MARC - The arcade action thriller with the BIG finish. Infiltrate the criminal underworld - your mission is to seek out and destroy the king pin of the MR BIG CORPORATION - if you get that far. You'll have to outwit his enormous army of body guards... gangs of charisma-bypass patients in trench coats, the bullet brain with the build of a rhinoceros and the breath of a dung beetle, packs of vicious canine guppies, the psychotic clown with an evil sense of humour - you'll die, but not laughing! Then there's the gas guzzling cadillac jock - a cool specimen, elbow hanging on the door rail, a serious looking piece in his hand and ready to blow you away as he rolls down main street leaving you coughing lead. It's not all bad!... You've got a chopper to back you up, a mean, shiny street machine, some heavy metal hardware and some pretty neat moves. And what about the king pin... did I say he was Mr. Big? No, he's MR BIG!

OF GENIUS

Would you know if someone
had? As Doug Quaid you have been
scurrying dreams of another life as
Brian to Netall Incorporated, a
service specializing in implanting
the minds of those who desire to
go into reality. Experience the
car dreams turn into hideous
reality more is dug by word-be
al truth. You're not you - you're
your true identity - your mission is
to: strange mutants, futuristic
weapons all captured in superbly
play that complements the success
of CALL... a nightmare journey into

CHASE HQ II - Special Criminal
Investigation - continuing where **CHASE
HQ** left off. Your mission is to track
down, chase and apprehend dangerous
criminals. It's **FASTER** - explosive
power sends you hurtling through various terrains -
hold the line or plough the fields! It's **TOUCHED** - the
criminals wield some heavy hardware - but so do you!
You can shoot but you must dodge their flak... heavy

gunfire, trucks unloading their cargo onto
your bonnet... It's the meanest pursuit
game to hit the micro screen. The extra
features will leave you gasping for extended
play - weather changes, bodyguard squads,
grenade lobbing bikers, gun-choppers... just play it!
we dare you to stop!

No time for ballooin' around!...
no time to shoot the breeze!...
in fact you've hardly set your
feet down in the mighty U.S.S.R.
and it's all action. You sight up your latest and
most formidable balloon poppin' piece... but
now that bounce bomb has just multiplied!!
Tour the world in the most addictive arcade
game of the year from Mitchell Corp. A quick
eye and super fast reflexes will give you just a
half-chance of a win... the other half will come
if the bounce goes your way!

CASTLE of ILLUSION

STARRING MICKEY MOUSE

*Forever
impressing us with
his Donald Duck
impressions, Les
Ellis encounters
one of Donald's
greatest pals,
Mickey Mouse*

Mickey Mouse needs no introduction. The eponymous character of Sega's biggest licensed game — even bigger than Michael Jackson's *Moonwalker* — has been around now for well over 50 years. Indeed, the expression "He settled for a Mickey Mouse job instead of something challenging" is derived from Walt Disney's most successful cartoon character and his simple-minded attitudes. Even *Trivial Pursuit* contains a question about MM — who first did the voice for Mickey Mouse? (The answer's Walt Disney himself.)

Mickey's fame was built in the movie theatres of the Forties and Fifties. Who can forget his performance as the wizard's apprentice in *Fantasia*? (The film has recently been restored in Technicolor and reissued with superb stereo sound.) And there's his faithful dog Pluto and his lifetime love Minnie. Sadly, Pluto doesn't

make an appearance in *Castle of Illusion*, but Minnie takes a starring role.

Now Minnie would be any rodent's idea of heaven and Mickey has no intention of losing her. But one day, while skipping hand in hand through the forest, the skies darkened and a deathly cold breeze swept through the land. Out of the trees flew a wicked witch who snatched poor Minnie and whisked her away to the *Castle of Illusion*. But Mickey wasn't going to have any of this.

Your quest as Mickey starts with you in the forest, wondering

which way to turn next. After battling past the various strange creatures in the forest, you will finally get to the *Castle of Illusion*. Here Mickey meets up with his old friend, the rat, who has taken refuge inside one of the castle walls after an encounter with the wicked witch. The rat saw the witch return to the castle with Minnie and now has inside knowledge of the castle's structure. Using this valuable information Mickey can jump on the guards surrounding the castle and enter under the portcullis.

On entering the castle, Mickey

Oh, Mickey, you're so fix.

RAZE MARCH 1991

PREVIEW POSTSCRIPT

But you didn't know our Mickey could read Japanese did you? Mickey is now fluent in hundreds of different languages thanks to the largest merchandising campaign in the world. Behind the first door is a strange forest world, once this level is completed Mickey returns to the corridor to try the next door. The door to the corridor level now becomes a volcano. The second door leads to a strange toy world where giant clockwork soldiers patrol to catch away visitors. The third door takes Mickey underground and under water.

Mickey swings over a bottomless pit and reaches for the star that will restore some energy. Being a certain character, Mickey never actually dies. Mickey sillily has three "lives" in his adventure. Extra tries can be gained by picking up little Mickey Mouse icons.

is faced with the choice of several different doors – now the name of the castle becomes clear. Beyond each of the doors is a completely new landscape which Mickey must travel through if he's to reach his loved one. The many obstacles preventing your progress range from moving tree trunks to mobile mushrooms. Certain items collected on the way will help Mickey's progress. Some will give him extra firepower (Mickey throws apples), while others will increase his energy.

Like the storyline, the game is pure Disney. Animation is, of course, the best on the Mega Drive yet. Similarly, the whole presentation of the game is outstanding. It looks like Disney have had a strong say in the look and feel of *Castle of Illusion*. I bet they gave the programmers hell, but all the sweat and tears has been worth it. *Castle of Illusion* is undoubtedly the prettiest and most lovable Sega arcade adventure you're likely to play this year.

★ *Graftgold (Uridium, Simulacra and Super Off Road)* are currently working on a new mega game to be released through Virgin. Already the project, with working title of *Realms*, has been in development for seven months and is scheduled for release in the third quarter of 1991. Apparently, the RPG is based in a fractal - generated environment. It will appear on the Amiga, Atari ST and IBM PC, the prices – like the specific content of the game – have yet to be revealed.

★ Gremlin have taken the best-selling board game of 1989, *Hero Quest*, and are planning an all-formats computer release sometime over Easter. The game is an absorbing fantasy adventure where elves, wizards and barbarians do battle with the forces of evil.

★ Prolific French programmers Infogrames have come up with a sequel to their espionage game *Hostages* (which has just been released on budget). *Alcatraz* is based around the high-security prison island in San Francisco bay which was closed down in 1963. The game will be released at the end of February on all computer formats.

'Sizzlingest two-player action in infogrames' latest blockbuster, *Alcatraz*.

Amiga and Atari ST. All your favourite characters will be in it, including Fat Slags, Spoilt Bastard, Roger Mollie and Biffa Bacon. Coming from the same software house who brought you *Monty Python and How to be a Complete Bastard*, the *Viz* game will certainly be different.

★ *Narco Police* from Dinamic is using 3-D graphics as game using futuristic drug dealers on a tropical island. The graphics look impressive and the game should be out now on the Amiga, Atari ST and IBM PC (£24.99). A C64GS version is also planned for sometime next year.

Reaching his informant outside the castle, Mickey follows one of the legend heroes over to a game – you still aren't in control yet.

BUG BUSTERS

Bug-ridden Les Ellis grabs his aerosol and goes on an exterminating frenzy

After their last effort, Audiogenic have a lot to live up to. Trying to follow a smash hit like the RAZE raved *Loopz* is no small feat. Puzzle games and Emyln Hughes behind them, Audiogenic have gone for something completely different... *Exterminator*.

A typical lazy, hot, sunny Chicago day was suddenly brought to life by an ear-splintering scream. The quiet leafy suburb was going about it's normal business when unexpectedly

the bugs struck. Millions of the critters appeared simultaneously as if guided by some unseen force. But that was not all; small mechanical toys seemed to be mysteriously brought to life.

Naturally all this was far too much

in frantic two-player mode you send a friend get to swat bugs simultaneously. Forget insect repellent; this is a hands-on job

for the normal pest control authorities to handle. Only one man could be called on in a time of such need. The *Exterminator*.

You must guide the *Exterminator* through every room of every house clearing a path through the critters as you go. You can either grab the bugs, pound them into the ground or shoot them depending on the position of the hand which you control. There is also a simultaneous two-player mode in which each player controls a separate hand.

If the preview copy is anything to go by, *Exterminator* will be a damn fine slap-'em-about. It'll be out in February on the ST, Amiga and PC priced £24.95.

"Snik for the memory. All these toys that you never put away have come to life and now you've got to pound them into dust. You can also shoot the rest of the bugs with your exploding fingertips.

PREVIEW POSTSCRIPT

★ *Predator 2*, the movie starring Danny Glover, is to spawn a 16-bit spin off in April. Image Works' game promises some stunning effects as you play a cop trying to solve a series of seemingly motiveless murders. The game promises to be a 3-D sideways scrolling shoot-'em-up. It will be available on the PC, Amiga and ST. The price has yet to be confirmed.

Get tough as you take on the *Predator* in the sequel to the hit movie starring Danny Glover of *Lethal Weapon* fame.

★ From the same programming team that brought you *Pipe Mania*, *Xenon 2*, *Interphase* and *Exterminator* (see above) comes *Cybercon III*. The game's an action adventure requiring you to fight and puzzle your way through a complex of over 350 rooms. The Amiga and ST versions are to include a wealth of sampled sounds. The PC version will support a variety of graphics and sound cards.

★ *Dungeons and Dragons* fans will be pleased to hear that Birmingham-based US Gold are releasing *Death Knights of Krynn*, the sequel to *Champions of Krynn*. Price has yet to be confirmed, but a clue book will be available for an extra £7.99.

★ Available in early February is *Excaliber*. The game, programmed by American company Synergistic Software, is a combination of FRP, adventure and combat.

Two against one, now that's not fair for the two. Especially when you have *Excaliber* on the side.

LAST NINJA III

The saga continues. And you thought you'd seen the last of System 3's martial arts arcade adventure in the shape of *Ninja Remix* last month. There's no rest for the ninja warrior as he takes part in *Last Ninja III*.

Fans of *Last Ninja* may remember that in the first game you went looking to avenge your slaughtered mates while in the second you went to the States to kick ass (*Ninja Remix* reviewed last issue is essentially a reworked version of *Last Ninja II*). Phew, we're back to date.

In *Last Ninja III* you're back in black to hack and slash your way through five levels of solid 3-D action.

The game style is pretty much the same as in previous missions, with a 3-D view of the world and small but perfectly formed graphics. There are loads of puzzles to solve, and System 3 are dubbing the game a "thinking man's beat-'em-up."

Last Ninja III is coming out soon and will be available for the Amiga, ST and C64GS console for £24.99.

There are five levels in *Last Ninja III* - four are based in and around a temple, and each has an elemental theme running through it.

COMING SOON...

BACK TO THE FUTURE III PART III

BIG IN

Having recovered from Suzy Uki's Christmas bonus, Shintaro Kanayoa joined the throngs in Japan and camped outside a popular store the night before the Super Famicom officially went on sale. This is his account of the sake, seafood and sex freely available on the night.

Minasama yokoso. As you've probably discovered, getting hold of a Super Famicom in the UK is a joke. Believe me, it's tough enough in Japan. I was really frustrated at not

Shining & Darkness on the Mega Drive. This huge RPG is remarkably similar to Dungeons Master and will doubtless set the standard for other Mega Drive RPGs.

machines have gone – and by the time you read this the second batch will have been sold too. Advance orders have already topped three million!

The launch of the PC Engine and Mega Drive never caused this sort of hysteria. It's odd, but almost anything with a Nintendo brand name seems to send the Japanese into a buying frenzy. Take the Game Boy. On its launch day many small riots broke out when numerous customers walked away empty-handed.

The very thought of people queuing up all night for a games machine in Britain is about as incongruous as a 48-year old Prime Minister. It seems people in the land of the overheated transistor are perfectly happy to reveal their game playing colours.

Just afore I leave the Famicom for another month, a few titles due imminently. *Ys III: Wanderers From Ys*, *Big Run* (another game based on the Paris-Dakar Rally) and *Actraiders*.

Dungeons and Mega Drives

There's a huge *Dungeons Master* clone about to be unleashed on the Mega Drive: *Shining & Darkness*. The game comes on an 8Mbyte cartridge and features battery back-up. An 8Mbyte cartridge holds more information than nine packed Amiga, ST or PC disks. As you can imagine the game has enormous depth. The battery back-up lets you save your position during the game; vital in any adventure game.

Shining & Darkness is a blatant

rip-off of *Dungeons Master*, but that's Mirrosoft's worry not mine. You control three pre-chosen characters – a fighter, a priest and a magician. It's a shame there isn't a wider selection of controllable characters as this is the main attraction to D&D-style games.

The enemies you fight are standard skeletons, orcs, ghosts, dragons, not-so-ordinary big-foots, and evil bats and pumpkin heads. There are loads of different items like weapons and magic spells to collect.

The reason the game looks so good is that it's the first of its type on a powerful machine like the Mega Drive. Obviously not as exciting as *DM*, but something of a first for console gamers.

Next is a conversion of one of my favourite arcade games: *Crackdown*. It won't take you long to get to grips with the game as the basics are very simple. Your aim is to plant bombs, chew bubble gum, kick ass and get the hell out of the place before it blows. And guess what... you're all out of bubble gum.

Wrestle Ball looks as though it could gain a cult following. It's a cross between the robotic American football game *Cyberball*, the hard hitting futuristic soccer simulation *Speedball*, and the frantically fast *Kick Off*. You and an opponent (either human or silicon) can choose from eight fighting styles, including Namco (the lads with Pacman symbols), wrestling, judo, Sumo, and Tae-Kwon-Do. You can kick the ball, dribble it or pick it up and run with it. In addition, there are fast-in-face and knee-in-crotch moves that have to be mastered.

As well as that lot above, there are loads of shoot-'em-ups, including *Dangerous Seed*, *Aero Blasters*, *Atsya Dragon*, *Midnight Resistance*, and *Blue Almanac*.

Finally, on the Sega subject, two Game Gear titles to watch out for: *Super Golf* and *Junction*. *Super Golf* is a pretty standard gold game with a neat feature allowing up to four players to compete simultaneously.

managing to pick one up on the day it was released. Never ever shall I spend another 20th of November camped outside a major computer store waiting (with virtually the whole of Japan) for the 21st and the arrival of the Super Famicom. By all accounts the initial run of 300,000

Queues started forming outside computer hardware stores in Japan the night before the Super Famicom was released. An estimated three million advance orders were placed before the machine officially went on sale.

idea and comes in two versions. The standard Duo FC includes a Famicom and an 8088-based PC motherboard while the Dup FC Plus is a Famicom plus an 80286-based PC.

After the revelation of the Tera last month, here's news of yet another development along similar lines: an 8-bit Famicom (NES to you lot) and an IBM PC in one box. The Duo FC is an American

JAPAN

Junction is a variation of *Confusion* and the more recent release *Pipe Mania*. Basically, you've got to lay down tracks. All the while there's a spark burning along the track. If the spark hits the end of the track you're finished. Extremely easy to get in to; a lifetime to recover from.

You can call me Ivor

And lo we make it to the PC Engine. *Ys III: Wanderers From Ys* is a CD-ROM title crammed with animated and still images. Apart from the pretty pictures during the intervals, there's little positive to say about it. The game's a 2-D RPG/arcade adventure. At the risk of sounding negative, save yer yens and avoid this game. Better still, take out a subscription to *RAZE*. Even better, buy me a large cask of sake for my Birthday.

Much more satisfying is *Bomber Man*, a conversion of an ancient Famicom game. You are Bomber Man; cute, round-headed and part-time bomb planter. On the Engine up to five people can play simultaneous-

ly. In single-player mode you have to kill all the creatures within a time limit. In multi-player mode, it's a case of last-one-standing wins. During a level there are numerous items that can be picked up. For instance, skulls reduce your bomb's explosive effectiveness and make your movements slower, flames increase your bombing power, and inverted bombs let you deposit more than one bomb.

Bomber Man is the first game that is compatible with the GT's multi-player link. Sadly only two players can join in on the GT version, but at least it's a step in the right direction.

I mentioned this last month, but just have to mention it again. *Moto Racer II* is sex on wheels. A climax with a crank shaft. Lust in a Lada. Well, all but that last one. This is the king of car racing games. Speed, weapons, busy guys dishing out phallic trophies... Rev those motors. Feel the throb. Orgasm across the finish line. Phew!

From the physical to the spiritual. *Master of Monsters* on CD-ROM is a monster simulation game. The game map is divided in hexes and the territories split in two. You choose to be either Chaos or Low (apparently this has something to do with Good). Depending on the side you select, you'll either face an array of good guys or a bunch of bad lads. Your objective is to destroy the leader of

the opposing force. The graphics are some of the best to appear on the Engine to date and the whole game looks surprisingly sophisticated.

On that note, I shall exit in the manner I entered: minasama yokoso. Abayo.

Bomber Man on the PC Engine. Superb multi-player bombing action. Similar to *Bomberman* only far better.

RELEASES IN BRIEF

GAME BOY

Go! Go! Tank - you've played the BASIC listings version, now try the inch-high Game Boy rehash of the classic *Bomber* game.

Mickey Mouse II - deep down you knew you had a song brewing. So, all together: "Hey, Mickey, you're so fine..." *R-Type* - it seems the shoot-'em-up reviewed last issue is about to burst onto the scene. Fast, furious and immensely playable.

GAME GEAR

Junction - remember *Pipe Mania*? Well this is similar. You lay down tracks until a spark catches up with you. Fiendishly addictive.

Super Golf - par putt, birdie, eagle, doggy doo. All your favourite phrases plus a four-player competition mode.

MEGA DRIVE

Crackdown - conversion of the simultaneous two-player coin-op. Plant bombs, kick ass, and run for your life.

Shining & Darkness - one of the

first in-depth RPGs for the Mega Drive. A huge game taking up 8Mbytes of storage.

Wrestle Ball - mix together *Speedball*, *Cyberball*, *Kick Off*, American football and Australian rules football. This is the result.

PC ENGINE

Bomber Man - absolute mayhem as you and up to four buddies can blow the hell out of each other. Brilliant.

Moto Racer II - it's so good we decided to mention it again. Another fabulous multi-player game in which you race around a track.

Ys III: Wanderers From Ys - a CD-ROM RPG with very pretty stills and animation, but little else.

SUPER FAMICOM

Ys III: Wanderers From Ys - like the PC Engine version, but on cartridge and a lot better.

Big Run - a racing simulation based on the Paris-Dakar Rally.

Available now from selected outlets of Comet, Currys Superstores, Dixons, Flumbecks, Selfridges, Toys 'R' Us, Virgin Games Centres and independent computer stores.

entertainment

After a bad bout of influenza, Hank Weinsnotter clears out his back passage and deposits the latest news from America

They might be teetering on the brink of financial ruin but those chirpy chaps from Activision have opened the floodgates with some great new releases. Let's hope this puts them back on the map and gets a few dollars in their pocket. For the Game Boy is *Heavyweight Championship Boxing*. You can throw upper - nnnnghh - cuts or jabs or even - aaargh - hooks! Could this be too much to handle for the little Game Boy? It also sounds a bit violent for peace-loving Nintendo. Still, who cares?

You fight up to six contenders from around the world. The game has a close-up first person view of the fighting sequences, with a third person view of the ring showing the "down for the count" sequence when your fighter is flat on his back.

The game has loads of little intermediary screens showing your fighter's stats, and celebrating your victory. The fun bit comes when you link you two Boys and play head to head. Just like in the real thing, you must work your way up through the ranks, finally challenging the world champion. You know what, "I coulda been a contender."

FIVE...FOUR... THREE...TWO...ONE

"Thunderbirds are GO!" I wonder what happened to the guy that did that countdown. I bet he's doing voiceovers for some breakfast cereal company in South Carolina now. Hmm, anyway Activision have just released the shoot-'em-up Nintendo version of the cult TV series. It comes complete with nine

the end of each) and "splash" screens detailing what's happening. You can control a variety of aircraft, with lots of weapons and power-ups. And from the screens I've seen, Parker doesn't get a look-in.

23RD CENTURY GROOVIN'

Out soon on the Amiga and IBM PC is a new strategy game from Sim Systems called *Fireteam 2200*. Set in the 23rd century it is a game of tactical combat between armoured air and ground units.

Mega-corporations have the wealth and the technology to colonise the world's orbiting distant suns. But finding a rich new world to colonise is easier than keeping it. That's where you come in. Fight alone or command a fireteam of up to 16 units, with over 30 combat vehicles with 35 different weapons systems... realistic line-of-sight, head-to-head modem play... The normal sort of thing for strategy addicts.

FAT ATTACK!

The year is 2550 with your host, the very lovely, Mondu-the-Fat. In Activision's *Mondu's Fight Palace* for the Mega Drive you have one of the weirdest beat-'em-ups around. Two strange creatures, each with their own special moves and weapons, fight each other to the end. Each character has ten different ways to attack. For example, Edwina has her vicious hairdo (I kid'you not).

A nice roleplay shell is included as you watch your fighter develop from a mere green rookie to a world champion. You may have already seen this game under the title *Fatman*.

TMNT - AGAIN

Yes, those half-shelled ones are back in *TMNT - The Arcade Game Ultra* has acquired the rights to the popular arcade version and have pulled out all the stops with this whopping great 4MB Nintendo version. Not only have all the levels of the arcade version made it into the game but three additional levels have been programmed! Expect our heroes to try and keep their balance on their skateboards and also spend a level in an "Ultra"-modern castle. With the new MMC3 chip set in the latest NES, the one- or two-player game should be a flicker-free!

No sooner have Origin released the splendid *Wing Commander* and mission disk than they're working on *Wing Commander 2* and a new *Worlds of Ultima* game based on Mars

FABULOUS FAMILCOM

The Nintendo Super Famicom may not have been released over here yet but I have heard some game news and seen one or two pics of forthcoming releases to whet our appetites.

R-TYPE 2

Duplicating virtually all of the elaborate backgrounds and huge animated guardians, *R-Type 2* looks to offer the same intense flicker-free action normally seen in the arcade.

GDLEEN

Seta's first Super Famicom cart is an RPG. Travel through a monster infested countryside fighting with beings to earn experience points and gold. Visit the towns to buy strong armour and weapons and chat to the people to learn more about your quest.

SIM CITY

Hmm, that one as well.

POPULOUS

Yes, that's coming too.

SUPER DARIUS

Taito is converting its older arcade shooter for the new 16-bit system. Featuring smooth horizontal scrolling, multi-dimensional backgrounds and huuuuge end-of-level guardians, this game looks to be identical to its arcade cousin.

SUPER DEFORMER

This new quest/adventure game, set in 3/4 overhead view perspective, will be Banpresto's first SF game. Choose one of three characters, explore sky-high kingdoms and battle aliens.

DYNAMITE BOMBUZAL

This one's being produced by British company Mirrorsoft. Hop from block to block in this lively puzzle game set in either overhead or 3/4 overhead view. Your goal is to blow up all of the bombs in that level.

ULTRAMAN

Bandai are bringing one of Japan's famous animated characters to life on the Super Famicom. Take on giant 25,000-ton dinosaurs, lizards and monsters in this side view action game. Punch, kick, flip and throw the beasts to stop them before they destroy the country.

HOLE-IN-ONE GOLF

Try for par in one of the most graphically realistic golf simulations ever made. Where fairways were once flat and level, they now have visibly distinct mounds and depressions. Sand traps have lips and greens now have grain and multi-dimensional rolling slopes.

DRAKKHEN

Yes, even the French are at it!

NES

RAD 'N' BAD

New on the Nintendo from Activision is *The Adventures of Rad Gravity*. With ten worlds, including the never seen before 'upside down planet' where reality is stood on its head, and promises of lots of puzzles on every planet you could have your hands full. There are hundreds of "strange and wondrous creatures", an "engaging" storyline and a promise of a surprise ending, so Activision hope that Rad will top of Mario in the popularity stakes. It'll have to be good to do that - very good indeed.

PRINCESS TOMATO

On the Nintendo, *Princess Tomato of the Salad Kingdom* (what'll they think of next!) has, yawn, been kidnapped by the evil Mister Pumpkin. You are the brave, er, Sir Cucumber who must venture through the countryside to the foot of the Zucchini mountains where the pumpkin castle is. Designed for the younger player I would imagine.

PALAMEDES

Hot-B has a new type of puzzle game for the Nintendo which combines dice with poker. In this you have the die at the bottom of the screen. Change the number on its face to match up with the one that is falling. The die then appears in your hand. Your goal is to make as good a poker hand as possible.

DR MARIO

The doctor is in! It seems that there are nasty viruses floating around at Nintendo and Mario has to destroy them with an overdose of vitamins. Colour NES version of the Game Boy hit

GAME BOY

PIPE DREAM

In this mind teaser you must become a speedy and efficient

plumber. Different shaped pieces of pipe appear on the side of the screen. Take 'em and connect 'em to make a continuous pipe. Stay ahead of the filling water! American version of *Pipe Mania*.

PC ENGINE

TV SPORTS FOOTBALL

This successful 16-bit computer game finally arrives on the PC Engine.

SUPER STAR SOLDIER

The original *Star Soldier* was one of the best vertical scrolling shoot-'em-ups made for the PC Engine. Now witness the sequel which proves to be every bit as good - if not better.

MEGA DRIVE

MICKY MOUSE

Makes his Mega Drive debut with this phenomenal new adventure game. Imagine perfect animation and spectacular sounds with realistic parallax scrolling. Now try to visualise the best graphics ever seen on the Mega Drive and you might get part of the picture. Including new screen techniques like screen flips and layering of graphic screens to duplicate the translucent look of water! There are seven levels up to and in the enchanted castle, fighting with jack-in-the-boxes, toy airplanes, clowns and toy soldiers. But this game's not for kids. There are lots of hidden passageways, bonus rooms and secret areas - it even outdoes the Marios!

DYNAMITE DUKE

Grab your AR-15 and start blasting away at anything that moves in Sega's interpretation of how *Operation Wolf* should have been done on the Mega Drive! Based on the old Fablet coin-op, *Dynamite Duke* is a first person perspective type shooter where you take on a whole battalion of infantrymen with rifles, grenades, etc. Some items hide more ammo and others restore your health. End of level guardians are included.

SEGA CITYCITYCITYCITY

by Julian Boardman

Did you receive a Sega console for Christmas? If you did, welcome to the only dedicated Sega column around. If there's anything to know, you'll see it here first. Read on and all will be revealed

Virgin/Sega have a bundle of Mega Drive games lined up for 1991. Just get a load of this lot: *Arnold Palmer Golf*, *Columns*, *Cyberball*, *ESWAT*, *Herzog Zwei* (madeupname), *Moonwalker*, *Phantasy Star II*, *Super Monaco GP*, *Mickey Mouse*, *Super Real Basketball* and *Sword of Vermillion*.

And for the Master System you lucky people can also look forward to *Mickey Mouse* and that Sega favourite *Moonwalker*.

It would also appear that Sega have a new styling for the Master System in mind. They plan to introduce a Master System II, which should be aesthetically more in line with the Mega Drive's styling. But do not fear, software compatibility will not be affected, all Master System games will be compatible with both systems.

Rumours abound that Sega are also planning to release a Mega Drive II in the near future. Personally,

The latest controller from the ASCII Corporation allows slow motion and turbo play. Turbo means you get rapid fire with all the lights flashing!

I take all these "enhanced machine" stories with a pinch of salt. Do you really think Sega would bring out a new machine now, just as they are about to clean up in the British console market? The sequel to the Mega Drive is rumoured to have all the hardware capabilities of the Super Famicom, Nintendo's new wonder machine. Virgin, Sega's spokespeople in the UK, were extremely reticent about making a comment. The general feeling is that this is no more than idle speculation on the part of certain trade publica-

tions, and that no changes are planned for the Mega Drive.

If any of you are still having no luck in finding the brilliant John Madden's Football for your Mega Drive, then try Toys-R-Us. The massive chainstore bought the large majority of Electronic Arts' pre-Christmas shipment from the States, leaving next to nothing for the rest of the UK retailers. They were obviously impressed with the game's success in the States and thought they would try to corner the market over here. That's capitalism for you.

ATOMIC ROBO-KID TRECO • £35.00 (import)

Gosh! Look! A shoot-'em-up on the Mega Drive! Gee, what a surprise!

Atomic Robo-Kid is a direct conversion of Activision's release of earlier this year, and to be honest very little has changed from that version.

The scenario is disturbingly unpretentious. Basically, the Robo-Kid has just graduated from the university of space combat and is now on his first mission: to penetrate deep into enemy territory and destroy everything that moves. Hardly original but it saves paying somebody to make up some totally implausible case history of a boy who's trying to avenge the death of the whole planet.

This bloke can walk and fly despite the fact his squat appearance makes him look like more like a bottle bank than a fighting army. But as he does manage to fly along he can also shoot things, including all the big hairy creatures and huge robots that try to stop him.

Along the way he can these big mosquito thingies who leave power-ups for him. There is only one sort of power-up but shooting that will make it rotate through the options available to the newly graduated fighter. These include: directional bombs, three-way lasers, wide-beam lasers, and five-beam lasers.

Even by today's standards this game is ridiculously difficult. This is mainly because of the amount of wall-mounted lasers that shoot in your direction, they make things bloody difficult, as if there weren't enough problems with all the rest of the buggers firing at you. It soon becomes more of a devious platform

game, but with a lot of fast action, as you try to work out ways of getting past the combinations of guns, gates and robots determined to thwart your every move.

Fun and playable, but certainly nothing new.

Inspired by *Speedball*, the futuristic *Wrestlehead* invites people like the Pac-Man to take on the judo players from Japan.

HEADS UP

Look out for a game called *Head Buster* on the Game Gear. It's just coming out in Japan and features a heavily armed robot, looking much like ED 209 from *RoboCop*, blasting the crap out of all and sundry. There is also a head-to-head option so two of these muthas can fight each other via the cable link.

Vector graphics have hit the Mega Drive! There's *Hard Drivin'* (see

Can you resist the temptation to pop out at midnight and get the latest arcade conversion for the Mega Drive?

Import reviews in this issue) and something called *Star Cruiser*, a 3-D shoot-'em-up that looks as though it could be quite impressive.

Future sports are also coming to

CALLING ALL SEGAPHILES

Whether you've just received a Mega Drive or have owned one for years, you're bound to have been playing it all over Christmas. And with so many hours in front of the console, you must have come up with great tips on your favourite games. Even if you haven't, you can have your say on the Sega world by writing to *Sega City*, RAZE, Unit 3, 7 Back Street, Willshire BA14 8LH. The best tip of the month will get a cart for their Sega.

MEGA DRIVE TOP TEN (JAPAN)

1. Super Monaco GP
2. Strider
3. Columns
4. Burning Force
5. Rainbow Islands Extra
6. Axis
7. Moonwalker
8. Hellfire
9. Thunder Force 3
10. Cyberball

the Mega Drive. Something called *Wrestleball* seems to be the game most likely to be doing the business in the land of the rising whale cull in 1991. Seven-men teams take each other on, fighting to the death on a 100-yard, solid-floored pitch. There are both endzones and goals so that both touchdowns and Speedball style goals can be scored. Sounds like a nightmare to me.

Midnight Resistance, Taito top coin-op, should be hitting the Mega Drive in Japan fairly shortly. However, the problems of rotating the gun that plagued the 16-bit computer versions may still be evident. We shall have to wait and see.

GIRLS ON FILM

For those of you out there who enjoy a bit of female wrestling, either watching or taking part, we have got the game for you. *Ringside Angels* features a whole collection of nubile young women just dying to roll around on the floor with other such females. I've always been a big sports fan so this one will definitely be on my shopping list – for review purposes only, you understand.

ASCII Corporation, producers of

MEGA DRIVE TOP TEN (UK*)

1. John Madden's Football
2. Golden Axe
3. Populous
4. Ghouls 'n' Ghosts
5. Revenge of Shinobi
6. World Cup Italia
7. Forgotten Worlds
8. Mystic Defender
9. Budokan
10. Super Hang-On

*Unfortunately, due to the pressures of Christmas, Sega were unable to furnish me with a UK top ten, so these are my predictions for January 1991. I'll let you know how close I get next month.

numerous controllers for the PC Engine, have just released a rather special controller for the Mega Drive called, originally, the Mega Pad. As well as the usual three buttons and the four-way, there's also autofire on buttons B and C, and slow motion and turbo functions. Sounds like a mad way to play around with games and increase either your score on the game or the difficulty of it.

Wrestling as it was meant to be: ladylike and dainty – or is it? Let's hope not as the girls jump in the ring and get down to the wrackeds and back splashes in *Ringside Angel*.

GHOULS 'N' GHOSTS

Mega Drive

The middle of the second level will reveal a monster sitting on some skulls. Don't bother attempting kill him, just run past and head for the earthquake section. Even if he does kill you, you will restart at the beginning of the earthquake section beyond him. Thanks to Sean Doherty of Wigan.

ALTERED BEAST

Mega Drive

To have the power to change your ego on all five levels, according to Darren Baker of Eccles (cake) near Manchester, you must follow these instructions. Hold down A, B and C then the pad down and left and, hey presto, power is yours.

VIGILANTE

Master System

On the title screen hold up and left, then press buttons 1 and 2 at the same time. After a few moments a level select will appear.

R-TYPE

Master System

For this one you will need two controllers (and a few friends). Turn the system off and hold down and left on the left controller whilst pressing up and left on the other. Now turn the machine on and press button 1 to start the game. Fingers (and arms) crossed, your ship should be invincible. Both the above came from Derek Godat in Indiana, USA. Overseas tips are always nice to see.

STRIDER

Mega Drive

Gareth Linton of Suffolk has generously provided us with a cheat for a continue option. Whilst the laughter of the Master is still ringing in your ears after your death, press these buttons in this order: A, C, B, C, A and Start.

SPACE HARRIER II

Mega Drive

Switch on the machine and press buttons A, B, C and right on the joystick simultaneously to get to a jolly useful options screen.

THUNDERFORCE II

Mega Drive

Press button A and Start simultaneously to get to the options screen.

NARLY O E N Z

by Cole Trickle

After the massive Nintendo sales, yet more people are experiencing Nintendomania. Hold onto your seats for RAZE now brings you a full pictorial guide to the newest Super Famicom releases...

After a look at the technical specification of Nintendo's 16-bit Super Famicom last issue, I thought it was about time we looked at some of the amazing software available for the latest console from Japan. Old English proverb say, "Software support maketh the machine". If that's true, Nintendo have one hell of a console on their hands. Just take a look these pictures of the first SF games and judge for yourself.

Pilotwings on the Super Famicom is the ultimate flying game. It's not really a simulation, but it'll be the most fun had in the skies since Chuck Yeager broke the sound barrier. You have a choice of three types of air travel: sky-diving (with parachute), glider or bi-plane.

Pilotwings is the first original games on the Super Famicom that shows what the 16-bit console can really do in the graphics department. Big Run was one of the very first games to be destined for the Super Famicom. Driving a Porsche 959 you race over all types of terrain, from deserts to dirt tracks. The game is based on a Jaleco coin-up of the same name.

*French software house Infogrames were quick to jump on the Super Famicom bandwagon with announcements of both *Sin City* and their popular RPG *Drakken* for the SF. The latter is well into development and is hoped to be released by March.*

THE DUFFER'S GUIDE TO NINTENDOMANIA

Nintendo have been around since 1889. They started out life as a Japanese playing card manufacturer, moving into electronic hand-held games in 1970.

★ Their first video games unit was called the Famicom (Family Computer) and released in Japan in 1983. Two years later – and after sales of 6.5 million – the Famicom was launched in the USA under the title of the Nintendo Entertainment System (shortened to NES). The NES didn't reach Britain till 1986.

★ Despite the technology being eight years old, the NES is still the world's best-selling home video machine, with worldwide sales of almost 50 million units.

★ The first NES "game-pak" to sell over a million copies was *The Legend of Zelda*. This has since been superseded by *Super Mario Bros* with sales of more than ten million!

★ Nintendo claim to hold a 92% share of the US video game market – which was worth about

\$3.4 billion in 1989.

★ The full Nintendo sales mania (led by Mario) has yet to hit the UK. By the end of this year we can expect to see Mario bed spreads, underwear, T-shirts and, possibly, cereal.

★ Nintendo US have a hotline manned by 80 "games counsellors" answering queries from confused gamers. They receive around 80,000 calls a week. A UK equivalent, with six counsellors, is being set up. They hope to receive around 7,500 calls a day by October.

★ The first Game Boy game-pak to enter the UK Gallup chart was *Super Mario Land* at number 19 in the second week of December 1990. *Batman* on the NES zoomed in during the same week at number 18, also making a first appearance for the video games unit.

★ Some of the top stars who own Nintendos are Michael J Fox, Robin Williams, Whoopi Goldberg, Tom Hanks, Bruce Willis and Tom Cruise.

NES TOP TEN (UK)

1. Excitebike
2. Kung Fu
3. Skate or Die
4. Airwolf
5. Duck Hunt
6. Simon's Quest
7. Gumshoe
8. Baseball
9. Rush 'n' Attack
10. Batman

1991 PREVIEW

A look at the first official Nintendo releases of 1991.

GAME BOY

Revenge of the Gator - Played over three scrolling screen areas, pinball finally hits the Game Boy.

Kwikik - A cross between *Salamon's Key* and *Tetris*, and therefore VERY addictive. **Fortress of Fear** - Based on the original *Wizard and Warriors* idea from Rare, this is the tenth game in that series. Reviewed in Import last issue.

Double Dragon - Total mayhem in the hand-held version of the old arcade beat-'em-up. Two-player compatible.

Spider-Man - Mary Jane gets kidnapped and Peter Parker in arachnid form must swing his way across the city to rescue her.

NES

Mega Man 2 - The world's toughest hero returns to battle it out with Dr. Wily, the world's most evil megalomaniac.

Stealth ATF - Sadly, it looks like another *Afterburner* clone.

Ghostbusters II - Could be one of the most graphically impressive games for the NES this year.

Pinbot - A space age pinball game that looks like it'll give the PC Engine's *Devil Crash* a run for its money.

Snake, Rattle 'n' Roll - In typical Rare fashion this game is totally original and full of humor.

Solar Jetman - Another Rare creation, where Jetman reprises his role as the intergalactic adventurer of the classic *Spectron* games, *Lunar Jetman* and *Jetpac*. **Duck Tales** - Designed by Disney to appeal to the younger NES owner. Looks cute and plays hard.

Bayou Billy - Arcade adventure where Billy must save his girlfriend Annabelle from a fate worse than death - a night out with *Goat*. Uses the Zapper Gun in some levels.

Super Off Road - Updated version of *Super Sprint* with all the playability and more than enough pick-ups.

Every console must have its launch version of *Ghost's 'n' Ghosts* and the SF is no exception. When the Mega Drive was launched in Japan, G 'n' G was the game that everyone was talking about. Judging by the outstanding graphics in the Super Famicom version, the same could be said here.

After looking at Arnold Palmer's *Golf* on the Mega Drive, I was a bit worried about leaving the Nintendo camp for a decent golf game. However, I wouldn't have treated for *Mal*. Laboratory have announced *Mal* in One for release on the Super Famicom in February. Great graphics, like reflective water, and some good intermission screens showing things like the club house and a 3-D map of the hole should make this the best golfing game EVER!

ROBOCOP NES

After *RoboCop* is killed, press A, B, SELECT then START. You will now return to the title screen with unlimited continues. Thanks to top tipster Derek Godat from Indiana, USA.

POW NES

Press A, B, B, UP, DOWN, LEFT and START on the title screen and you will get 20 lives when the game starts. Another useful tip from our American pal, Derek.

COBRA TRIANGLE NES

If you keep pressing A before every stage, you will pick up 1,000 points. Similarly, if you hold down left while you jump at the end of every stage, you will pick up 1,000 points for each spin. Much gratitude on banded knee to Sean Sadler from Manchester.

TETRIS

Game Boy

With *Tetris* coming free with the Game Boy, I've been absolutely flooded with tips for the classic Russian puzzle game. Here's another *Tet* tip, this time from Jonathan Foley in Colchester. Press down and start on the title screen and a heart will appear confirming you have chosen the super fast game.

CASTLEVANIA

Game Boy

Jonathan Foley has been hard at work finding the extra lives. Level one: Using the powered-up whip, shoot the token with the fireball and the 1-UP will fall to the ground. Level two: Run and jump across all three moving platforms, but don't use your whip in the air. Level three: Wait for the ceiling to fall then hit the tower four times. Quickly run back to the torch. Jump and whip it to collect the 1-UP.

28 DAYS AWAY!

Next month I'll have an EXCLUSIVE interview with the top guys at Nintendo's official distributor Bandai. They'll be revealing plans for 1991, their hopes for the Game Boy and, perhaps, a bit of news about a UK release of the Super Famicom. It'll all be in the next issue of RAZE so don't miss it.

If you've got any queries or questions about any Nintendo-related subject - games or hardware - send them to the usual address. Similarly, if you have any cheats or hints on Game Boy and NES send them to *Nearly Nintendo*, RAZE, Unit 3, 7 Back Street, Trowbridge BA14 8JH. Sender of the best tip/letter gets a game card for their machine.

NES TOP TEN (JAPAN)

1. Dracula Junior
2. Dr Mario
3. Rockman 3
4. SD Gundam
5. Super Mario Bros 3
6. Last Armageddon
7. Tetris
8. Dragonball
9. Captain Tsubasa 2
10. Super Mario Bros 1

Actraiser is a strange title for a game, perhaps this one should be called *Helicopters* as the action is so violent, the opposition will be raising hell every time you pick up the joystick. In tasteful Japanese tradition, Quintel released *Actraiser* just in time for the peace-giving Christmas season.

If there's one game that nearly every Nintendo console owner has played it must be *Gradius* (aka *Nemesis*). The *Gradius* series has now become a trilogy with the release of *Gradius III* on the Super Famicom last month.

GAME BOY TOP TEN (JAPAN)

1. F-1 Race
2. Dr Mario
3. Super Mario Land
4. Tetris
5. Twin Bee
6. Aleisa
7. Pac-Man
8. Golf
9. Parasail - hem - be
10. Radar Simulation

KNACKS

by Shintaro Kanaaya

Konnichi wa, dudes. You're starting at the only page 100% dedicated to the PC Engine and its many clones. For the hottest gossip, most comprehensive tips and the latest game releases for the Engine, stick right here.

The PC Engine is now a three-button machine. Well, in a round-about manner. NEC Avenue have just released a joystick with three fire buttons (rather than the standard two) plus the usual Select and Run buttons.

In truth the third trigger is nothing more than a convenient button which can act as either Select or Run. Via a couple of switches on top of the joystick, you can determine which key the third button emulates and the speed at which it auto repeats.

At first this may seem a daft thing to have, but consider the following.

The Power Console: where is it?

You can, for instance, turn the third fire button into a Run button and set it to rapid auto repeat. The result in a game like *Afterburner* is a slow motion effect as the game is started and paused very quickly.

Come on, NEC, what are you playing at? This joystick is the most useless thing to have appeared for a very a long time. For £13 you can save your finger a journey of about an inch. Thank you, NEC, for being so caring.

MOAN ON

Since my blood pressure is up, I might as well continue my little crusade. Ages ago, in a magazine long gone, I reported the imminent arrival of the Power Console. The Power Console, for those that don't remember, was supposed to be an analogue pilot control stick for the Super Grafx comprising a separate builtin joystick, four fire buttons, clock, calculator and speedometer. The device was scheduled to appear shortly after the Super Grafx's launch.

Here we are in 1991, and it still hasn't arrived. I can only speculate, but taking the *Strider* story below into consideration, it appears as though the Super Grafx has not been the major success everyone was hoping for. There are hardly any SG-only titles and rumour's of new games are non-existent. Oh dear. Still, the Engine's as healthy as ever and the GT looks set to continue and possi-

bly expand the machine's popularity.

Strider, you may remember, was supposed to be released alongside the SG. Like the Power Console, it has failed to materialise. The good news is that it is coming. The bad news, as far as SG owners are concerned, is that there will be no SG-specific game. *Strider* will only make use of the PC Engine's graphics capabilities.

PLAY ON

There's just room to tell you of some exciting new Engine releases that you really shouldn't miss. Taito's Championship Wrestler looks set to steal *Pro Wrestling's* thunder. Up to four people can play the Taito wrestling game which comes packed with different moves. Although difficult to start with because of all the moves available, *Championship Wrestler* is very rewarding once mastered.

Another sports simulation offering a four player challenge is *Final Match Tennis*. All the favourites like Lenti, Heckler, Iceberg and Hawk are there to train and test you. You can compete in matches or practice against a serving machine.

Other titles due soon are *TV Sports Football*, *Marble Madness* and *It Came From the Desert*. Further into 1991 will see the release of *Populous*. Until next month, keep reaching for your Run button.

NEC Avenue's new controller for the Engine will save your forefinger an inch and cost your pocket £13.

PC ENGINE TOP 10 (JAPAN)

1. Momotaroh Katsa Geki
2. Last Armageddon
3. Afterburner 2
4. The Legend of Valkyrie
5. Legend of Momotaroh Turbo
6. F1 Triple Battle
7. Varis III
8. Batman
9. Captain Tsubasa 2
10. Super Mario Bros 1

DEVIL CRASH

Use the password AAAAAA-HAAA for unlimited balls. Alternatively, the password DAVIDWHITE will get you to the end of the game.

VALIS II

Press the following keys in sequence for a sound test and level select screen: joystick up, I, Select, II, joystick down, Run.

NINJA SPIRIT

During the title screen press the following keys for a level select screen: II, I, II, II, I, II, Select, Start.

BLOODY WOLF

On the title screen press II, I, I, II, I, II, I, and then joystick up for the first stage, joystick up and right for level two, joystick right for level three, joystick down and right for level four, and so on until up and right for the final level.

BLAZING LAZERS

Hold Select and hit Run during the title screen for 30 continues.

DIE HARD

To get to an extended options screen press joystick up twice, joystick left three times, joystick down once followed by Run. If you hear a click you'll know the cheat is operational.

AFTERBURNER II

On starting the game move your craft to the bottom right of the screen and stick to level two. Do this for every level except levels six and seven, where you'll have to move to the bottom left of the screen. You should finish the game without having to touch the joystick.

RABIO LEPUS

Hold down Select, press button I, once; button II, twice; button I, three times; and finally button II, four times. For your efforts you'll be awarded six credits.

TIP TACKS

Got any NEC nibblers? The juiciest tip printed each month wins the author the latest PC Engine game. Get scribbling to NEC Knacks, RAZE, Unit 3, 7 Back Street, Trowbridge, Wiltshire BA14 8LH.

ATARI ATTACK

by Richard Monteiro

You've made the right console choice this Christmas, now make the right column choice by sticking with Atari Attack. After all, where else can you get the latest information on releases for your machine together with the hottest hints and tips. Do yourself a favour and don't plug into anything else.

Now that you've got your new Lynx, you'll want to know what titles are available. Stop off here for a romp through the carts that really should grace your machine.

KLAX

The "ooh", "uhh" and "yeah" sound samples in Klax have to be heard to be believed. They are so clear and add much to the game.

This mighty number was raved in issue three of RAZE. A stunning conversion of the coin-op classic. Without doubt this is the best version of Klax ever. The graphics are superb, the playability very addictive, and the sampled sound effects absolutely stunning. The aim is simply to arrange falling tiles in diagonal, horizontal or vertical lines. Simply to play, a lifetime to master. Get it!

SLIMEWORLD

Have a completely disgusting journey in a slime-filled world. Buger monsters, pus-packed blisters that burst in your face and deep cavities oozing with gooey substances are just some of your nightmares. On the bright side, there are gems to collect and a friend can join you in the muck. Another game very worthy of its rave review in RAZE issue 1.

XENOPHOBE

You play either Dr Pink, Mr M Brace, Col Schickin, Dr Zordir, Mr Eeeez, Dr Kwak, Mr Fogg, UZ R B52, Col Truth or the mean, green alien fighting machine (the alien can only be chosen in two-player mode). Like the characters, this exploration shoot-'em-up is crammed with humour. The graphics and animation are a real treat.

GAUNTLET: THE THIRD ENCOUNTER

Back to the dungeons you go. Only this time you can be a wizard, android, punk rocker, pirate, gun fighter, valkyrie, nerd, or samurai. Up to four players can join in via the Comlynx for a truly epic adventure. Forget previous version of Gauntlet - this is the definitive. With more enemies, more levels and more treasure than ever before, this is a quest you won't return from in a long while.

Your ultimate aim in Gauntlet: The Third Encounter is to rescue the Star Gem and save the world. This is the first game to allow up to four players to interact simultaneously.

Welcome to the biggest ever collection of Lynx game hints and tips. Remember, the best tip printed each month wins the author the latest release for the Lynx. Take E Assooku and his Gates of Zendocon and California Games cheats. His efforts win him a copy of *Zorlor Mercenary*. So come on you lot, you know it makes sense. Get writing to Atari Attack, RAZE, Unit 3, 7 Back Street, Trowbridge, Wiltshire, BA14 8LH.

make a large cross or x. For you efforts you'll be awarded 700,000 bonus points and be warped straight to level 56.

Adrian McHeriot, Trowbridge

GATES OF ZENDOCON

Type in TRYX on the password screen. Ensure you press and hold down the right and down joypad directional keys so you crash straight through the floor of the level. Enter the gateway at the end of the level. The next level will come as a big surprise; not only do you get to pick up the most amazing weaponry, but you also get to meet up with Dave, RJ, Peter, RG, LX and Tom - the guys involved in the development of the Lynx! Finally, enter ZETA at the password screen to get to the lost land. E Assooku, London

MS PACMAN

During the game, press the button sandwiched between the words Restart and Flip to pause the game. Press buttons A, B and Option 1 simultaneously to force a speed-up symbol to appear at the top of the screen. Because the Lynx isn't accustomed, you might find it fails to register the cheat the first time you try it. The best thing to do is press buttons A and B at the same time and then a fraction of a second later press the Option 1 key. Get back into the game and press button A or B to get a turbo Ms Pacman for about 15 seconds. The procedure can be repeated any amount of times.

Adrian McHeriot, Trowbridge

KLAX

Select wave 11 (highest level played) before starting the game. Play as usual - however, it is imperative on this level that you

CALIFORNIA GAMES

During the Halfpipe game option 2 to zoom in and out. To get the maximum height you must hold the down joypad key when travelling downwards and the up key when going up. Change from down to up before crossing the centre line.

During the Surfing section don't be tempted to go straight for 360s. Instead go up and down the wave in diagonals to build up speed. At the top and bottom of the wave make small, tight turns. Continue this until you really are shifting and then make quadruple and even quintuple spins.

CHIP'S CHALLENGE

Just when you thought you'd heard the last of this fabulous game, along comes Adrian with codes for levels 100 through to 144.

COMING SOON

Just check out the list of games coming your way this year: APB, Basketbrawl, Blockout, Chequered Flag, Grid Runner, NFL Super-Bowl, Pacland, Pinball Shuffle, Rampage, Robo Squash, Rygar, Scrapydog Dog, Shanghai, Turbo Sub, Tournament Cyberball, Victindors, Warbirds, and World Cup Soccer. It is also rumoured that the titles 3D Barrage, 720 Degrees, Lynx Casino, Ninja Gaiden, STUN Runner and Xybots will be making an appearance this year. 1991 looks like being a vintage year.

ZARATHRUSTA

AMIGA

ZARATHRUSTA,
inspired by the Award
Winning masterpiece THRUST.

RAZE - "Zarathrusta looks set to revive its
cult roots and become the hit of 1991".

HEWSON

For Mail Order send a cheque/P.O. to Hewson Commodore Ltd, Oxford by credit card by sending your Access/Barclaycard number, and enclose a specimen signature. Don't forget to provide your name and address. Hewson, Milton Park, Didcot, Oxon, OX14 4RF. Tel: (0295) 829299. Fax: (0295) 861099. We get on for continuing development of innovative software we are always happy to evaluate software sent to us with a view to publication.

COMMODORE CORRAL

by Lee Ellis

Hands up if you received a C64GS for Christmas. Commodore reckon they'll have sold 80,000 over the holiday period, are you one of the merry many?

With an estimated 100,000 C64GS machines sold by Easter, Commodore should be raking the money in. Software producers aren't stupid either, they're producing games in plentiful.

System 3, them of Ninja fame (or infamy) have a couple of games scheduled for release around April. *Turbo Charge* is a lightning fast racing game and *Putty* is an outrageous puzzle adventure where you have to bend, stretch and inflate your way through various levels - sounds weird.

From Ocean comes *Toki* where you must guide the eponymous character through various fights to rescue his princess. Look out for it at the very end of February for £19.99.

For the more serious gamers players among you Mindscape are releasing *Battle Chess* and *Ultima VI* at the end of January. Both are

priced at £25. *Battle Chess* has gained much praise for its graphics, while the *Ultima* series is probably the most enduring RPG collection around.

Titus, who are frantically trying to get *Dick Tracy* out, have *Crime Does Not Pay* for February. In *Crime* you have to search over 200 venues of the city in an attempt to control the rife power and corruption - sounds fun. *Wild Streets*, which came out last year on cassette, is reissued on cartridge in March.

The Disk Co have a load of stuff out at the moment. For instance, there's Graftgold's *Stunt Car Racer*, an exciting vector graphics 3-D dragster sim; *Rick Dangerous*, the addictive and humorous platform adventure; and *MicroProse Soccer* which I prefer to *Kick Off* on the C64.

Following last month's revelations about the Ninja games ready for cartridge treatment, System 3 have kind-

A sneak look at the fourth Ninja game, *Last Ninja 3* - don't forget *Ninja Remix* - fighting fit and ready for action on the C64GS.

ly furnished me with some screenshots for *Last Ninja 3*. This is the fourth Ninja game - when will it all end?

COMMODORE CARDIACS

Keep sending those tips in. From next month I'll be printing the best which will win the sender a C64GS cartridge - not bad for the price of a stamp. Send your tips to: Commodore CORRAL, RAZE, Unit 3, 7 Back Street, Trowbridge, Wiltshire BA14 8LH. Catch you later...

AMSTRAD BOTS

by David Goliath

After the initial rereleases, the GX4000 is now receiving first-time Amstrad product specially developed for the console

Before I tell of the new GX4000 games, here's some you may not realise have been rereleased. Ocean have *Batman - The Movie*, *Operation Thunderbolt* and *Barbarian II*. All should be out now.

Sports games seem to be making their mark with *Pro Tennis Tour* from Ubi Soft and *Tennis Cup II* from Loriciels. Both these French games team up with *World of Sports* from Epyx/US Gold (see last issue). Football freaks aren't going to miss out either, there'll be *Gazza II* by Entertainment International and the classic *Kick Off II* from Anco. Expect the latter two out sometime this month.

Puzzle game fans will be pleased to hear that the all-formats *Klax* has been squeezed into a cartridge by Domark. This great puzzle game will be released at £24.99 alongside *Spill*

Personalities and Ocean's *Plotting*.

Any fans of the martial arts/combat genre will be fighting to get their fists on the new beat-'em-ups for the GX4000. There's *Double Dragon*, *Panza Kick Boxing*, *Wild Streets* by Titus, Tomahawk's *No Exit* and *Switchblade* from racing giants Gremlin.

Undercover operatives should have detected James Bond in *The Spy Who Loved Me* by Domark and *Dick Tracy* from Titus in the shops now.

This month could also see *Copter 271* flying into the charts from Loriciels, with the coin-op conversion of *STUN Runner* from Domark following in February.

Wow, if you got a GX for Christmas, there's no danger of you getting any sleep over the next few months.

AMSTRAD ACTION

Is there something you want to say? Have you discovered an ingenious GX4000 tip? If so, get pen to paper and tell the world about it. Write to: Amstradopolis, RAZE, Unit 3, 7 Back Street, Trowbridge, Wiltshire BA14 8LH.

Holy Amstrad! The copied crusader on the GX at last.

ZARLOR MERCENARY

Bored with life as the office burger-getter, Les Ellis escaped one day, jumped in a fighter ship (left in Trowbridge with the keys in the ignition!) and zoomed off into space...

Sometimes, things get too much to cope with. Boredom is one thing, but when you've clocked *Super Sprint* on the NES, rung all the 0898 numbers in the Sunday Sport and entered just about every competition you could find (even the one for that book on How to Let Computers Run Your Business in the Sunday Times), what more is there to do? Time was running out, you were just about to reach for that book you bought on assembly language when you noticed a small advert in RAZE. The ad read: "Accomplished shoot-'em-up fan required for intergalactic work; much traveling involved; much cleaning driving licence." Mmm, sounded interesting.

Walking into the ordinary-looking corner shop, you soon realise that there is more to this job than you first envisaged. On closer inspection, you discover the shop is in fact an interplanetary space port. Someone shouts your name, you turn around and have a flight jacket stuffed in your face.

The tactics of Zarlor involve all kinds of orbital craft. You have three weapons fixed to your ship to combat these aliens. Missiles are launched out of the nose cone of your ship and travel in a straight line until they hit something. However, some craft will require more than one shot if they're to be turned into space debris. Lasers are more powerful and will hit the nearest craft to your own. While bombs are the ultimate deterrent as they will destroy all around you.

Ground-based laboratories add to the mix. As soon as these bases scroll onto screen you must take them out before they create havoc by launching more ships into the somewhat crowded airspace.

"You're in number five. Jumped to it or you'll miss out on the action," blasts a moustached man in his thirties. You reply with

a bemused what-the-heck's-going-on look. "Look, son, the boss has had a bad day. The Zarlor system have wretched on a cargo deal and he wants to settle an old score. Either jump in number five or get the hell outta here." Cargo deal? Zarlor? What was this guy on about? Still, what the heck, you gotta die of something, right?

As you approach your ship, a flight attendant slips a piece of paper in your hand. "Who do you want with you, sir?" Looking down at the paper, you see you have been loaded a list of co-pilots. There's Search who's proficient with the laser, XD49 likes the wing cannons, Linda's useful with the power shots, Brenda has an outsize unit, Spike has a bank shooter, Rex will control the side shooters and Xerxes can tweak the engines to give you extra speed. It's a tough choice.

GRAPHICS **83%**

- ✓ Great intro and trading screens
- ✓ Good backdrops with smooth scrolling

SOUND **70%**

- ✓ No option to turn off in-game tune
- ✓ Decent blasting effects

PLAYABILITY **72%**

- ✓ Complexes sacrificed for graphics
- ✓ Too repetitive for the price

CQ WILL DO ANYTHING TO AMAZE - WE'LL
EVEN ADVERTISE IN RAZE!!

At CQ we have to say we didn't like The Games Machine much, the reviews were not good enough, so hopefully RAZE is lots better. We are told it will carry masses of Console Action, BEST BE TRUE.

At Console Quest, we will provide hardware & software for the GAMEBOY, MEGADRIVE, FAMICOM, LYNX, NEO-GEO & PC ENGINE. How about a scrummy GAMEBOY & choice of game from £69.50? See, we Amaze at RAZE. Or how about a fabulous MEGADRIVE for £140? Phazed at RAZE eh!!

Our stocks include the following, (all at smashing prices), listed below-

GAMEBOY	PC ENGINE	MEGADRIVE	NEO-GEO
CRIMINALMIND	AFTERBURNER 2	BANGEROUS SEED	BASEBALL
POWER RACER	AERO BLASTER	SHADOW DANCER	GOLF
SKATE OR DIE	OPERATION WOLF	DARUS II	JOY JOY KID
ROBOCOP	VIOLENT SOLDIER	I. MADSEN FOOTIE	VEINAM - '75
TWIN'S	ALICE IN WONDER	CRACKDOWN	BEING HERO
BILLYKID KID	RABBIT LEAPS	TELEMETAL MASTER	LEAGUE BOWLING
CAIRAP	CUTRIN	HARD DRIVING	CYBERLIP
			SUPER SPY

+ Lots, lots more for all formats

We run the OFFICIAL U.K RENTAL club for NEO-GEO GAMES. Please ring.

At Console Quest, we have a games EXCHANGE system for PC ENGINE, MEGADRIVE & GAMEBOY owners. Prices range from £9 to £15 for the PC ENGINE, £15 for the GAMEBOY and £15 to £25 for the MEGADRIVE.

We are here to help you obtain the maximum pleasure from your machine. At Console Quest, we play them too, you know!

RAVE

LEMMINGS

To save hundreds of Lemmings meant that Julian Boardman would have to go green, and that's not because of the ten pints he had the night before

For those of you that don't know, Lemmings are vole-like rodents that have this odd habit of following each other around like sheep. And if their pastime involves falling off a cliff, all well and good. Obviously this isn't quite as exaggerated in the wild because there aren't that many cliffs for the little buggers to fall off. In the make-believe world of Psygnosis' *Lemmings*, however, there are far too many precarious precipices for the Lemmings to leap from.

Each Lemming begins life as a Walker. It keeps walking until it reaches an obstacle, bumps into it and turns back. Of course, if there's a hole or - worse - a cliff it simply falls down.

Walkers can be assigned various skills (like digging,

climbing or blocking) which help the rest of the Lemmings make their way from one end of the level to their haven at the other. Each of the one-player levels requires a certain percentage to be saved, usually upward of 80% for it to be completed.

Two-player levels feature a split screen with you trying to take as many of your own Lemmings to their haven while preventing your opponent from doing the same. The result is utter mayhem and, usually, the loss of Lemming-life on a huge scale.

With the nightmarish range of hazards, obstacles and yawning chasms to be traversed, any level is usually remarkably difficult but extremely entertaining. Fun, very competitive and horrendously addictive.

Here's a complete map of level two. Things are complicated in this world by the fact that there are two entrances for the Lemmings to fall from. In fact, it's just the start of your nightmare because to the left of one entrance is a steep drop while to the right there's a boiling bath. The second entrance faces no better as it has a boiling bath to the left and numerous traps to the right. Ha, ha, ha. Might as well make the lot of them weel! Perhaps not; spare a Lemming to follow the RAZE guide to life...

Lemmings come pouring out of the entrance above, so you've got to be quick to block off any exits that might lead them into trouble. Here you can see how the Stoppers have prevented Lemmings leaping into a boiling bath and walking into the entrance. Notice also how a Digger is diverting the rest of the clan out of trouble and to safer ground below. Sacrifice a few to save many.

A Lemming's lot is most definitely an unhappy one. Not only are there countless ways for them to die, they simply don't give a damn and seem only too keen to jump off a cliff or land in boiling water.

You've been it's been a tough journey, but the rewards are high.

Send a Climber over the column to the right. Get him to walk over here and build a bridge so that the rest of the Lemmings can get home safely.

Position a Blocker where you see the entrance. Once all the Lemmings are out get a Digger to dig straight down. Don't forget to get a couple of Bombers to launch a hole through the columns below.

- Decreases dropping Lemmings from entrance (or rather exit) from other world).
- Increases dropping Lemmings. The figure above shows drops per minute (dpm).
- Turns a Lemming into a jolly clown for getting over tall obstacles.
- Provides a Lemming with an umbrella for a safe landing when leaping.
- Blows up a Lemming after five seconds. Actually, only landscape is damaged.
- Knows to all as Push-Me or Stepper. Prevents others passing.
- This Lemming, once converted, will build a bridge.
- The Seawall Slinger, AKA the Builder, digs through walls.
- Turns a Lemming into a diagonally digging Miner.
- Digger will haul straight down to death or glory. Deadly in two-player.
- Poise. As in pews – goddii?
- Genocide. Wastes all Lemmings left alive in scenario. Such a waste of life – but fun!

In two-player mode the objective is twofold: get your Lemmings home safely while inflicting as much damage into your opponent's Lemming body count. The screen is split vertically down the middle; you on one side, your opponent on the other. It's most satisfying to see tens of your opponent's Lemmings drop down a huge hole dug by one of your fellows. Some levels require you to help each other out to get home, Lemmings belonging to your opponent that end up inside your base, add to your tally at the end.

DAVE JONES: ONE MAN AND HIS LEMMINGS.
This Dave Jones chap is the kind of bloke you'd apologise to if he knocked over your pint. In fact, you'd probably offer to buy him another one to make up for the inconvenience. In short, the bloke is big, and he's got a handshake that could cripple a freemason. Dave's background lies on the Spectrum, but it was his company DMA Design that was responsible for *Menace* and the incredible *Blood Money*.

IBM PC PSYGNOSIS CTBA ● PREVIEW

The top level is best completed using one Lemming to create a path for the others. As soon as the second Lemming gets to the bottom of the level turn it into a blocker, then increase the drop rate to the maximum (99). When the lone Lemming reaches the first pillar turn it into a Basher. Do this again on the second pillar. On the third pillar use a Miner. Once he has dug through he will be trapped under the steps; get him to dig diagonally to make a hole under the steps, then turn him into a builder to step him digging too deep. Once he is out he will continue onto the chasm. The rest is obvious.

Lemmings should never come this far. There are too many traps – besides the relatively short time you've got to complete this world making this route is prohibitive.

ESWAT

Forever firing blanks, our Les Ellis gets a run in with the boys in blue and decides his pink pyjamas aren't the thing for a master criminal

Meet the bad, red lads you've got to put behind bars. From left to right, Fireman Fatman, Skid Row Skinny, Barber Beard.

Although the main character may look like he'd kick RoboCop's ass any day, the gameplay is far from punishing. On my first go I got straight through to the third level, although the level of difficulty does increase when you enter the ESWAT mode. Still, the presentation's well up to scratch, with some impressive animation and it should have a few masochists play in it for the average player.

In two-player mode, both players share the environment simultaneously and should team up if they are to get anywhere. Below you can see what to expect in the first stage.

Of course I thought ESWAT must, as they've chosen me to write the review, stand for Extra Special Writers And Talent. I was a mite surprised when I found out it stood for Enhanced Special Weapons And Tactics - oh, well. The ESWAT team are the elite police of the force using the very latest technology to combat crime. But you probably knew that as the ESWAT coin-op has already been converted to the Sega Master System and Mega Drive.

You play a lowly SWAT officer in Cyber City. Sitting at home one day, and not at all happy with your lot in life, you decided to get up and do something about it. Your ultimate aim is to reach the heady heights of the ESWAT team, but to join the merry band of finely tuned individuals, you must kill a certain number of difficult bad guys and expose their leaders. Only when you have proven your worth will the ESWAT team allow you to become one of the lads.

SEGA MASTER SYSTEM \$29.99 • REVIEW 44

MEGA DRIVE CTBA • PREVIEW

You start off at the rank of coplain. To earn your stripes you must just make it to the end of the district. Here you will encounter the huge and of level crime boss who must - in the tradition of all the great cop movies - be killed and not arrested. Eventually, after climbing from coplain to chief, you'll get your much sought after promotion to the rank of the ESWAT unit.

With your promotion to the ESWAT department comes a completely new set of body armour - and pretty neat kit it is too. But even with your new position, your task is still to clean the city streets of the scum knaws as people, and despite your new opponent the bad guys get increasingly harder to wipe out.

DRAGON'S LAIR II

TIME WARP

Dick the daring is not something that Richard Monteiro could be called. Julian Boardman, however, is a different breed altogether

It's just a jump to the left/And then a step to the ri-i-i-ght/With your hands on your hips/You bring your knees in ti-i-ght/And it's the pelvic thru-u-husts/That really drive you insayayayayaaaan/ Leeeeee't's dooo the Tiime Waaarp again.

Sorry, folks, but it had to be said, such a glorious party anthem like that could not go unrecognized in the game which clearly took its idea from that seminal stage show, well its title at least.

Don Bluth has presented us with the long-awaited sequel to the much

Dick confronts Mordoc. Mordoc swings the sword at Dick's head as the knight reaches for the ring. Dick must jump, first from the ledge and then away from the attacking Mordoc.

TOUGH CHOICES

For those of you unfamiliar with Don's work, his games function in a fairly unusual manner. You are presented with an animated tableau which requires a response in the form of a move in one of four directions or a bit of sword bashing. The gamesplaying comes from working out which move to make and when to make it. Often, though, to make things more complicated, a situation may require more than one move to get out of it alive. Once it is all worked out it gives you time to enjoy the comedy in the larger than life animations.

Followed by his screaming mother-in-law, Dirk finds himself on the drawbridge of a familiar castle. In the water below, several green tentacles watch and wait as Dirk swims toward. Dirk must avoid the tentacles, keep an eye open for his mother-in-law and flee into the castle.

Dirk sees the opportunity to escape from the pheromocytols that have grabbed in this prehistoric time. As the leathery dinosaur flaps its wings, Dirk must free himself and attempt to land on the ledge without injury.

THE DON'S WORK

Don Bluth's previous work in the cinema, after leaving Walt Disney in 1979 to go his own way and form Sullivan Bluth in 1984, includes last year's *All Dogs go to Heaven*, and one for the kids a few years earlier, *The Secret of NIMH*.

Sullivan Bluth are moving into multimedia now and hope to release all their past titles — *Dragon's Lair*, *Space Ace* etc. — on console with a view to CD-ROM/CD-I. The first title to appear on the shiny formats is likely to be a shelved laserdisc product called *The Sea Beast*, which has been sitting around since the failure of the laserdisc system used for *Dragon's Lair* and *Space Ace*.

acclaimed *Dragon's Lair*, which in itself brought a whole new area to computer gaming: interactive cartoon adventures. *Dragon's Lair* first made its way into the arcades via laserdisc, and it drew a large amount of media attention at the time. Sadly, though, the machines themselves were a little unreliable and the arcades soon tired of the hassles involved.

This time, however, Dirk is back trying to save the Princess Daphne from a fate worse than death in another time zone, marriage to the evil wizard Mordroc. Not only that, his mother-in-law, Daffy's mother, is extremely annoyed that Dirk has let all this happen again and is out to clobber Dirk with her rolling pin before he can say, "But Murney, I only went for a pee and when I came back she had been whisked off to a wrinkle in time, and anyway the sparkie had left our marriage." Things are not going

well for Dirk.

It is expensive but it is six disks of fun and the challenge of finding the right move is just as entertaining as any other game I could think of — and, it is just so damn funny.

Falling through the hole above, Dirk appears in a treasure room on top of a talking floor machine. Behind him a large, green serpent rises out of the coils that fill the room. Dirk must hit the snake's head and avoid the coils trying to wrap themselves around him.

PANG

Should The Software Business be feeling pangs of guilt over this release? Are the folks at TSB saying oops on seeing this latest coin-op conversion? Les Ellis reckons they'll not be answering the phone for a few months

Okay, so Ocean's *Pang* looks exactly the same and plays exactly the same as The Software Business's *Oops Up*, but who's imitating who. *Oops Up* has some claim to originality by being the first to be released on computer some five months ago, but Ocean have a fair point when they say that their game is based on an old Taito coin-op. Not wishing to side with either company, RAZE must say that both are as good as each other. But at least the scenarios aren't too similar.

The world has been invaded by floating balloons (stop laughing, it happens all the time - almost) and it is *Pang*'s job to burst them all. Shooting some balloons will release mystery icons. These will either turn out to be weapons, bonuses or harmful objects (so watch out!).

Oops Up - whoops, Freudian

Pang travels to Ramsay Street. Heavy, more occasional to throwing beach balls, is nowhere to be seen. Here you can see the four sizes of balloon you're likely to encounter. The size icon shows multiple shots - suits useful for when you freeze balloons methinks...

slip - *Pang* allows two players onscreen simultaneously which, as usual, increases the fun immensely. The second player can join at any time during the game, which is useful if you need extra help to get past some of the later levels - and you will.

The balloons have invaded 17 countries of the world and you

must travel to each and clear the skies. The air is full of balloons of all sizes, ranging from whoppers, which split up when shot, to toddlers that don't bounce very high and are thus hard to shoot.

My only question is that in this age of AIDS, should we be promoting something which encourages you to get rid of balloons?

Balloon-busting at Auker Watt. The experienced hero encounters the two biggest balloons you're likely to see this side of Dudley Parkton. This shouldn't present too many problems if you concentrate on the balloon at a time.

SWITCHBLADE

*Julian Boardman
dusts off the GX4000
to play Gremlin's
first console game*

*A couple of Measleses, those
"fierce cybernetically enhanced
sargent-men armed with powerful
mechanical claws", ask Hiro to fer a
cup of tea.*

Our hero, Hiro, is a lonely chap, being the last of the Bladeknights and all. The thing is, someone called Havok created havoc (where do they get these names?) by coming along and wiping out the inhabitants of the Undercity on the Cyberplanet of Thraxx. This all happened because some clutz dropped the protective Fireblade shattering it into 16 pieces. This left the inhabitants a little vulnerable to Havok who waltzed in and killed them all, except our Hiro. Feeling a bit disturbed, Hiro has taken it upon himself to avenge his people and kill Havok.

The platform action that ensues brings on a hideous amount of cybernetic dorks all hell-bent on providing

you with target practice. None of them really present any danger on the first few levels, merely a nuisance, and for the first ten minutes or so it makes the game little more interesting than watching John Major.

The really odd thing about it is that after these first few minutes the gameplay picks up and you find yourself getting involved, almost despite yourself, into finding your way around the levels.

Switchblade can't hope to appeal to anyone entering their teens or older. This isn't because the game's bad, it's just that the gameplay is very simple. The age of GX4000 owners is very young anyway so this shouldn't be too much of a stumbling block for the game.

Our lone hero has seven weapons at his disposal as well as his hand-to-hand skills. They are:

BLADE: The length of the combat power meter determines the range of this weapon.

SCORCHBALL: As above, however, this weapon will take multiple hits on an enemy and will only stop when it hits a solid wall or exceeds its range.

DARE: Of limited range and the combat power meter has no effect on it.

SPINBLADE: Length of the CPM determines the speed at which this weapon is fired.

NEEDLE BOLTS: Length of the CPM affects the number of bolts fired and therefore the hit-power of the weapon.

TRISPIKE: Unlimited range and the CPM has no effect on its power.

FIREBLADE: The most powerful weapon available and the only one that can defeat Havok with its unlimited range. The CPM has no effect.

GRAPHICS **74%**

ATF II

It's either arcade action or a flight sim for the simple minded. Hoping it was the latter, Julian Boardman tried to join the flight sim fraternity

There's something celestial about flying through the skies, surveying all around you and contemplating life, the universe etc. Personally, the nearest I've come to flying is on the odd occasion I hand my reviews in late - but that's a different type of kinetic energy.

ATF II is based on the *Advanced Tactical Fighter* which will be in service in the 21st century. You view the ATF from behind its tail, flying into the 3-D environment. You have eight categories of target to annihilate, on air, land and sea.

Where *ATF II* differs from games like *Afterburner*, is in the element of strategy involved before you can get your teeth into the arcade action. Prior to each flight you get a mission briefing showing your objectives in a certain area. You can choose in which area you wish to fly from the eight available or select the random facility. Once your objectives have been

At this screen you can choose which part of the world you wish to fly to, or select *Random* (and leave it to the computer). While the scenery changes from location to location, the foes and targets you meet knock out remain the same.

From the top left, clockwise, the ATF is just missing the runway, preparing to take off its enemy of those living enemy jiggers he can possibly find. An enemy fighter closes in from the right... and gets in behind the ATF. It could be all over... but some nifty manoeuvring gets the enemy plane right in the ATF's sights...

HEADS UP TACTICAL FIGHTER COMING YOUR WAY

The lefthand vertical scale of the HUD shows thrust setting (solid triangle) and speed (pointer). Below that the selected weapon is shown and the number left. The righthand vertical scale shows ground level (solid triangle) and altitude (pointer). Below this the bearing and range of the selected target are displayed. The horizontal scale shows the compass heading of your craft (pointer) and the bearing of the selected target (solid triangle). If the bearing is off, the scale a pointer will show you which way to turn.

VT: Vertical Thrust. Used to slow down in combat.

RL: Will make the ATF perform a barrel roll.

W: Weapon Select.

UC: Undercarriage.

AL: Automatic Landing at home base.

TF: Terrain Following Radar.

shown you must load up the craft with weapons and fuel, adjusting the elements according to your mission requirements. Missions are many and varied, and only a true expert will be able to adjust to all the environments encountered.

The mouse-activated instrument panel has three Multi Function Displays (MFDs) that lie between the throttle on the left and the eject lever on the right. The lefthand MFD shows the weapons status screen, which will display the selected weapon and the number left. The centro MFD shows a small scale schematic map which gives details of enemy and allied positions in the host area. The righthand MFD shows the target solution area. From here you can select the nearest target, enemy or allied, to fly towards; enemy targets are always in red. Known enemy positions will result in a compass reading and a distance. If more than one position is known of a certain type of target then clicking on "A" or "C" will flick through the other targets.

This is the pre-flight briefing of the ATC, where you are given a description of the map of the particular area of the world that has been selected. Just below the level of the map it is a message screen where you will read your mission briefing, usually a description of known targets.

ZARATHRUSTA

After missing out on the *Elvira* review, Les Ellis was all worked up for a bit of thrusting

The tyranny of the Empire has gone on for too long. The Resistance is almost ready for their attempt to end the reign of the Emperor.

They have managed to steal several Imperial starships, but there is only one problem. Imperial ships don't use the same

What fun, the cannons are firing at you, the jet flame kills it, you've run out of Coke and now this great makes an appearance behind you.

THRUSTING BACK IN TIME

Zarathrusta is based on an old C64 game called *Thrust*. When programmer Kevin Smith heard of Peter Verswyvelen's reincarnation of his old game on the Amiga he was overjoyed. The holders of the original copyright, MicroProse (through Firebird), also had no qualms about an enhanced and redesigned version of their old budget game. Yes, BUDGET, *Thrust* came out for just a few quid on the C64, and was quickly followed by Spectrum and Amstrad versions.

16-bit versions of the original game are not officially available, but we did manage to get our hands on an unreleased Atari ST version. It seems MicroProse had second thoughts about releasing this version on the ST. Understandably, a true conversion from the 8-bit format would not look too special on the 16-bits, with wire-frame graphics and poor spot effects, but what Newson have done is something else. Graphic artist Erlend Robaye has created some of the most varied and challenging landscapes you're ever likely to want, and programmer Peter Verswyvelen has done wonders with the gameplay and content. Like *Thrust* on Commodore's 8-bit machine, *Zarathrusta* looks like being a cult game on their 16-bit.

A

Your ship battles against the elements to collect the fuel.

B

Zapping these fuel pods with your tractor beam will increase your ever decreasing fuel tanks.

C

This jet thruster will randomly shoot out a jet of flame destroying anything in its path.

D

This is your tractor beam. It is used to pick up pods and collect any extra fuel or boxes.

E

Your shield will prevent you from being destroyed by cannon fire or hitting the sides, but it uses up a lot of fuel.

F

You'll have to keep an eye on your fuel gauge at all times. You'd be amazed how fast the fuel can go down.

power crystals as the resistance craft so someone has to go to the Empire's stronghold on one of their storage planets and get some. Being the bravest/stupidest pilot in the Resistance, you step forward, gladly volunteering your services.

You have to manoeuvre your ship through the planet and its underground network using your thrusters to make those hairline movements. To make it that little harder, the planets are not totally undefended, cannons are dotted around and will fire at you on

sight.

Some planets have reverse gravity, which not only adds to the fun, but is also beneficial if you want to get off the planet quickly without using excessive fuel. Extra fuel can be picked up along the way from containers embedded into the rocky landscape. There are 50 levels to get through which should keep even the most experienced thruster going.

GRAPHICS

WORLD CUP ITALIA '90

*He's football crazy,
he's football mad,
his name's Les Ellis,
and he's a really bad
lad!*

The close-in penalty shoot out on the Range Drive is only available during play. On the Master System, you're able to practise the penalties from the main menu too.

Sega actually squeezed this one out before Christmas, so it looks like the title could be just relevant and they receive the award for the last footy game to be released in the World Cup year. It all seems so long ago now, but just six months back Gazza was crying his eyes out and Maradona was rolling in the grass. *World Cup Italia '90* tries to bring back all the great moments of last year's tournament and does so quite successfully.

You can either enter the tournament proper, practise against the computer, or challenge some dork to a two-player match. Sadly, the tournament is only available to one player. Surprisingly, though, the Master

Who needs Gezza as goal king Ellis sticks another one away in the back of the net.

System version has the added attraction of being able to practise penalties – perhaps the Mega Drive couldn't handle it, ha, ha.

After choosing your arena of combat, you must decide which teams you wish to use. A map of the world is displayed, with teams range in dif-

ficulty just like their real life counterparts. For instance, if you choose to play the Brazilians against the Chinese, whoever's in control of the Brazilian team will have a significant advantage. Each player within the team also has their relative attributes which must be taken into account

when you're choosing you team's players.

As you progress through the World Cup, the opposition get significantly harder. A little tip... Brazil are the best team (nuff said).

While in possession, pressing button A will make you pass the ball, button B will provide a long high kick while button C will kick the ball along the ground.

MEGA DRIVE

COVERT *action*

When it comes to going under the covers, Julian Boardman has no qualms. Particularly when he gets to wear his pink Gus Honeybun slippers

Being the only freelance secret agent in the Western world, Max Remington is something of an enigma. His background is unknown following an identity change, but it is rumoured that he began his distinguished career in the CIA. However, his ability and "Maverick" attitude soon meant he was falling foul of the stringent regulations. The frustration caused him to turn freelance, working for almost every Western government in a very well respected and high-security capacity.

He became very selective about what work he took and when, but he always took the direct requests of the US President, never turning down a plea for help. This is how these adventures begin, a directive from the President.

The CIA in Washington, D.C.

Be on the CIA Remington file

Research Dept.

Operations Dept.

Intelligence Dept.

There are four main elements to the game: Combat, Driving, Electronics (wire-tapping) and Cryptology. Combat is the skill required if any dodgy situations arise with enemy agents, involving shooting and hand-to-hand combat. Combat is joystick controlled and seen in a simplistic, almost diagrammatic fashion from above.

The President can give you no end of changing missions. The mission generator is designed like this so that you will never be able to complete the whole of the game and render it obsolete. All your missions are based here, in the CIA's central control room at Washington.

Before you break into a building, you must decide what to take with you. The automatic handgun is standard issue fitted with a silencer. The gun fires a recently developed type of bullet which stays the target for several hours. The gun takes longer to aim and fire than the UzI. The UzI submachine gun is also fitted with a silencer and fires the new stem round. However, with the UzI you can just blast everything in sight, no messing about with aiming. The camera is very similar to the famous Minix ministers. Coming with 30 exposures, the little camera is easy to use - but once you're out of film, that's it.

GRAPHICS 74%

Mostly functional, even in VGA, but...

...the suspects are instantly recognizable.

SOUND 76%

Supports Roland and AdLib boards.

No extraneous sound effects.

PLAYABILITY 83%

Ever-changing missions are great.

The four sub-games break the tension.

RAVE

Denying that he suffers worse breath than Clifford or hums along to Puff the Magic Dragon, Paul Rigby gets his fingers burnt with this piece of hot property

RISE OF THE DRAGON

The year is 2053. Los Angeles is thick with pollution. The streets are filled with the sick and the homeless, the starving and the desperate. Junkies mix with psychotics, prostitutes with gang leaders. It is a world to compare with the film *Blade Runner* – “down and dirty” as Dynamix call it.

Basically, we have some sort of being out to create havoc by pushing a new type of drug that not only provides immense pleasure, but also a horrible death by mutation. The “thing” behind this

scheme wishes, ultimately, to “restore chaos to the universe and rule once more”.

Of course, as streetwise PI Blade Hunter, you don't believe a word of this superstitious gunk – do you? But when the mayor's daughter falls foul of the killer drug you're hired to track down the fiend behind the whole affair.

Rise of the Dragon sets out to be a good-looking, friendly game that provides depth of gameplay without the brick wall that a dodgy parser can provide and that's just what you get! The game is smoth-

Moving around is simple. You move from your flat to the underground in one location move. From there you can access a travel map. Click on the phone boxes and you're transported straight there. When you find more information from items and characters you may see new places names appearing on maps.

“In the Age of Decay,
Marking the Dawn of Darkness,
The Dragon will arise.
His evil will become an addiction
In the souls of mankind,
And death will be a blessing
To those he has touched.

Many will fear him,
Many will fall before him,
One will sacrifice all to destroy him.”

A FREE STAN BOARDMAN!

Rise of the Dragon is a whopping great game. Around 6MB of code is stuffed onto seven high density 5.25 inch disks (3.5-inch disk are available). Included with the 43-page documentation manual is a 29-page comic book (complete with daff advertisements). Within the comic book is a “step by step guide to private investigation” which takes a tongue-in-cheek look at one or two PI techniques. More importantly, though, it also includes tips on how to use some of the many objects you will come across (such as your ID card, wire tester, bombs, etc).

ered with excellence. The art - it would be insulting to call them graphics - is unsurpassed and the environment almost movie-like.

Once in a while there comes a game that will appeal everyone, this is one such game.

Time plays a big factor in *Dragon*. Events happen at certain times (you get tired and must sleep once it gets too late, for example), and you do have the opportunity to advance the time by minutes or hours if you wish. In addition, characters remember you from previous encounters. You will find that you will get a different response from a character if you chat to them again after an hour's break and then appear after a day's break. Characters may have further information for you the following day.

REVIEWS

LINE OF FIRE

More guns, more mayhem
blood to be spilt.
There's only one
man for the job:
Les Ellis

Very little strategy needed here.
Your secret mission has been
discovered and you'll have to blast
your way out of the enemy base.

How many troops? Let this
chopper at the end of the second
level make some noise. Blasting it
isn't to get past it. Usually,
you've thrown all your grenades,
and these troops do the work.

More death, more mayhem - US Gold had to be involved somewhere. And judging by action-packed, bullet-bursting content, this game just has to be based on a Sega coin-op.

You have infiltrated a guerrilla base and captured a new secret type of machine gun. Unfortunately, you have been spotted attempting to make your escape and must now blast your way out of the camp, through the jungle, and back to your home base. The guerrillas have a huge arsenal of weapons at their disposal, most of which you will undoubtedly see during your escape attempt.

One or two players can play simultaneously and the whole game smacks of *Operation Wolf*. This isn't a bad thing, as the concept in itself is quite exciting, but with two *Operation* games already out on computer, you may be a bit tired of the formula.

Because the end-of-level guardians stick to their own sides, firing off rockets all the while, the game is much harder in one-player mode. In fact, it's better to slip the game into two-player mode and grab both joysticks yourself.

WRATH *of the* DEMON

If this review wasn't ready by the end of the day, Julian Boardman would feel the wrath of Richard Monteiro never mind some poxy demon

They are a strange lot these wizards, all enigmatic and sometimes eccentric. The best ones are in possession of so much power that they sometimes lose control, go insane, mad, completely Dr Zak and try and do something reeeaaaally stupid.

That is what happened here. A wizard, known as Anthrax (or Sheep-death to his friends), tried to summon a long-dead demon to perform his will, that is to kill the king and take over the entire kingdom for this wizard. Now, the demon had been asleep for several hundred years and was a tad annoyed at being woken up — you know how it is, you're in the middle of a dream and

PLAYING TIPS

- ★ Try to keep hold of your potions. They will become more useful as the game progresses.
- ★ Never let a monster push you into a corner.
- ★ At certain points in the game it may well be worth making a map.
- ★ Save the game between each of the scenes.

some bugger comes along and ruins it. Anyway, this demon says "Yeah, sure I'll do that, but not for you" and promptly kills him in a very Clive Barkeresque exhibition of storm wielding and general devilishness.

The king soon becomes aware that a lot of very nasty little creatures are wandering around his world knocking off all and sundry at the behest of this particular demon who is exercising his wrath (geddit?). You, being a tad unlucky, happen to stumble across this demon ripping the throat out of a messenger who was

This is where the story is told prior to the game. In this particular scene, the message that should have made it to the knight has been found in the hand of the murdered messenger. From here on in it's all down to you.

calling the land's bravest knight. The knight and the messenger were soon dead and the king called upon you to take his place and free the land of evil.

So there you are, slung into this *Shadow of the Beast* style action adventure. Loads of parallax scrolling, hundreds of pretty backgrounds, incredible sound and very childish gameplay that would be more at home on a three year-old platform game.

HOCUS POCUS

The three symbols at the bottom right of the screen correspond to the three different types of potion that you can carry. These potions must be looked after so that they can be used in the right situation and not wasted, only to be regretted later.

- The first, on the left, is a shield potion allowing the hero to become immortal for three seconds (I know it's a contradiction but that's what the manual said).
- The second is a Zap potion, a sort of mediaeval smart bomb, that causes every monster onscreen to die or lose energy. Some monsters may not be adversely affected.
- The third and final potion is for health which will cure all wounds and restore energy to its maximum.

The top left shows how much of your life energy is left in red. The bottom right shows which particular potions you have in your gary (see box).

GRAPHICS 85%

- ✓ Beautiful intermediary screens.
- ✓ 17 levels of parallax scrolling.

SOUND 83%

- ✓ Mystic atmosphere created by tunes.
- ✓ Excellent spot effects.

PLAYABILITY 74%

- ✓ A Very simplistic idea used for the game.
- ✓ Three different types of game.

Battle SQUADRON

The Mega Drive is about as short of shoot-'em-ups as Julian Boardman is of milk bottles (!), but JB finds this one particularly difficult (the shoot-'em-up, that is)

Where would the entertainment industry be without the basic human desire to exact mindless violence on other beings or entities? We'd all be out of a job or go mad from reviewing endless versions of *Tetris*. Having said that, of course, even the shoot-'em-ups can get pretty boring. Thankfully, however, Electronic Arts have come up with a conversion for the Mega Drive that puts a lot of other similar games to shame.

Battle Squadron is just so ridiculously difficult. The challenge is to last more than five minutes with three

Two-player mode is identical to one-player mode with the same number of enemies. This means that one-player mode is more difficult than climbing Everest with your fingerscalds and that two-player mode allows you to wear gloves.

WEAPON SYSTEMS

Five upgrades are available for each of these four weapons (two upgrades are lost each time you die):

RED MAGNETIC TORPS: When fully upgraded these diffusing balls of energy are devastating to the enemy, but are not very effective at first. Try to upgrade them as often as you can.

BLUE ANTI-MATTER PARTICLE BEAM: This weapon is deadly accurate and fires with intense rapidity. This is the only weapon that fires forward and backwards at the same time.

ORANGE MAGMA WAVE: Probably the best combination of weapon power, speed and accuracy. When fully upgraded, the length and width of its devastation zone are incredible.

GREEN EMERALD LASER: This rapid fire laser sends the longest burst into space after a few upgrades. They aren't very wide but a single shot is enough to kill most enemies.

lives. In a word it is a nightmare.

It all revolves around the fact that the Barrax Empire is trying to take over the universe and the Earth Defence fleet has spent many hundreds of years and many lives defending the planet. The cunning thing about the Barrax is that all their weapons, unlike many others, always fire at you; not down in a straight line but at whatever position you happen to be in. Now some technologies have only advanced far enough to facilitate a few of the guns with this effect, but the Barrax have equipped every weapon with this and it makes life bloody difficult.

Making life worse is the fact that you only possess a small number of smart bombs and the enemy normally take four or five hits to kill, even the most basic ones. The usual variety of power-ups is available but even the ships carrying them shoot at you: things sure ain't what they used to be.

This all comes out in the end as one of the most taxing games I have seen for a long time. But what makes it even better is that you don't get fed up with it within about ten minutes, you actually want to carry on playing. A remarkable achievement.

PROGRAMMER PROBED

Martin Pedersen is 19 years old. He first wrote *Battle Squadron* for Innerspace on the Amiga two years ago. Martin started all this malarkey at the tender age of 11 - because no-one liked him, probably. He comes from Copenhagen and he's probably the best programmer in the world (he says).

STELLAR 7

Gir draxon is, as you all know, the Supreme Overlord of the evil Arcturan Empire, and he is about to invade Earth. As the leader of the Terran forces assigned to protect the planet, your mission is to reach the Arturan star and destroy Draxon before he can complete his dirty scheme.

You sit at the controls of Raven, a pretty lethal fighting machine, looking out onto a 3-D world. From the commander's seat you'll face Arcturan forces in seven different star systems. If you do okay and destroy enough of the enemy forces on one star system, a very large and very lethal, end-of-level guardian will appear taking you to the next level. When you finally reach the seventh system, Arcturus, you will need to locate and destroy Draxon's flagship. Then, with the world saved, you can return to your favourite armchair and sip a nice cup of cocoa.

The Arcturan armada contains 12 known vehicles. They range from the Sandsled, with its light laser, to the fission bomb, which homes in on your vehicle.

The game begins with a short intro sequence depicting o' Draxon and the launch of some of his forces. The graphics in this section are, basically, glorious. These wonderful pieces of artwork are continued through the game, with meanwhile screens depicting

a ranting and raving Draxon when you're successful etc. In the Raven you are presented with a cockpit that frames the windows onto the outside world. At the very top is the InvisoCloak indicator, beneath that is the name of the current planetary system, and in the centre of the screen a targeting ring. At the base of the screen is the power module bank, the radar screen, energy level, game score and cannon ready indicator.

BLAST 'EM

You can hit the Arcturans with your Bi-Phasal Thunder cannon. Standard issue, the cannon fires two shells per volley.

The zoom function allows you to scan at long range but it also narrows your field of vision. Protonic shields are capable of absorbing energy. Each time the shields are hit their energy has gone, the shields fail. The next hit will be your last. A warning bell sounds when the levels are critical.

The Raven also has the option of using modules attached to thecraft. You activate them using a "hot" key.

STELLA SAVIORS

Never go face to face with the enemy, you'll become a sitting duck that way, taking too much damage.

Remember the location of the fuel bays and don't forget they cannot be docked with when the Raven is cloaked.

Look for weaknesses in the end-of-level guardians. Every Achilles has his heel.

The Inviso Cloak generator creates a negative electromagnetic field rendering you invisible to the enemy. Although your location will be revealed temporarily during cannon fire.

E1 Shield channels the enemy's energy back onto itself. Thus, if you ram an enemy, their protective field energy turns onto the enemy compressing and destroying it.

Super cannon offers repeated firings. Double that of the basic cannon.

MP thruster gives a short burst of extra speed.

Cat's Eyes sees through the cloaking devices of the enemy.

RC Bomb is released at the rear of the Raven. Once an enemy passes over it the bomb detonates.

Jump thruster enables the Raven to lift vertically for several seconds. Additional modules can be added throughout the game by destroying the same enemy vehicle in groups of three. You just have to drive over them to collect them. There are not too many games of this class on the PC, so Stellar 7 is welcome for that reason alone. Nevertheless, the game does stand up on its own merit as being a classy product with smooth scrolling, excellent graphics and similar sound. The action is hectic and the thrill level high. One of the few games to offer advanced features and nostalgia - now that's value for money!

The familiar tank makes Stella 7 reminiscent of that old favourite Battlezone.

HERZOG ZWEI

Resembling Dad's Army's Captain Mainwaring, Julian Boardman declares war on the Mega Drive and asks why this game has taken over a year to appear in the UK

Now don't get me wrong but a combination of German and Japanese sounds a little too familiar to me. In fact, the words "World War Two" seem to spring to mind. Still they lost that time and frankly a Mega Drive cartridge does not strike me as a threat to national security. Just remember, walls have ears.

This game could be described as unusual, particularly for the Mega Drive. It is something of a strategy war game in much the same vein as board games such as Risk and Campaign. Also it is a Mega Drive game that lasts for longer than ten minutes of fire button bashing – unless you are unbelievably crap at it, that is.

Two players, one could be the

The home base is where your aircraft begins its quest to overrun the other guy's base. The gauges at the top represent both yours and your enemy's strengths, with yours on the left. The "B" is the strength of your home base. "G" shows how fast your store of purchasing power increases. "D" indicates the state of your defenses and "E" displays your energy. If either of these last two become empty then you are immediately teleported back to the home base.

valuable energy ferrying back and forth to the main base.

As you work your way across the territory it is important to start building a strategy that will be able to complete the ultimate aim of overpowering the enemy base. For example, where you place your tanks, what sort of orders you want the infantry and support vehicles to follow and so on.

None of this, however, is free. Your strength and ability to requisition supplies, troops and vehicles, and to give orders depends on the level of your "G". If you haven't got enough,

computer, have a home base at opposite corners of a particular territory. Each of the home bases has the ability to generate resources, infantry, tanks etc, which can be airlifted by a main aircraft to positions on the territory. The orders for these items to be created can be given at any time, but they can only be picked from one of the bases occupied by yourself. Bases belong to you if they contain four of your infantrymen.

Each of these resources can be assigned a different behaviour pattern, all of which are explained below.

Dotted around this territory are a number of neutral, unoccupied bases, which both sides will try to occupy by sending in infantry. Once a base is occupied it also has the power to generate resources, allowing the main aircraft to work its way across the territory and not expend

It is from this onscreen screen that all the orders are given. At the top you are shown which vehicle or type of troop you are summoning and how much it costs. Below that is the type of order it is being asked to perform and its cost, below both of these is a grand total. Above the radar screen the number of "G" that you possess and the number of units you have in the field are shown.

the computer will not allow that order to be given. The rate that it builds up is based on the amount of troops and vehicles that you have out in the field, working in much the same way as "Manna" in Populous.

Eventually you will come into

BUT WHO'S MARCHING?

AMR-51D. Small hovering tank. Cost: 1300G.

TAX-52. Larger, stranger and more powerful tank. Cost: 3200G.

SAM-62. Mobile surface-to-air missile launcher. Cost: 4300G.

ST-57U. Armored boat. Cost: 3400G.

Supply. Makes your bases more difficult to capture. Cost: 1500G.

GMR-34A. Guided missile installation. Cost: 15000G.

Infantry. Foot soldiers and are also the quickest to produce at the bases. Cost: 500G.

FWX. Mobile infantry. Cost: 650G.

direct conflict with your enemy and his men. The resources that you have dotted about the territory will fight on their own, leaving you and your plane to fly around lending a helping hand here and there. However, being in a plane is not very good for knocking out ground-based forces with a forward firing gun. So you have the ability to change into a bazooka-wielding giant who can stride around the landscape and take out loads of the enemy. The thing is, so can your opponent.

Once you have become familiar with the ins and outs of the game, and it could take some time. You may find yourself very deeply involved in the strategic variations, particularly if you have a chess-playing friend who needs a bit of variety. It is hard work to get in to, but fans of such strategy games that require lightning reactions and crystal clear thought might just find this interesting.

MEGA DRIVE	GRAPHICS 74%

MARCHING ORDERS

-
-
-
-
-
-
-

1. Stay exactly where they are placed. Cost: 1000.
2. Move in a large circle. Cost: 500G.
3. Attack a base if there is one nearby. Cost: 1500G.
4. Move forward then return to where you started. Cost: 1000G.
5. Directly attack the nearest base. Cost: 1500G.
6. Head for and attack the main base. Cost: 3500G.
7. Used only with supply vehicle. Cost: 500G.

ONSCREEN ICONS

These four symbols will appear to give you messages. This shows that whatever you ordered to be constructed is being built.

-
-
-

1. When this appears the item is ready for collection from any one of your bases.
2. If the SOS symbol appears your home base is being attacked. Leave it alone too long and it could be game over.
3. If this appears at the edge of the screen it means that a missile is coming from that direction.

HORROR from the crypt ZOMBIES

After seeing *The Exorcist* 163 times, *Les Ellis* felt he was more than qualified to battle with *Drac*, *Frank* and any other characters haunting the *RAZE* offices

For the life of me, I can't think why this landed on my desk. So I read Stephen King books a lot, and I'd rather see *Freddy 3* than *Back to the Future 3*; you can't hold that against me. I suppose it must be the smell of garlic that surrounds me everywhere I go.

You play the role of Count Frederick Valdemar and you have retired for the weekend to your country mansion of Gory Manor.

One night you awake to find the place writhing with zombies. After putting on your nightgown and getting a glass of milk, you discover that the zombies aren't alone, oh no, they've brought a few friends with them.

There are six levels to your

With dagger in hand, *Count Fred* is about to encounter *Frankenstein* who's coming up from behind. You're in the mansion's art gallery at the moment so jump on the pictures if you want to reach the higher objects.

ATARI ST **MILLENNIUM**
£24.99 • OUT NOW

Fred's about to get the point from old boss. He'll have to get rid of him to reach that skull. Level three takes place in the caves with loads of hidden caves and treasurers. Just the kind of stuff horror fans are made of.

house and its grounds, and all must be ventured into if you're to successfully clear the place of deadbeats. All this means you're not going to get much sleep tonight, or maybe you'll go to sleep forever.

Battle COMMAND

Resisting all temptation to link our Jools with any sort of military vehicle (especially a tank!), Les Ellis goes first into battle and is last to leave

Many years in the future, an Ultra war has broken out on the New World. After raging for ten long years, the war has now come to a stalemate. Modern weapons could make no difference, neither side could win this bloody battle.

The North (the good guys) were determined to beat the South (the bad guys) and spent loads of money developing the ultimate attack vehicle, the Mauler. Of course, the vehicle never had time to enter the rigorous testing stages, so, as a last ditch effort to end the war, it is up to you to take the Mauler into battle and see how the metal monster holds up.

All the action is very reminiscent of the old *Battlezone* arcade game, but contains the strategic elements of the authors' previous efforts.

Your tank gets dropped out of the back of the ship, automatically releasing the parachute so you land safely and start your mission.

Starglider and Carrier Command. Realtime Games, who rarely produce more than one game a year, are currently resting

(right) Choose one of 15 missions, no qualification is needed but the training mission is a good place to start.

(below right) The briefing screen will reveal details of the selected mission, in this case the starter/training mission.

(below) This map will show the position of your objective plus the position of the drop off and pick up points.

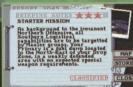

The turret is the most basic armament provided for the tank. The Pulveriser 120mm Battle Cannon fires a missile straight forward. The weapons HUD carries all information regarding how many of the 60 shells—magazines you have left. Obviously, once you've picked up a turret no more can be lifted to your tank.

Get ready to rock and roll. It's the dropping that deposits you and picks you up again after the completion of a mission.

External views can be accessed via the function keys and numeric keypad.

These are the standard weapons, to get the others certain missions need to be completed.

in their Leeds offices wondering whether they can squeeze one more game out of their impressive 3-D graphics routines – see you in 1992, Realtime!

External views can be accessed via the function keys and numeric keypad.

A

The HUD will display any messages, like damage sustained.

B

When the mission is completed, drive to the required location and press this button to be picked up.

C

Sets the magnification of your main view onto the auxiliary screen. It shows greater detail on objects too far away to be viewed normally.

D

The fuel gauge keeps you informed of just how much of the black gold you've got left.

E

The velocity gauge will tell you how fast you are travelling and whether you are going forward or backwards.

F

Blowdown, nightlight and rear view controls will be

J

litted automatically if needed in later missions. The auxiliary view gives info on auto-guided weapons and rear views. It can be expanded at the cost of your normal front view.

H

The compass shows your heading.

I

Spot all the incoming missiles and enemy tanks on the radar display.

J

The Weapon Control Window will show which weapon has been activated in combat.

K

Shows what's being held in the first weapons pods and the status of the weapons.

L

This window is locked onto your mission target, follow it and you can't get lost.

THE PLACE TO GO!**

RANX

The bread, the garlic, the frogs, it was nothing more and nothing less than Julian Boardman expected from a bunch of foreigners

In his eagerness to find a hotel, Ranx nearly steps in a dog turd.

You used to be able to get the comic Ranx—known in France as *Roxterre*—on which the game is based to a few British comic specialists. But due to its "effeminate" nature, even Forbidden Planet has ceased stocking Ranx. Witness by *des Libertaires* and *Tombarini*, its artwork can at best be described as lewd, as can the actions of the hero, a violent, lust-crazed robot.

The French are renowned for their views on sex and violence, they have a fairly lax outlook on what should and shouldn't be shown in all media. It was this environment that provided the right atmosphere for the creation of the comic character *Ranx*. He is a cyborg that enjoys life to the full, girlfriends here and there, drinking to excess, fights every Saturday night... Fortunately, his heart is in the right place, as is obvious from the plot line of this French foray.

A terrible disease from outer space, *Psychopeste*, is decimating the planetary population and corrupting their minds. The Pope is in the hands of a kamikaze whore, lucky devil, and the President of the United States is in an even worse position.

Ranx has had to sacrifice his girlfriend to her father, a rich Italian industrialist, to rest the only phial of vaccine from him.

His task is to take it to New York and give it to the only man who can use it, if he can find him. He then has to go back to Rome and rescue his girlfriend from her father, obviously a really nice bloke.

Ranx has a combination of high and low punches and the ability to throw certain objects, like grenades. When he wishes to interact, keeping the fire button depressed will bring up a series of icons in the bottom portion of the screen. Ranx has it in his powers to ask a question, insult someone, laugh, utter a war-like snort and give objects or money. He can also review his health at any time, make repairs if he still has the pieces, and recharge himself at any convenient electrical outlet.

Whilst doing all this, Ranx has to look out for gun-toting, chainsaw-wielding, drug-pushing crooks who will do their level best to stop him. Oh, and don't

forget to look out for the dogs who will crap on your foot if you get anywhere near them (just like in France).

One thing that lets the game down is the repetitive interaction. Some of the answers to the question prompt leave you wondering what the hell the question was.

A kaffe-wielding maniac gives Ranx a good stab in the guts. Apparently he's one of Ranx's nicer friends.

DEFENDER 2

It's taken years to come, but the sequel to the much copied Defender has arrived. Julian Boardman packed his cuddly llama and headed for hyperspace

When the arcade machine of *Defender*, from Williams, hit town it caused a hell of a storm. Rarely had there been seem such a fast playable machine, and rarely since has there been a machine that broke so much new ground. Then there came a pseudo-sequel, more of an update really, called *Stargate*, which added a few new elements to the game, teleporters and the like. And now here comes the official sequel.

But not only that, you also get the original *Defender* and *Stargate* on the same disk.

The sequel is not much of a departure from the original. What the designers have done is added to

Defender, graphically and structurally, to improve on it... hopefully.

Very thoughtfully, old Jeff has put in a tutorial to take you through the flying controls so that you can familiarise yourself with them step by step. The controls are interesting to say the least, a combination of mouse and keyboard gets both sides of the brain working at once. The left hand controls the weapons while the right hand controls all the movements, none of which have been changed.

Weapons on the other hand have. As well as the ubiquitous smart

bombs, there is now a weapons satellite which can have its behaviour varied by pressing the space bar, it can be a bomber, or a roving device to take out aliens and so on. There is also a Fractal Laser which streaks like a bolt of lightning to whatever aliens are on the screen. This weapon has a limited energy supply so it must be used

sparingly. Aliens have been re-designed by the same chaps who did *Anarchy*, WDS Design, and you will notice the similarities, especially in the design of the ship. There is an option to use either set of graphics, the new or the old, in any of the three games, so all you purists out there can rest in peace.

Sound comprises either a heavy metal guitar track, whose long riff soon begins to irritate, or some very professional spot effects, including a human's death cry that has been "borrowed" straight from *Altered Beast*.

HISTORY OF DEFENDER

- Did you know that *Defender* was the first video game to introduce autonomous, intelligent aliens that didn't follow a predefined flight path?
- It was also the first game to introduce a virtual world that allowed the player freedom of movement anywhere they liked.
- *Defender* was the first game to introduce smart bombs - and where would we be today without them?

Just survive until the moon on the right sinks below the horizon and you'll be transported to the next planet.

The weapons satellite seen here will fire and leave in on the enemy. It's particularly useful on this level but could prove cumbersome on the next as it may take out some bonuses

GRAPHICS 73%

- ✓ Backgrounds of a one-pixel mountain range.
- ✓ Nice choice between the old and new graphics.

SOUND 77%

- ✓ A repetitive backing track as a default option.
- ✓ Reasonably impressive in-game spot effects.

PLAYABILITY 77%

- ✓ Easily degenerates into a free-for-all with no skill.

I WELCOME YOU, PRIMO BIRTHMAN. LET US PLOT TOGETHER.
AND THIS STAR CLUSTER SHALL BE OURS TO SHARE BETWEEN
OUR TWO SPECIES.

LIGHTSPEED

With a few odd friends already, Julian Boardman was eager to encounter many more weird mutant forms

By a strange course of events that it seems no-one could have predicted — dying atmosphere, pollution, etc — the Earth of many years into the future is an ecological wasteland. Humanity has been forced to flee in a series of Conestoga spacecraft, each carrying 10,000,000 people, in search of a habitable planet for them to colonize.

In your 10,000-foot long Trailblazer you must search and explore a distant star cluster for planets suitable for human existence. Not only that but resources must be found, either through mining or trading, that will support the colony and give it the raw materials it needs to begin the process of rebuilding a civilisation.

But a star cluster is not necessarily

SHE CAN TAKE IT, CAPTAIN

Following Sir Clive's example of using a washing machine motor to power his C5s, the Trailblazer comes equipped with a Spindrive. This magnificent bit of hardware will transport the ship at high-speed to wherever you wish to go. The ship also features screen generators (shields), a blaster turret, a main gun, and a low-velocity thruster for small scale manoeuvres.

Most of these components share interchangeable parts, which is useful because when you begin none of the components are at full strength. The trick is to figure out which component is to be used. For example, you could use the Spindrive for long distance travel, then go to the engine room and move the parts from other items in the engine room, say the thrusters and the main gun, into the Spindrive to take it up to full power and make more efficient use of your fuel.

a peaceful place to live, and the one you have found is no exception. It is up to you to make it safe by negotiat-

ing treaties with peaceful planets, and defeating those who would harbour ill-feeling towards their new neighbours. This is no time for dilly-dallying either, if you take too long the population of the Conestoga will die to be lost forever in space.

Once you arrive at a planet it is up to you to drop a probe and establish contact. Once a response comes, the inhabitants of the planet will appear on the translator screen, doing whatever they do.

It is unwise to enter into any agreement with one particular race until you have come across a larger number of other races so that you can try to gain a more objective view of which alliance to join, who to trade with and who to fight. Diplomacy is a very important element of the game. It is all too easy to end up in a fight when you just wanted to trade.

You may also come across uninhabited systems, which may have valuable ores in them that can be mined, or you may come across a planet that is suitable for human habitation and should be claimed immediately.

GRAPHICS 86%

When you do encounter another craft in deep space, it is best to treat it with caution. Engaging in combat is not only dangerous but also costly. You only have ten credits upon which other missiles or kamikaze fighters can be placed. If you cannot blow the enemy up with missiles, or even outrun your pursuer, then kamikaze fighters can come in very useful. The only trick is to get out into space and ram the first ship they come across.

MASTERBLAZER

The sequel to the "cult classic" Ballblazer has arrived. Julian Boardman digs out his old cricketing box just in case

Members of the IBC (International Ballblazer Conference) are stupidly rich. They are rich because they organized all the tournaments of this 34th century sport. But they created some new grids only to have them taken over by some undesirable, humans and the like, who then went and started their own variation

on the theme of Ballblazer, Ballblazer Racing. It soon became very popular on the asteroids and was eventually elevated to the hallowed status of Ballblazer and accepted by the IBC.

For those of you unfamiliar with the nuances of the original I shall explain. Two craft, Rotofoils, are surrounded by a Bumfield which has the power to recoil from collisions

grid and score.

The race section involves much the same idea except you have to keep on going in a straight line pushing a ball, trying to beat an opponent by sheer speed or damaging him so much that the race has to be stopped.

Sadly, though, the other features that this game provides – museum, tutorials, etc – don't help lift it out of the inaccessible cult status it has. To some, this game will clearly appeal, most likely to followers of the original. It will also pick up a few converts, and I just might be one of them.

ATARI ST **RAINBOW ARTS**

IBM PC **RAINBOW ARTS**
£24.99 • OUT NOW

The top sector shows the view from your Rotofoil.

The central status bar shows player see's score on the left, with the time left to play in the middle. Should a player score more than five goals, his goals will register on the other player's scoreboard, either filling a space or replacing the opponent's scored goals.

Below is player two or the computer. You can choose between seven computer opponents.

BALLBLAZING BOLDERDASH

- The Rotosnap, used to turn the Rotofoils to face the ball, has been found to have a detrimental effect on the neck muscles of the pilot. Consequently, the pilots have to have frequent operations to replace the damaged steel stiffeners on their necks.
- Used Rotofoils from the original tournaments at the beginning of the millenia can fetch remarkably large amounts of money.
- Their pilots are regarded as near saints, such is the cult status that surrounds them.

and attract the ball if it is in free play. When the ball is free, the Bumfield sinks in like a pillow to keep hold of it, until it is fired when the Pushfield sends the hovering orb zooming forward, hopefully through the constantly moving goalbeams.

The chequered grid would be very disorientating if it was not for something called a Rotosnap. This intelligent system spins the Rotofoil in steps of 90° to face the goal, leaving you safe to hack it down the

AMIGA

ELVIRA

Mistress of the Dark™

For many acne-ridden teenage headbangers, Elvira represents the ultimate fantasy. Julian Boardman wishes he was young again...

Not many people would imagine Elvira being involved with do-it-yourself. Some might imagine her whilst themselves doing a bit of DIY, but I could never imagine Elvira trying to put up some wallpaper, you know. But it's her attempts to renovate an ancient castle that have caused her a lot of trouble, they've disturbed her long-dead relative, Queen Emelda. Not only that they've opened up a portal to the underworld, and all these demons and evil little buggers have come out to

which are scattered around the castle and its grounds.

Fortunately for Elvira, this scroll will also reveal the secret of how to thwart Emelda, if she can get to it first. Unfortunately, depending

HORROR

SOFT

prepare for Queen Emelda's arrival from beyond the grave.

But wait, there's even more. Not content with being alive again Emelda wants to take over the world. To do that she has to find the "Scroll of Spiritual Mastery", which gives her infinite power, infinite lives, infinite mortgage... But the scroll is hidden in a huge chest, with six locks on it, the keys for

Elvira spends most of the game in the kitchen where you can bring her ingredients to mix into spells for your use. You have to be careful down here, though, because the fat woman has been known to take a most devious to your neck to get rid of you.

on your point of view, Elvira is tied up and unable to search the area herself - this is where you come in. You've been hired on the strength of your ghostbusting abilities to fight your way past all the evil that guards the castle, find the chest and rescue Elvira. No problem (?).

And there you are, plunged deep into this "fully interactive RPG" trying to work out what

STR: Strength. Affects the damage you do in combat and the amount of items that can be carried without adversity affecting you. Two things you need to know: magic can make you stronger, a bit with a sword will make you weaker.

RES: Resilience. Determines the amount of damage that you can take.

DEX: Dexterity. Measures your agility and your ability to gain the advantage at the start of a fight.

SKL: Skill. When you are not carrying a weapon it will show your basic skill level, when you pick one up it shows how good you are at using whatever weapon you have in your hand. Your skill with a weapon will increase each time you have success with it in battle.

LF: Life. A high number means that you are alive, zero means that Elvira's looking for someone else.

EXP: Experience. What Elvira's all about. This is a percentage that reflects how much of the game you have solved.

ONE BIG LADY

This game seems to have followed the path of Elvira's career over the past year—some might even go so far as to say it has been cursed, the luck has seemed to be in short supply for all involved in the production of this game. To begin with Elvira has not been seen or heard of since she presented BBC 2's Heavy Metal Heaven programme on New Year's Eve, her career seems to have taken a bit of a nose dive since (mind you so have her boobs by all accounts).

The game itself has been in a lot of trouble getting from the finished stages on to the shelves. It was originally planned for release in March of '90 but the original publishing company, Tynesoft, went down the toilet. It hovered around a bit then Accolade picked it up to get it on the shelves just before Christmas 1990.

good a centipede is going to be to you and why the fat lady in the kitchen just hacked you to death. Still it's all part of the fun, innit?

SWORD of VERMILION

*Julian Boardman
gets completely
confused and spends
all his Christmas
bonus on this Mega
Drive extravaganza*

At the moment Japan seems to be enjoying a bit of an adventure/strategy awakening. There are several of these window-driven interaction adventure RPGs, like *Phantasy Star II*, and they just lurve *Populous* and *Sim City*.

The problem the Mega Drive has though is that its controllers limit the scope of any RPG played on the machine. Three buttons means that it can never be more than a beat-'em-up that involves a lot of exploring, a bit of intelligence, a lot of fighting and some very limited interaction, but that doesn't stop them being enjoyable.

The scenario behind this one involves 16 rings, eight of good and eight of evil, an Imperialistic dictator King Tsarkon, and the hidden son of King Erik, murdered when Tsarkon invaded the land of Excalabria. That prince is now 18 years old, and a strong skilful warrior, trained by the man who brought him up as his own, King Erik's bravest knight, Blade.

Now a man, it is up to the prince to find the eight good rings that Tsarkon has scattered across the planes, in order to counter the eight evil rings that Tsarkon himself uses to keep Excalabria under his evil reign. Even then it still may not be enough as he must also find the Sword of Vermilion to be able to confidently take on the evil dictator and return Excalabria to the green and fertile land it once was.

It is therefore down to you to control the prince as he wanders through the wilderness of deep forests, treacherous caves and oasis-like towns, talking and fighting his way to the eight rings of good that lie somewhere in the caves of Excalabria. Good luck.

OUTSIDE HELP

The armour they don't sell in the shops.

SKELETON ARMOUR:

More powerful than scale armour, this can be found in a cave.

CRIMSON ARMOUR:

Every bit as good as Ultimate Armour, but you won't get much when you trade it in (still it was free).

SECRET ARMOUR (not to be confused with Secret Army):

Even better than the excellent Diamond Armour, be sure to wear it immediately.

OLD NICK ARMOUR:

The best there is. The only problem is some little bugger went and cursed it.

A couple of the town's buildings, the armory and the inn. All the people around can be talked to, and they provide some useful information.

BATS:

Fast little creatures that can chew you to bits if you are not quick enough.

SORCERERS:

They are easily killed, but only if you can get past the devastating fireballs.

FLOATING EYES:

If looks could kill, these things would get you every time! Try not to touch them when you attack - they have strong attacks but weak defenses.

SNAKEMEN:

Use magic on these nasties - they're tough and they're fast.

YOUR FOES

These creatures are the ones you are most likely to meet in your first few attempts to play the game.

SLIMES: These disgusting creatures bounce around after you with their rubbery bodies. The green slimes are the weakest but the black glops really pack a wallop.

KOBOLDS: Nasty little monsters with dog like faces. They're some of the weaker foes that you will face.

UNDEAD: The sword attacks of the walking dead are relatively weak. You should not have too much trouble with these monsters.

BUBBLE BOBBLE

Bubble-blowing dragons? Julian Boardman says "Puff" to this long-awaited NES conversion of the arcade fave

I have always been a fan of the original arcade machine of *Bubble Bobble*, spending all my beer, er, Vimto money on numerous continues to make sure myself and a friend got as far as our wallets could carry us. It was a sad day when the machine was removed from the pub.

The game's scenario is suitably daft. Two dragons, Bub and Bob,

are trying to work their way through a series of rooms to rescue their brontosaurus buddies who've been abducted by the ever-so-evil Baron Von Blubba.

Each of the 100 levels is confined to one screen giving loads of action as the two dragons simultaneously try to capture all the rampaging sharks, fish and ghosts in their bubbles. Once captured they can

just use a bit of teamwork to get out of the situation.

The sad thing about this version is that while it follows the layout of the original almost exactly, it just isn't fast enough to be playable in sufficient amounts for hardcore (?) fans. However, once you get used to it, it's not that bad, and novices won't even notice the difference.

FOREVER BLOWING BUBBLES

This is the first instalment of a coin-op trilogy that began way, way back in 1988 (it only hit my backwater local at the end of '89). *Bubble Bobble* was one of the pioneering cute games, and its non-violent gameplay coupled with the very challenging level of difficulty made it a huge success and a natural for conversion to all formats. The sequel, *Rainbow Islands*, featured the uncursed human forms of Bub and Bob using their new found rainbow power to defeat the evil Von Blubba, the erstwhile baddie of the first instalment, and rescue the inhabitants of the Rainbow Islands from his evil clutch. Some of you may have already played the third coin-op in the series, *Parasol Stars*, which involves Bub and Bob fighting their way to the evil Von Blubba with the aid of their deadly umbrellas. It's just as cute and just as addictive so it should soon be appearing on every possible format.

Now we've finally got *Bubble Bobble* as Nintendo could there be a possibility of a Game Boy version soon. Loads of colour and all the original graphics but the gameplay is too slow for comfort. (Arcade screen).

jump on them and take all the bonuses left behind from bursting the bubbles. If one of the enemies gets caught in a bubble it must be jumped on fairly quickly otherwise the creature will burst out, turn red and rush around the screen trying to destroy our little friends. All of the levels can reveal mega bonuses and in a two-player game it can prove to be a real fight.

Some of the designs of the levels are typically fiendish and need some serious consideration before plunging into action and getting stuck in some hopeless predicament. But if there are two of you playing - and there really is no other way of playing it - you could

GRAPHICS 78%
 ✓ Flicker in some of the animation.
 ✓ Close to the original.

SOUND 67%
 ✓ A lack of tune doesn't help the presentation.
 ✓ Some interesting cute effects for the NES.

PLAYABILITY 73%
 ✓ Less addictive than the original.
 ✓ Blow-furling levels to complete.

HARD DRIVIN'

MEGA DRIVE • TENGEN • £39.99

Doing his bit for international relations, Les Ellis yet again raids HM Customs office and braves the incomprehensible Japanese instructions to bring you news of the latest imported games.

At last you have the chance to play Tengen's smash arcade driving simulation in the comfort of your own home. *Hard Drivin'* has been around for some time on 16-bit computers; it was just a matter of time before it turned up on console.

You are put behind the wheel of a fast sports car (is there any other sort). At the beginning you are given the choice of an automatic or manual gear box. You can also choose between two different race tracks: stunt or speed. The stunt track has various hurdles like a bridge, banked turn and a complete nightmare of a loop.

All obstacles need to be taken at

the right speed otherwise disaster is inevitable. You are not the only car on the road, so you will have to watch your position pretty carefully.

The speed track calls for different skills altogether as you race around trying to beat the clock.

At the start of the race you are given one minute 45 seconds to complete the two courses. Passing checkpoints increases your remaining time. There is a challenge time to beat and once you have smashed this you are given the opportunity to race against the Phantom Photon. If you beat this mean racing dude your race time will be recorded and you will become the new Phantom Photon.

One of the outstanding features of

this game is the action replay; when you crash you get the chance to sit back for a few seconds and watch the accident all over again from outside the car.

The game has excellent solid 3-D graphics, a tremendous thundering sound tracks and enough playability to keep you hooked. My only gripe is lack of extra courses. With the possibility of huge cartridges, and the Mega Drive's obvious potential, it seems a wasted opportunity. Games on the Mega Drive shouldn't simply be conversions.

MEGA DRIVE 86%

THUNDER BLADE

PC ENGINE ● NEC ●

£34.95

By now just about everyone must have heard of *Thunder Blade*. It's been on almost every format there is (with the exception of the handhelds). It's a multi level, multi dimensional shoot-'em-up in which you control the latest in helicopter hardware.

You must swoop through city streets destroying enemy vehicles in your path with your vulcan cannon and rocket launcher.

There are four levels in all; each

features an end-of-level guardian which must be destroyed before progression to later stages is possible.

The very first 2-D section is ridiculously easy and can be finished in just a few seconds. From then on though, things get tough as opponents come at you from the air and ground.

Thunderblade was good in its day; now it's a tad tired.

PC ENGINE 72%

If you don't move soon it'll be helicopter versus dragon, and I know where my money lies.

These 2-D scenes are really easy, so use them simply for target practice and racking up loads of points.

HURRICANE

PC ENGINE ● TOA

PLAN ● £34.95

Why is it our Japanese friends are so keen on shoot-'em-ups. Of all the consoles, the PC Engine is the most flooded. *Hurricane* is virtually the same as last month's hit *Tiger Shark*. You fly a plane on a vertically-scrolling screen and must dispose of the countless enemy vehicles racing towards you from all angles.

You are attacked by land, sea and air, so plenty of trigger action is required to survive. Shooting some of the enemy vessels results in a power-up which boosts your weaponry.

The graphics aren't as good as the

You call up your squadron and head off to battle...

aforementioned *Shark*, but shoot-'em-up fans are going to love it anyway. One novel touch that sets it aside from other games of the same genre is that as well as smart bombs you can call up a squadron of planes to help you in the battle. You can hide behind them and let them take all the flak - great fun.

PC ENGINE 79%

But it doesn't stop! It's really better... the enemy vehicles start to take flight.

gives you an additional smart bomb to frag the bad guys with.

provides you with an extra life.

increasing the strength and number of shots you fire.

BURNING ANGELS

PC ENGINE ● NAXAT ●
£34.95

This little number is a classic. A provocative-looking cover girl leads you suggestively into this simultaneous one- or two-player shoot-'em-up.

First you must choose which character you wish to play - Dragon or Phoenix. Then it's off to rescue your leader from his evil abductors.

Naturally you get to battle everything plus the kitchen sink. Loads of weapons can be picked up along the way; these are needed as your opponents appear in larger numbers and at a greater speed.

Each ship comes kitted out with its own super weapon, but unfortunately it can only be used a few times.

End-of-level guardians must be defeated. Success leads you to some rather tasty completion screens to gawp at. *Burning Angels*

Shooting the guys at the front will give you some power-ups. Shooting the guys at the back, well that's just good for your health.

is good for a quick blast, but it's nothing new.

PC ENGINE 69%

Two players can team up to combat the toughest of the tough opponents.

POWER PILL POPPER

(P) - makes your standard weapon more powerful.

(B) - provides you with a smart bomb.

(M) - gives you some pretty neat missiles.

(L) - arms you with lasers to blast with.

(*) - partly replenishes your ship's energy.

IMPORT BUYS

The games mentioned in *Import* are not available generally in the UK, and are only purchasable from select grey importers. Also note, the games looked at here will be reviewed in full when they are officially available in Britain.

All games reviewed in *Import* this month came from:

■ Console Concepts, unit 18, The Village Shopping Centre, Newcastle-Under-Lyme, Staffordshire ST5 1GB. Tel: (0782) 712759.

BOMBER MAN

PC ENGINE • HUDSON • £34.95

Up to five people can simultaneously play this mad Bombuzal-like game on the PC Engine. It's also the first game that supports simultaneous two-player action on the hand-held GT.

The gameplay is fiendishly simple: you have to roam about a maze planting bombs to blow away brick

In five-player mode the action can get cramped and extremely dangerous at times as all five try to blow each other up.

Two bombs simultaneously explode at the top of the screen. Your bomber narrowly misses being blown up; the walls take the full force of the blast.

walls and any lurking monsters. The bombs are laid easily enough, but you have to ensure you're not on top of them (or even in the near vicinity) when they blow.

Bomber Man is good in one player mode, but really comes into its own with two or more players. Many late nights (and early mornings) have been spent in the RAZE offices planting bombs.

There are eight rounds in one-player mode and only one in multi-player mode. Multi-player mode differs in that the aim isn't to progress to higher levels, but simply to be the last player standing.

Bomber Man really is explosive.

PC ENGINE 89%

YOUR GUIDE TO ALL THAT'S BAD IN BOMBER MAN

– this chappie isn't too smart and is easy to trap. You'll only get 100 points for your troubles.

– he looks pretty dippy, and is! The ghost is more likely to walk into a bomb blast than into you. Again, only worth 100 points.

– cleverer than the previous two, but is still relatively easy trap. Blasting this guy gives you 400 points.

– this monster is a pain in the neck and should be disposed of pronto. He is worth 400 points.

– here's a little sucker who can pass through solid walls. Keep an eye on him, he's worth 1000 points.

– on loan from Pacman to appear is the yellow blob worth 200 points.

– the big mouthed monster is worth 1000 points and will follow you relentlessly.

– forgot the teddy bears' picnic. This bear isn't for hugging. You'll get 2000 points for this sabre toothed toy.

– this slinky-looking snake needs several hits to kill and is worth a whopping 20,000 points.

– another nasty piece of work which requires lots of bombs to kill it. There's 20,000 points in the bag if you do.

In multi-player mode only two of the boss icons are available (multi-bomb drop and extended blast).

KARATE BOY

GAME BOY ●
TECHNOS ● £19.99

Walking through the streets has never been a safe business, especially in downtown Trowbridge. Indeed, there are only two ways of looking after yourself: arm yourself to the hilt or learn karate.

Being a complete wimp you choose the noble art of Karate and, once mastered, decide to clear the streets of scum. There are several suburbs that need clearing and each one is full of crooks and henchmen

just waiting for some hard nut to come along.

You walk through the scenes punching and kicking your way through hordes of bad guys. At the end of each stage is an end-of-level guardian to deal with. The game plays and feels like Double Dragon. The backdrops are really detailed and the action varied enough to keep your fists and feet flying.

GAME BOY 81%

NAVY BLUE '90

GAME BOY ● USE ●
£19.99

Ever wanted to play Battleships? Well now's the chance to play the age-old game on your Game Boy. You can either play against the machine or against a friend via the multi-player lead. The game starts off with a long-winded speech from the

captain - I'm sure it's very important, but being in Japanese...

You get to select various kinds of ships and weapons. Then it's on to the game where you take it in turns with your opponent to select co-ordinates on the map.

A missile screams to the area of ocean you think your opponent might be hiding. If you're lucky and destroy a vessel you get presented with a brilliant picture of the ship blowing up. But it's soon back to the grind as you try to track down the rest of the enemy fleet.

On the whole this game is pretty boring; two-player mode lifts it marginally.

RATING 57%

Another ancient board game gets converted to the Game Boy. For Navy Blue '90 read 'battleships'.

RAZE MARCH 1991

HEAD-ON

GAME BOY ● TECMO
● £19.99

This is a disgrace! Head-On is a truly ancient game; the sort of thing you expect to type into a computer when learning BASIC programming. You control a little car and must race around a square track picking up dots as you go. A computer controlled starts from the other end of the track. The idea is not to meet in the middle. Thrilling stuff, huh?

There are several skill levels to test your worth. At higher levels and on the special one-player game you get bonus items to pick up and use.

A two player option is available provided you have the adapter and two carts. The graphics and sound

look really dated and don't even come close to pushing the GB to its limits. Do yourself a favour...

GAME BOY 32%

HOORAY HENRY

GAME BOY ● EPOCH
● £19.99

Yet another clone of the classic Super Mario Land. That doesn't imply Henry isn't any good - on the contrary it's very playable, but still not as ingenious as Mario. The gameplay is similar in that you have to move through various scenes jumping over enemies and using platforms to collect bonuses. The game is a tad too easy and will leave experienced platform players wanting more. Nice graphics and sound, but the playability isn't up to Mario's

high standard.

GAME BOY 71%

Henry Henry is crammed with cuteness and playability. If you're bored of Mario, try Henry for a new selection of puzzles.

BUBBLE BOBBLE

GAME BOY ● TAITO ●
£19.99

This month sees Bubble Bobble making its way onto the Game Boy as well as the NES. To get the full story read the NES review on page 78. The main differences between the two is that the Game Boy version lacks a two-player options and you don't get to see the whole level at once (just a portion of it). The screen scrolls smoothly as you move, but that doesn't account for the loss in playability. It's more of a guessing game as you try to figure out what is beyond your view.

GAME BOY 75%

The great simultaneous two-player action of the coin-up version of Bubble Bobble is missing in the Game Boy remic. Apart from that, the sound, graphics and playability is as good as ever.

IMPORT BUYS

The games mentioned in Import are not available generally in the UK, and are only purchasable from select grey importers. Also note, the games looked at here will be reviewed in full when they are officially available in Britain.

All games reviewed in Import this month came from:

■ Console Concepts, unit 18, The Village Shopping Centre, Newcastle-Under-Lyme, Staffordshire ST5 1QB. Tel: (0782) 712759.

SIGHTS ON CD

JOIN THE MURDER CLUB

New on the PC Engine CD ROM is *JB Harrold's Murder Club*. With the large amounts of memory available on CD (around 550Mb), new types of games, which were prohibitively memory-hungry in cartridge form, are now possible. NEC of Japan have just made a detective/murder mystery game which combines CD-quality stereo music with true human voice output.

In *JB Harrold's Murder Club*, Bill Robbins has just been murdered and as JB you have to go out and search for clues, interrogate suspects and gather enough evidence to make an arrest. Pull-down menus allow you to ask a large variety of questions, and from the new information that you learn, additional areas open up for you to investigate and new people appear with more information.

One new feature which NEC have added to this game is that the voice and text are selectable between English and Japanese. By making CD games bilingual, the disc immediately becomes usable to all countries.

FINAL ZONE RETURNS!

Good grief! The PC Engine shoot-'em-up *Final Zone* is only just out and on CD ROM - yet the sequel is already nearing the final

stages of production! In a similar style to the original, *FZ2* is another multi-directional shoot-'em-up viewed from above. The future people once again require your help as another revolution has occurred. You've got a little help this time as you can select a crew of mercenaries, each wearing their own New Age Power Suit and equipped with unique, customised weapons.

ENGINE ALERT

Last Alert is now out on the PC Engine CD ROM. This topical one-player beat-'shoot-'em-up is spread over eight frenetic levels.

The mission is, of course, impossible. It appears that US diplomats from a US State embassy in the Caribbean have been 'captured' by a crazed psychotic killer with a view to using them as hostages in his bid to take over the country. To prevent any attack from foreign governments, the clever chap has placed the hostages at critical military installations around the country, effectively using them as human shields. If that is topical.

Due to this popular set-up, an all-out attack is out of the question, the only hope is that one man can infiltrate the country's defences and destroy the bases individually. After knocking out the installation you must rescue all the hostages and then go on to find and eliminate the dictator.

COMPACT STORIES

- Gremlin are moving onto CD. With the release of *Little Devil* at the end of 1991, they hope to give Commodore's CDTV unit a massive Christmas boost. The game revolves around six bad angels who are all trying to beat each other back to heaven. With graphics from the same guy who did the work on Sullivan Bluth's *All Dogs Go To Heaven* and *Land Before Time* movie cartoons, *Little Devil* looks set to give the *Dragon's Lair* series a run for its money.

- Accolade's upcoming title for the PC Engine, *Jack Nicklaus Turbo Golf*, will have 18 holes on the PC Engine cart while the CD version will contain 90 holes plus three digital soundtracks.

- NEC plan to take CD technology into the other areas beside games, more specifically they are looking at the home education market. Their new *Magical Dinosaur Tour* CD is a virtual encyclopedia on the subject, with dozens of screens showing how and where the monsters lived millions of years ago. In addition, a CD from Discus will contain ten children's books with full voice output.

- NEC plan to bring out a monthly magazine called *Ultrabox* on CD. It will feature games reviews, game news and even a video game!

- Sierra may be releasing a £700 IBM PC package which would include a CD ROM drive, interface card, a sound card (maybe Sound Blaster) and two CD ROM games.

CD ROM games are a far cry from their tape, disk and even cartridge counterparts. Paul Rigby puts on his hat and coat, clears out his pipe and goes on the detective trail

HACKS & STACKS

Heeeere's Zak!!!
Welcome one and all,
yes, even the one's
who can barely read
because they are still
learning the number
of fingers they own,
either that or their
one times table.
However, after last
month's venture into
deep space here we
are in mediaeval
times.

Before I start, I
would just like to
remind you of my
motto: never look a
gift Bizarrian in the
mouth

LEVEL ONE

Between the start of the level and the rocky outcrop you will encounter three pairs of big, bad lads. The best way to deal with pairs, and any Bizarrians that turn up, is to split the pair and use your special

move on each alternately. If you get a chance to ride a Bizarrian they are useful as their tail swing can knock out anything. The end of the level presents two huge fat blokes, but the tactic of a special move on one and then the other works just as well on these two as any other.

LEVEL TWO

The second level (see below) takes place on the back of a turtle (cowabunga!). You must fight your way past two pairs of guards before access is gained to the main courtyard.

You also get a chance for a quick bit of elf-kicking to build up your magic before the end of level battle comes. The only real way of succeeding on this level without losing too much blood is to use your spells on the final group of a fire-breathing Bizarrians, two women and a skeleton. Then jump on the Bizarrian and torch the rest of the buggers if you can. Don't fall off.

LEVEL THREE

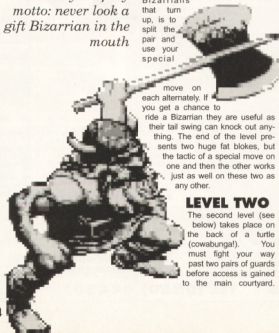

Level three, above, is short but very difficult. It begins with a woman, on a Bizarrian, and two of her big mates. A bit of magic would not go amiss as you get two chances to pick up some more over the bridge. If they are not dead by now then torch them and

use your special move to leap the gap, in this case shoulder-barge over it, as a jump will not be long enough. Once over you face two well 'ard women, then a bit of elf-kicking to get some magic. After that, two of those big blokes you faced at the end of level one turn up, the same tactic works equally well here.

Pick up some more magic, then move on to the courtyard. Take out the three blokes with some furious hacking, then use your spells as soon as the guy in the armour turns up and hack him to death when he starts to get back on his feet.

LEVEL FOUR

Level four has some very nasty moments but an experienced fighter

will lure the attacking skeletons to the edge of the eagle, allowing them to fall to their deaths before a bloody fight ensues. Sheer weight of numbers may have you reaching for your magic before you can say Paul Daniels. Try and save it as long as possible though because you may be left high and dry, especially as it gets really tough right at the end. As you can see I was forced to nuke 'em. The end seems innocent enough but the combination of the devious skeletons and another shoulder-barge happy, armour-dad moron means things get difficult.

LEVEL FIVE

Level five begins on the eagle's head, but I won't spoil it for you and reveal all. All I will say is that you must be careful not to get kicked off the edge. Thank you and goodnight.

B**B****B****B****B****B****B****B****B****B****B**

Life at the treasury has been nothing but trouble since Thatch jumped ship and let the main man Major slip greasily into her place. Not only are there the new Tessas to contend with, but the Budget is just a few months off. Sir Ivor Tightwallet managed to compile this report under severe Treasury restrictions.

MAYA ACTION 16 ● £7.99

Maya sounds like an adventure and that's just what it is. It's not one of those boring text-driven jobs though, it's an action adventure through the Yucatan jungle. Within the jungle are the Maya tribe and you must find out

Drive your jeep through the jungle and trek through the cities in Action 16's Maya.

the secret behind their strange fetishes. There are many riddles to solve and the evil Doctor Otrik Karloff to avoid.

You jump in your jeep to travel around the place. When you reach somewhere interesting you can jump out and walk around. Watch where you step as nothing is what it seems.

The graphics are terrific, with some super characters like birds flapping their wings, and there's a range of great backdrops. Animation is also good, although the game as a whole can get quite repetitive. Good value for an original game, though.

AMIGA **79%**
ATARI ST **73%**

THE SWORD AND THE ROSE CODE MASTERS ● £6.99

Code Masters always seem to base their games on something — not wishing to say they copy ideas — which is probably the secret to their success. The Sword and the Rose is very similar to another bargain game, Ghosts 'n' Goblins. There's much to do as you trek across the countryside, picking up weapons and killing the strange characters you encounter. All in all, a tidy little game that'll sure keep you entertained for a couple of months.

AMIGA **87%**
ATARI ST **85%**

Ghosts 'n' Goblins is reborn in the forthcoming Code Masters release The Sword and the Rose. With chopper in hand you trek across countryside for and find in search of treasures, maidens and beer. It's all in a day's work for a superhero with a huge chopper.

AMIGA **78%**
ATARI ST **74%**
IBM PC **75%**

Thy head is as full of quarrels.

FINALE ELITE ● £24.99

"Now is categorically, positively your last and only remaining chance of acquiring them," say Elite of their contents in their latest compilation. But then again Thatcher said much the same about resigning and look what happened there. The not-repeated games are Paperboy, Overlander, Ghosts 'n' Goblins, Space Harrier and Frank Bruno's Boxing (instead of Overlander on the IBM PC).

If you haven't heard of Paperboy by now then you must be one of those people who believe the Sunday Sport headlines. A very playable game, and available on every format imaginable.

Overlander is a futuristic 3-D racing game set in a world decimated by ecological disasters. You must race from city to city carrying cargoes for money. Pick-ups can enhance your weapon power and increase your fuel.

Ghosts 'n' Goblins is as old as Les, but still very playable. You take the role of the brave Knight Arthur who has to battle his way through several levels stuffed full of demonic creatures. The best of the bunch.

Finally there's Space Harrier — need I say any more? 20 levels of pure blasting action.

RAZE MARCH 1991

QUATTRO ARCADE

CODE MASTERS ● £12.99

The name of Code Masters is synonymous with decent, original games at a price that won't stretch the wallet - even my tight wallet! After a few forays into the 16-bit budget market the Darlings brothers, founders of Coders, are now trying their hand at 16-bit compilations. As the name suggests, each pack in the Quattro series contains four fun little games for just £12.99 (that works out at 3.24 per game!).

Each pack carries a theme. The line up of Quattro Arcade is *Pro Powerboat Simulator*, *SAS Combat Simulator*, *Pub Trivia Simulator* and *Nitro Boost*.

Pro Powerboat Simulator puts you behind the controls of a

Nitro Boost is like a 16-bit version of Coders' 8-bit "classic" *Super Stuntman*. Your aim is simply to finish the course without falling into acid ponds or getting knocked off the track by other cars.

Commando style shooting fun in *SAS Combat*, a classic game. Immense satisfaction can be gleaned from killing all these enemy soldiers.

powerboat which you must race between two points as quickly as possible. There are other boats on the water trying to ram you so dispose of them with some of the mines you've thoughtfully brought with you. There are all the elements for fast and compulsive play - time limits, points bonuses, extra fuel - which make this a decent little game on its own.

Looking very similar to *Powerboat* is *Nitro Boost*, which, I think, was one of the very first 16-bit budget games. You control a car as well as a boat and the action scrolls vertically up the screen. You must race through seven very difficult stages from forests and streets to lakes and

white water rapids. There's only one problem with this game, it's too damn hard!

The third game in the quartet is *SAS Combat*. Although not a great hit on its own at budget price, this sure makes a change from the other trio and is a welcome addition. It's all quite fun to start with, but the action soon gets repetitive.

The final game, *Pub Trivia Simulator*, was only released a few months ago, and as such is quite a scoop. Everyone's familiar with this type of trivia game and *Pub Trivia* has nothing new to offer. The questions are all very challenging but after a handful of games they did start to repeat themselves. Still, this is to be expected and the game contains enough presentation and variety of subjects to be a decent multiplayer game.

Quattro Arcade is quite a fun foursome, but when you consider the price and the quality of presentation the product becomes very appealing.

AMIGA 76%

ATARI ST 74%

New the action really heats up as the other boats gang up on you to stop you finishing the race.

Hitting these barrels will award you extra fuel.

Lovely weather for sea-bathing isn't it.

If you hit these bullets you're fish fodder.

Now things start to get really hard as the bank narrows yet again.

Leave those sheep alone, you forget your waders.

Of course, hitting the banks yourself is dangerous and to be avoided.

If you don't manage to miss your opponents then you can race those onto narrow river banks. Spy Hunter style.

Try to avoid getting entangled in these fishermen's boats.

This is your craft. Treat it with care. Besides, it can only be replaced in many cases.

Your starting point is this place where you jump into your boat and prepare to get wet.

HOLLYWOOD COLLECTION

OCEAN • £24.99

With their huge back catalogue and the sheer volume of licences it contains, it was inevitable that Ocean would eventually come out with another big name compilation and here it is. The Hollywood Collection contains four of the biggest films in the movie world: *Batman*, *Ghostbusters II*, *Indiana Jones and the Last Crusade*, and *RoboCop*.

Batman - The Movie is based very closely around the plot of the hit film of 1989. You encounter the Joker, in the form of Jack Napier, before he falls into the vat at the Axis Chemical Factory. From there you jump into the Batmobile and race through the streets of Gotham, fathom out the Joker's dastardly Smilax potion, and grab in the Batwing before your final encounter in the cathedral. Some of the graphics are outstanding and the inspired soundtrack really sets the heart pounding. It's no (boy) wonder it sold so many.

Ghostbusters II takes up two disks and features three of the main sequences from the film. The

The Irish policeman Rob O'Cop faces a real one as a billy, time for that Robospidee I do believe. Remember, kids, stay out of trouble or RoboCop will be back yet again in RoboCop III: Revenge of a Lone Met.

first finds you dangling precariously from a cable leading down into the slime filled sewers. In the second scene you are in control of the jiving Statue of Liberty as she struts her stuff through the streets of New York. While the final stage is based around the closing scene of the film where you must rescue the baby in the museum. Great graphics, super sound, but very, very hard.

Staying with film hits of 1989 we encounter Indiana Jones and his last crusade before he hangs up his whip. You are placed in the shoes, or should that be hat, of the world's most infamous archeologist on the trail of the Holy Grail. This game is extremely playable and should keep even the most ardent gamer going for ages.

Believe it or not RoboCop has been in the Gallup charts now for 100 weeks and is still hanging in the top 20. The game is undoubtedly good but I can't really see it's long-lasting appeal - especially with the release of RoboCop II.

The overall package is a super mixture of arcade action. All the games contain some impressive graphics and every one closely follows the plot of the film it is based on. Four previous hits that will continue their success in this value-packed anthology.

AMIGA 92%

ATARI ST 91%

You start on your epic voyage down the Venetian sewers to collect a couple of slippery slugs to put in the toaster and take to a bathroom dance.

The rope you swing precariously on gets thinner every time a ghost or ghoul of slime hits it. Before you know it you're falling to your death.

Battles lying on shelves down the shaft can be collected to boost your energy. You bet you need to hit the bottle when going down this dingy hole.

Hands will suddenly shoot out of the wall and, if you're not careful, grab you by the gookers. Ouch!

A spook tries to speak to you, but you're not having any of it and promptly throw up on the wall. Cheating.

Extra PER bombs and shields can be collected from the side walls of the shaft. There are needed to complete the journey to the bottom.

Looks like you've got a friend for life. Go ahead, feed it some PER.

Don't look now, but there's something horrible creeping up behind you. Don't move it up now!

Somewhere you've made it to the bottom, but your troubles have only just begun. Perhaps you should have given up before you started.

The Scottish policeman Robby Cop faces his destiny, and quickly runs away. Actually it's the first level to Ocean's RoboCop. The game has been in the Gallup charts an astounding 100 weeks.

TURBO CUP CHALLENGE

SMASH 16 ● £6.99

Just to make sure that I don't get reported to the Monopoles Commission for mentioning too many Code Masters products, here's the latest release from another big 16-bit budget label, *Smash 16*. The label is currently on the crest of a wave, which is not surprising when you consider it's run by Digital Integration (*ATF*, *F-16 Fighter Pilot*, etc).

Turbo Cup Challenge is an interesting game. According to the transport minister, anything that travels over 70mph should have wings and be able to fly, but I heartily disagree with this (just ask my chauffeur how fast my Lotus Turbo Esprit goes). In this game have to race over four of the most challenging circuits in Europe. Before racing you must practise to gain a good grid position. Then it's onto the race proper where you zoom round a circuit in your Porsche 944 Turbo (whatever happened to Buy British?).

But this isn't one of those games where you can just keep your toe down and smile, you will have to watch out for those dangerous corners. There are some neat graphics and sound, combined with wickedly fast speed as you race around the track. It's all very playable and good value at a fiver.

AMIGA **70%**

ATARI ST **70%**

IBM PC **70%**

Above and left, scenes from *Comic Priest*, *Action 16*, £7.99. You are working for a criminal organisation, called the Council, who have all the information on space traffic and sell it to potential pirates. Once you have proved to them you have what it takes to raid the ships, you embark on your new career. Killing the numerous allies will bring you untold riches.

SKRULL THE BARBARIAN

SMASH 16 ● £4.99

Barbarian, I thought, I wonder if they'll be any sign of Maria Whittaker? Sadly, I was to be disappointed as Mary Whitehouse seems so have got her disinfected hands in computer games too. *Skrull* is an icon-driven, dungeon adventure. It received warm reviews when it was first released, and you can see why. The graphics are big and bloodthirsty and the sound quite crisp 'n' crunchy. The premise is that you must - like my close friend Dougie Howe - save the Earth from imploding. It may seem all very environmental and green, but the action is very gory and the gore very explicit. The great graphics and playability make it worthy of attention.

AMIGA **79%**

ATARI ST **75%**

IBM PC **77%**

MIG-29 SOVIET FIGHTER

CODE MASTERS ● £6.99

Code Masters seem to be flooding the market once more with neat little games that are worth their price. *MIG-29* is an *Afterburner* style, flying shoot-'em-up which is, in my opinion, far superior to the aforementioned game which is also coming out at £7.99 this month. For only seven quid you get all the graphics and speed of *Afterburner* with sound that, while not being as good as Sega's coin-op, is more than adequate for this type of frenetic game. It's very playable and a steal at the price.

AMIGA **80%**

ATARI ST **80%**

CUSTODIAN

SMASH 16 ● £4.99

Being the Custodian of the nation's finances I can almost pity the poor bighter's job in this game. Your sole purpose of existence is to protect a tomb by collecting the alien pods located in each of the many levels. Aliens attack you constantly making this a very challenging game that's either going to scare you away or infuriate you for ever.

Custodian is basically a shoot-'em-up, nothing more and nothing less. The graphics aren't spectacular and the sound is uninspiring - I'm glad I didn't receive this for Christmas.

AMIGA **54%**

ATARI ST **55%**

IBM PC **50%**

BUDGET BITZ

★ Budget Blitz gets some exclusive news of some budget bitz on Code Masters and their best character to date, Dizzy. 16-bit owners will soon be able to get the latest in the Dizzy saga, called *Fantasy World Dizzy*. After playing it for a short time, it seems to be the best of the series so far. There are some wicked puzzles to solve, which along with the cute graphics and boppy sound, make it a joy to not only play but also to look at. This fun-filled game should be out for £6.99.

The lovable egg creation is back in an all new adventure *Fantasy World Dizzy*.

★ Staying with Coders, as I have done for 50% of these budget-bulging pages, we have *Spellfire the Sorcerer*. It's a totally original arcade game featuring some mystical graphics and smooth scrolling to boot. Another £6.99 release which you should be able to get your hands on now.

Cute characters, cute game, damned playable and full review next month.

★ Virgin are joining the budget race with the release of *Xenon* and *Double Dragon*. Both are available on Amiga, Atari ST and IBM PC and will set you back a princely sum of £7.99. *Xenon* is of course the smash Bitmap Brothers shoot-'em-up while *Double Dragon* is a martial arts beat-'em-up.

QUATTRO SPORTS

CODE MASTERS • £12.99

As a partner to Quattro Arcade, Quattro Sports is a collection of some classic Code Masters games. Probably the most famous is BMX Simulator, the game that started off the Simulator series. Giving more than a nod to the classic Super Sprint, BMX Simulator pits two bikers against each other on a selection of twisty and undulating dirt tracks. The action is very competitive in one-player mode against the computer and the clock, but with two players it can get totally out of control. A great game.

The inclusion of Italia 1990 may

seem a bit strange for a 1991 release, but when you hear that the game is currently WH Smith's all-time best-seller, you'll understand why it boosts the compilation's worth considerably. The game's not all that special, but it does include a training mode and tournament which should keep you interested for a while.

If you're pining for the slopes but aren't too sure about the snow, then Advanced Ski Simulator could be just the thing for you. You're guaranteed loads of snow here and a wide range of pistes to choose from. The racing is of the downhill type, going mainly for speed but also containing quite a few flags that have to be skied around. Races are against the clock which builds up the adrenalin and makes it quite

an addictive game.

If a Code Masters game isn't a Sim then it's usually a Pro, as in Pro Tennis Tour, the final game in the quartet. This one- or two-player game comes in the wake of numerous tennis games released in the past year. None of them were particularly playable, so it's nice for this little cheapy to make a reappearance. The graphics may not be startling, but the computer opponent is a tough little cookie

and comes complete with a few samples of speech.

Of the four games, BMX Simulator is undoubtedly the best — both graphically, aurally and playability wise. Out of the two Coders compilations, I'd go for this one every time.

AMIGA 80%

ATARI ST 80%

New balls please... The little speech bubble tells the tale. Tightened threads Becker. You only get to meet one opponent — however, difficulty level and number of sets can be selected before you play. If you win you get to play again, and again, and again...

Several scenes from the Coders' highly addictive simultaneous two-player BMX Simulator which forms part of the Quattro Sport compilation. Use the books to your advantage to complete the course in three (and I don't mean ask them for a loan). The only thing preventing you from finishing a grueling course is time. Two competent players will get to see all seven levels eventually. As for Julian, well he might as well kick the stool right now.

BUDGET BITZ

* Code Masters face some stiff competition in the compilations market as Alternative come up with the new Fourmost packs. Like Quattro, each pack will contain four games along the same theme. The themes of the first few releases will be horror, action, fun and sport.

* After clearing up in the 8-bit budget charts, Ocean are now continuing their budget market blitz with the release of Batman The Caped Crusader and Last Ninja 2 at £7.99. Batman's a great game, the second in the trilogy of Ocean Batman tie-ins. Last Ninja 2 seems a waste of money as System 3, the original's programmers, have admitted that the sequel is, in fact, very unplayable, which is why Last Ninja Remix is now out.

HOSTAGES

ACTION 16 • £6.99

The Home Secretary was very excited when this arrived through the Commons post box. Personally, I couldn't understand what all the fuss was about. I'd played Hostages a few years ago when it came out under the Infogrames label, so I knew exactly what to expect. (Incidentally, there's a sequel in the pipeline called Alcatraz!)

After wrestling my copy back from Kenny Baker - who has subsequently gone out and purchased his own copy - I settled down for many hours rescuing hostages from a very well guarded embassy.

Terrorists have taken control of the embassy and taken all inside hostage. Their demands are totally unreasonable (aren't they always?) so a crack unit of special troops are sent in. The game is run over several stages, from approaching the embassy to scaling the building and then walking around inside. This is obviously a full-price game, with outstanding graphics and loads of ditties and effects, and is a real steal at a few quid.

If F/A-18 Interceptor was budget released of 1990, this could be 1991's biggest release - so far.

AMIGA **92%**

ATARI ST **88%**

Catch the classic Popeye action in Elite's Final compilation. Out on ST and Amiga priced £24.95. See page 84 for the full review.

Old Betty has managed to format his disk. But he didn't store all his text files in the Les 40 last month.

* Super Hang-On is also out on the Hit Squad label and is probably the best Amiga arcade motorbike game around. Finally, there's Afterburner, which is in my opinion inferior to Coders' MIG-29. All the Hit Squad titles retail at £7.99.

* Gremlin, home of Lotus Turbo Esprit and other classics, have made a move into the budget market with the release of the 16-Bit Hit Machine. Priced at £24.99 on the Amiga and ST, the compilation contains Supercars, Switchblade, Skidz and Axel's Magic Hammer.

GET THE BRIGHTEST SOUND AROUND

WITH

RAZE

3 CD PLAYERS TO GIVEAWAY!

You may have noticed an abundance of Code Masters games in Budget Blitz this month. Those lads are certainly working hard and the year has only just begun. To celebrate the New Year, the cheap and cheerful people have practically thrust three compact disc players upon RAZE.

These players are ideal for the person who likes his music loud - and for others around him who don't. Just plug into this super Sony CD Walkman and you can blast out Nigel Kennedy to your heart's desire, or pound your way through AC/DC's Thunderstruck just one more time before you go to sleep. The machine also comes complete with a little hole that allows you to connect it up to your present hi-fi system.

Right, that's enough of the hard sell. You know you want one, the question is how do you get your hands on one. Just answer the three questions below, fill in the form with your name, address and daytime phone number and we'll see what happens on February 28th when we draw whole lot. Send your entries to **We're not bigger than God (yet) compo, RAZE, Unit 3, 7 Back Street, Trowbridge, Wiltshire BA14 8LN.**

QUESTIONS

1. Which little Darlings founded Code Masters?

- a) The Darling Beds.
- b) Richard and David Darling.
- c) Captain Darling.

2. What does CD stand for?

- a) Completely Dense.
- b) Coded Disasters.
- c) Compact Disc.

3. Dial 0898 555080 and

listen to the amazingly simple question that some nice young man will read over the phone line. Pick out what you think the correct answer is and fill it in under question three in the coupon.

"WE'RE BIGGER THAN GOD"

I promise I haven't already got a CD player, and that if I do get one in the meantime and I win the competition, I'll donate my player to some poor schmuck who hasn't got one. I also promise not to do any impersonations of that dickhead from the Sony advert. My answers are:

DYNAMIX GO MAD!

**SUPERB COLLECTORS ARTWORK
UP FOR GRABS!**

To celebrate the latest Raze Rave to hit the streets, Dynamix's outstanding *Rise of the Dragon*, may we present a unique prize, a real work of art!

WHAT TO WIN...

No, no, not an ol' Van Cough or even something by any of the Ninja Turtles, no this one is even more priceless. The fabulous competition prize is a montage of the original artwork on which the stunning VGA *Rise of the Dragon* screen was based. These aren't naff old sketches, these are the fully airbrushed jobs.

With dimensions of just under a metre square, this specially commissioned artwork depicts the initial opening scene of *Rise of the Dragon* where the mayor's daughter buys the lethal drug, takes it and dies a mutant death. Depicted in a unique comic book format, this work of art is not only to be admired and enjoyed but is, like any other rare artwork, a financial investment for the future.

Win it now and be a millionaire by the time you're 30! (No guarantees, though.)

WHAT TO DO...

To get in with a chance of obtaining this glorious art, fill out the form below, answering all three questions, and send it to **Dopey Dragon Competition, Raze, Unit 3, 7 Back Street, Trowbridge, Wiltshire BA14 8LH**. To help you, all the answers are printed within the review in this issue.

1. What year is the story set in?

- a) 2530
- b) 2053
- c) 2035

2. Name the hero in the game?

- a) Blade Hunter
- b) Sam Spade
- c) Spade Hunter

3. In the prophecy, what Age will the Dragon rise?

- a) Bounty
- b) Decay
- c) Destruction

RISE OF THE DRAGON

I've always fancied myself as a bit of an art expert, so why don't you send me that painting of yours and I'll see what I can get for it...

1.....2.....3.....

NAME.....

All entries must be received by January 1st 1991. Nah, only kidding, you can have a bit more time than that, how does February 28th 1991 grab you?

NEXT MONTH

Just one month to go till the next game-packed issue of RAZE.

In fact, it's going to be one hell of an issue next month. We'll be getting our hands on some hot Mega Drive games, plus an exclusive look at the NES game that should be 1991's top seller.

Obviously nothing can be revealed at this stage, but miss out on next issue and you'll miss out on the future! Issue six will be on sale

February 28!

DON'T TOUCH THAT DIAL!

ocean ^{FR}

Arcade action and a BIG finish. Infiltrate the criminal underworld - your mission is to seek out and destroy the king pin of the MR BIG CORPORATION - if you get that far.

You'll have to outwit his enormous army of body guards... gangs of charisma-bypass patients in trench coats, the bullet brain with the build of a rhinoceros and the breath of a dung beetle, packs of vicious canine yagpies, the psychotic clown with an evil sense of humour - you'll die, but not laughing! Then there's the gas guzzling cadillac jock - a cool specimen, elbow hanging on the door rail, a serious looking piece in his hand and ready to blow you away as he rolls down main street leaving you coughing lead.

It's not all bad!... You've got a chopper to back you up, a mean, shiny street machine, some heavy metal hardware and some pretty neat moves. And what about the king pin... did I say he was Mr. Big? No, he's **MR BIG!**
