up two PlayStations and have a monster four-player session.

**Surely I'll still get bored after a while?**

Collecting 320 cars takes a long time but, if you get tired of that then there's always time-trial mode. You find yourself dying to know what the other cars look like. If you want a fun, long-lasting racing game, get this.

# BATTLEZONE: RISE OF THE BLACK DOGS

Goldeneye meets Command and Conquer. Sort of

## WHAT YOU NEED TO KNOW

Released on PC many moons ago *Battlezone* is now hailed as a cult classic and this new N64 version features all the finesse that made the original a modest hit. Take control of a selection of land-craft or battle the rival factions on foot; the game combines first-person shooting with real-time strategy, and works surprisingly well on N64.

## ONE WORLD IS NOT ENOUGH

*Battlezone* has you controlling one of three rival factions in a conspiracy-theory plot involving solar system supremacy. Play as the US team, the Soviet squad, or the mysterious Black Dogs. Each of the teams has a distinct style with different vehicles.

## CHOOSE YOUR POISON

In addition to choosing your side, you can pick what sort of game to

play. Go for simple all-out blasting in Arcade mode, or flying your own in Pilot mode. For a real challenge choose Command mode and control a fleet of vehicles, scavenging and building bases, all in real-time 3D.

## FOG ME!

The one main criticism of the N64 *Battlezone* is that it looks terrible. The graphics have the traditional N64 fuzziness and a shocking amount of fogging. It looks as though graphics were sacrificed for speed of play. But, the various craft all move along at a good speed, are responsive and feel natural. Where *Battlezone* excels is in its atmosphere and real depth of play.

## WORTH PLAYING?

The first-person/real-time strategy sub-genre is relatively new and this is the first time it has appeared on N64. It works very well. There are various multiplayer modes for up to four players and the game offers a level of depth not often found on a console. The shoddy graphics are the game's only real flaw, but even they cease to matter after you become absorbed in the gameplay. *Battlezone* is an original N64 treat.

## TOY STORY 2

Buzz is back in a brand new cartoon adventure

WORDS &amp; SCREENSHOTS: TIM STREET

## WHAT YOU NEED TO KNOW

Based on the smash hit Disney movie sequel, you star as super Space Ranger Buzz Lightyear, in your toughest mission yet. Sheriff Woody has been stolen by Al, a dodgy toy collector, and you're the only one who can save him. With tons of brilliant power-ups to activate, you must fight your way across loads of giant levels, meeting some familiar faces along the way. You'd better get your shooting boots on coz it's a race against time to find Woody and get him back before his owner, Andy, arrives home.

## MEET YOUR BUDDIES

The aim is to win Pizza Planet Tokens by completing tasks,

winning races and solving puzzles given to you by other toys. Fighting your way across town, you'll bump into loads of Toy Story faves like of Slinky Dog. Do what they ask and the token is yours.

## SPUD YOU'LL LIKE

In your search for Woody, there are pieces of Mr Potato Head to collect in each stage. The wise-cracking spud will give you some ace power-ups which turn Buzz into a cool fighting machine. As well as wicked Power Boots, keep 'em peeled for the homing Power Disc missiles and the Grappling Hook which Buzz can use to swing up to hidden goodies.

## WORTH PLAYING?

*Toy Story 2*'s a smart platformer with some wicked bosses to blast and fun puzzles to solve. However, the graphics aren't the best ever seen on the N64 and the lack of long-term challenge means older gamers will have this done and dusted after just a few days.

**WHAT YOU NEED TO KNOW**  
Playing *Rally Championship* on PlayStation is an amazingly intense experience. It's like someone grabbing you by the shirt and screaming in your face. Sure, it's another rally game, but one with such manic handling and frightening speed rushes that it's impossible to ignore.

**THE BORING STUFF**  
The game simulates the Mobil 1 British Rally Championship. 36 real-life stages are authentically modelled, along with 21 genuine

rally cars. If you win the Championship on medium difficulty or above, you unlock World Rally cars like the Subaru Impreza, taking you into Colin McRae Rally territory. There's also an Arcade mode where you can race against other cars and, of course, a Versus mode.

**GOES LIKE STINK**  
Visually, the game is stunning. When we first saw screenshots we swore they were from the PC version. They move at an amazing rate, giving a speed hit akin to being strapped to the bonnet of a

speeding rally car. The handling lets the side down slightly, being twitchier and less convincing than McRae. Your car also seems to absorb massive bumps, handling similarly on ice as it does on gravel.

**WORTH PLAYING?**  
*Rally Championship* is an insane game. If you're looking for a full-on adrenaline hit, then this is it. Versus mode is an essential two-player blast. *Rally Championship* is an amazing technical achievement and a fantastic game. It steals *V-Rally 2*'s arcade crown, but reality fans will stick with Colin, despite it's visual inferiority.

# EVOLUTION

The missing link for Dreamcast RPG fans

WORDS & SCREENSHOTS: LEE SKIDNELL

Left: Your cute gang of adventurers will have to face-off against the meanest of monsters if you're to succeed in *Evolution*. Fortunately, you have a wide range of attacks and specials to use in battle and, as you progress through the game, your team will learn more skills to help defeat bad guys

## WHAT YOU NEED TO KNOW

This is the UK's first Dreamcast RPG. The hero of the game is young Mag Launcher - treasure-hunter. Mag is the heir to the Launcher family legacy but all is not well as the family is up to its ears in debt. To repay the Archeological Society's loans, Mag must journey into the surrounding ruins and bring back treasures. At the same time, Mag and his band of adventurers start to learn about the history, and the fate, of their people.

## FIGHT, FIGHT, FIGHT

The in-game action is viewed from a top-down isometric viewpoint - with a neat twist. A touch of a shoulder button and you can rotate the world around your party, letting you see around tricky obstacles or prepare yourself for a surprise attack. The ruins and dungeons are randomly generated each time you play and are a fairly simple affair of finding the exits on each floor to progress. The battles are also random, but you can see your enemies before they attack, so you can choose to run or fight.

Left: Even trailer-trash make an appearance in *Evolution*. This is where you'll find Chain Gun after she steals your treasure at the start of the game

Left: Choose your destination on the map screen. You can visit the ruins in any order you like as the monsters will be pitched to your level

## FIVE GO MAD

The characters in *Evolution* are well crafted, with each one having a distinct personality. Mag Launcher and his silent-but-deadly lady friend, Linear Cannon, start the adventure together. The battle-animations help you get to know the characters and the humorous touches in conversations and cut-scenes add to the atmosphere.

## WORTH PLAYING?

*Evolution* is a great looking title. The story is unusual and is ultimately what drives you onward to completing the game. Dreamcast owners will have to wait for a *Final Fantasy*-beater of their own but *Evolution* is a step in the right direction.

Taxi drivers have always been a low unto themselves. The only human life they care about is the one sitting in the backseat, paying a fare. But when the few rules they do obey are discarded, all hell breaks loose, and now you can get to live it in the finest Sega arcade conversion to date - *Crazy Taxi*.

## SHORTCUT TO VICTORY

They say the shortest distance between two points is a straight line, so try and travel in one as much as possible. Even though you may have to take some unusual detours and shortcuts, it's a blast and much more fun than following the arrow and obeying the Highway Code all the time.

Look at that immaculately cared-for lawn. Pity it's about to get carved up with some heavy tyre marks through it. Who needs a Flyme

Some of the isolated destinations like railway stations are surrounded by wide open fields. Shame to let them go to waste then

You're on the overpass and need to be on the road below. Do you go round, wasting time, or just crash off the side and hope you don't kill someone?

The railways aren't as crowded as the roads and are a lot straighter, cutting seconds off your time, but collisions tend to be more spectacular

## GETTING TRICKY WITH IT

Pulling off stunts and tricks may not sound like the kind of thing you'd do as a taxi driver (unless it's a London black cab). But I'm sure there's room in the taxi driving test for knocking over skittles or bursting giant balloons.

Make like Eddie the Eagle Edwards, but in a cab. Clear 150 metres and the course is sorted. Time for a turbo start, then

Turn around quick to catch the flag behind you. Power drifting is the key to completing this in a record time

An obvious thing to do in a taxi. Race around a field and burst all the giant balloons within the time limit. Just like you would in real-life

Another obvious driving test – ten pin bowling in a car. Getting strikes on all of them isn't as easy as it looks

Jump the ramps without hitting the water to get your passenger home on time. Fail and it's more than the engine that'll get flooded

Pick up the posters one at a time and drop 'em all off before the clock hits zero, and you'll be a star and get a huge tip

## LOOKS FAMILIAR

Let's face it, racing from Al's Salmonella Emporium to Ginger Records means nothing to anyone. But Sega has gone and signed some canny deals so it can use real companies to spice things up.

Maybe a clue for the next *Crazy* game from Sega? *Crazy Pizza Home Delivery*. I think that'd sell

So it looks more like something out of *Virtua Racing* than the London Eye, but this one works

Just time to pick up the latest ABBA tribute album or attend a Steps signing at Tower Records

The Original Levi's shop. Take the girls here so they can change out of those horrible tartan skirts

## THANKS FOR THE TIP

Want to bump up your fare a bit without taking the risk of using a longer route and wasting time? All taxi drivers do. All you have to do is just impress the guy or girl in the back and they'll tip you big time when the trip is over.

Edge between a couple of cars and you'll squeeze a few extra bucks out of your passenger

And if you thought you got good money for messing about with cars, dice with death with trucks

## INSTANT PLAYER GUIDE

### CABBIE TIPS

Our resident taxi driving expert, Crafty Cockney Cabbie, Alfie, explains how to get more customers and, more importantly, more cash out of the punters in *Crazy Taxi*.

Well, starting off is obvious, isn't it? Slam down the sumphead pedal at the same as shifting into D and you'll get that extra boost. Cor blimey, things ain't half changed around here since I was a nipper

There's more to turning than just spinning the wheel. You'll never guess who I had in my cab last week. When you're in mid-turn, slam the old jam jar into R and then back into D to get a drift going

I'm not going south of the river at this time of night, guv. When you're dropping off punters, remember to turn to face sideways so you can pull out quicker, or preferably drop them off near a pick up

## CUNNINGSTUNTS

They may not earn you much extra cash or even necessarily speed you up that much, but pulling off stunts like these will impress the girls, your mates and anyone else who's watching. Plus you get the chance to show off a bit.

Go full tilt towards a steep hill and when you drive over, you can catch big air and even jump the slower trucks on the way. Just try and avoid actually landing on them too often

Now this guy is just asking for abuse by parking with his back lowered down. If you're airborne you can't hit traffic to slow down. When you land, however, it's another story

See that bridge up there? See that it's raised? Think that's going to stop you? Think that's a chance for a bit of fun? You're absolutely right. Turbo boost and hit it at full speed

Now this is what we call a real man's game of chicken. There isn't a lot of space here to get in the tunnel between the two trains, but it can be done without needing a new pain job

## "Knowing that your next mistake will end your game is a pure adrenaline rush"

## SUPERFLY GUY

It's a bit of a shortcut and it's a bit of a stunt – but everyone who plays Crazy Taxi just has to try this little trick a few times.

You could go around the car park to your destination but, as your car can't be destroyed, go straight up the ramp instead

Slow down a bit and turn right when you're safely over the top of the ramp to get ready for the fun stuff to begin. Rev that engine

Don't worry about going over the edge, that's the whole point (your car never gets damaged). At full speed this looks damned spectacular

A quick hop over the roof of another building and you're en route for your destination with seconds clipped off the journey time. Well done

Anyone in this much of a rush for Sushi must have something wrong with them. The faster you reach a destination, the bigger tip you get and the more seconds are added to your clock

## WHAT WE THOUGHT

## TAKE IT FOR A SPIN

Just when you thought driving games couldn't get any sillier than the likes of *Driver* and *GTA*, along comes Sega with the most insane racer of the lot. You blast through shortcuts in a constant race against the clock to get your passengers to their destinations. But mad-in-the-head action isn't the only thing that shows *Crazy Taxi* to the top of the pile. Just take a look at the visuals, and when this baby moves at full speed, there's no loss of detail or glitching anywhere – now that's impressive.

## PUTS THE F IN FUN

But what really puts *Crazy Taxi* in a league of its own on the

Dreamcast is the sheer fun you have while playing it. Racing against the clock, knowing that your next mistake will end your game, is a pure adrenaline rush. All the good intentions of driving from A to B go out the window as you smash your way through traffic, jump through buildings and generally drive like you were on a Police Stop video. As soon as you first slam down the accelerator this changes from another run-of-the-mill alternative racer to something quite unique.

## ARCADE PERFECT

As a conversion, it's flawless and Sega has added a new Dreamcast exclusive mode to offer more of a challenge to arcade veterans. Throw in a series of trick courses where you can play ten pin bowling with your taxi or even try out ski

jump-style action, and you have something that's going to appeal whether you want a quick ten-minute time-waster or a serious evening-passing party game. Going back to the old style of seeing who can beat a high score rather than just seeing who can get furthest suits *Crazy Taxi* perfectly. One of the best arcade conversions to date, and certainly the most fun game on the Dreamcast.
